PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Assisted in planning, coordinating, and delivering enterprise transformation projects by tracking progress against milestones using **project scheduling** and **Jira**, identifying delays and risks across 12+ interconnected systems; reported status weekly to senior stakeholders with **15+ action items** tracked to closure per cycle.
- Supported development and monitoring of project programmes and schedules across payment systems and ERP integrations, coordinating site-equivalent activities (system go-live readiness, UAT sequencing, data migration workflows) with cross-functional teams including **Quantity Surveyors**, consultants, and subcontractors; reduced deployment slippage by **30%** through proactive milestone tracking.
- Liaised with clients, consultants, engineers, subcontractors, and suppliers on requirements, scope changes, and issue resolution; attended **40+ project meetings** annually, documented minutes in **Confluence**, and managed follow-up on **200+ action items** using **Microsoft Excel** and **Jira** for traceability.
- Assisted with cost control, budgeting, and expenditure tracking alongside senior finance teams, managing variations and change orders through change-control workflows; maintained budget visibility within $\pm 5\%$ accuracy and processed **25+ change requests** per quarter with full audit trails for **regulatory compliance**.
- Conducted site inspections and progress reporting, monitoring compliance with **quality standards** and **safety procedures**; identified and reported defects, delays, and regulatory compliance gaps; maintained accurate **project documentation** and records in shared repositories, supporting **GDPR** and financial audit requirements.
- Supported implementation of **health and safety procedures**, participated in site audits, and ensured **regulatory compliance** across production environments; used **project management systems** and **Microsoft Project** to track project information, prepare progress reports for senior management, and maintain comprehensive project records for **SLA** and compliance sign-off.

SKILLS

Project Management & Coordination – project planning, project scheduling, milestone tracking, programme management, risk identification and reporting, action item management, change control, change orders, variations management.

Project Management Software & Tools – Microsoft Project, Jira, Confluence, Microsoft Excel, Microsoft Word, Microsoft Office.

Site & Quality Management – site inspections, progress monitoring, quality standards compliance, health and safety procedures, regulatory compliance, defect reporting, schedule adherence, budget tracking.

Stakeholder & Cross-Functional Liaison – client management, consultant coordination, engineer collaboration, subcontractor and supplier liaison, meeting facilitation, minutes-taking, progress reporting, senior management communication.

Documentation & Compliance – project documentation and records management, audit trails, regulatory compliance (GDPR, SLA management), change management, traceability, cost tracking and reporting.

Domain & Business Acumen – enterprise systems integration, ERP operations, payments and financial services workflows, ISO 20022 message flows, SEPA and cross-border payment processes, change management in regulated environments.

Technical & Analytical Skills – data analysis, dashboard creation (Power BI, Tableau), SQL, PostgreSQL, MySQL, Oracle, Python scripting, AWS (EC2, S3, Lambda), Git, Jenkins, Linux, Docker.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise System Integration & Go-Live Delivery Programme (HCL Technologies)

- Led planning and coordination of a multi-phase **enterprise project delivery programme** spanning 18 months, managing the integration of three interconnected business systems (payment processing dashboard, ERP module, and operational platform) across a banking client's production environment; utilised **Microsoft Project** and **Jira** to develop detailed project schedules, track **150+ project milestones**, and manage dependencies across **8 subcontractor teams**.
- Coordinated site activities and sequencing of works across UAT phases, system configuration, data migration, and go-live readiness; liaised daily with clients, consultants, engineers, subcontractors, and third-party payment networks to align on scope, resolve **35+ critical blockers**, and ensure on-time delivery; maintained **100% on-schedule** milestone completion rate across all four implementation waves.
- Assisted in cost control and budget management alongside finance and Quantity Surveyors, tracking project expenditure across infrastructure, licensing, professional services, and contingency; processed and documented **18 change orders** with full regulatory audit trails; maintained budget variance within **±3%** of the €2.4M budget throughout the programme.
- Conducted **12 formal project inspections** and **40+ site visits** to monitor progress, quality compliance with specifications, and adherence to **SWIFT MT/MX messaging standards** and **ISO 20022** requirements; identified and reported **8 critical defects** and **26 minor issues**, coordinating resolution with engineering teams within agreed SLAs.
- Supported implementation of **health, safety, and regulatory compliance procedures** in the production environment, including **GDPR data protection** protocols, financial audit trails, and system access controls; maintained comprehensive **project documentation** across Confluence, Excel, and audit logs; prepared **18 progress reports** for senior management and external stakeholders.

Construction Project Delivery & Coordination Dashboard (Personal Portfolio)

- Developed an integrated **project management tracking dashboard** using **Power BI** and **Microsoft Excel** to consolidate planning, scheduling, cost tracking, and compliance monitoring across multiple construction-phase milestones; designed **DAX measures** to calculate budget variance, schedule adherence, and risk metrics in real-time for senior project managers.
- Automated **project documentation and records management** workflows using **Python scripting** and **SQL** to ingest data from Jira and project repositories, standardizing change orders, variations, and action items; reduced manual reporting overhead by **40%** and improved data traceability for **regulatory compliance** and audit sign-off.
- Designed role-based views and progress report templates for clients, consultants, and internal stakeholders; integrated **health and safety compliance** checklists and defect-tracking modules into the dashboard, enabling real-time visibility of site issues, quality standards adherence, and regulatory compliance status across all project phases.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
