PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and maintained **CI/CD pipelines** using **Jenkins** and **Git** across enterprise Java and Python microservices; implemented **Infrastructure-as-Code** patterns via configuration-management automation, reducing deployment time by **40%** and enabling repeatable, auditable release processes across product teams.
- Operated and monitored **AWS cloud infrastructure** (EC2, S3, Lambda, CloudWatch) and **containerized applications** using **Docker**; implemented **observability** dashboards with **Splunk** and **Dynatrace** for metrics, logging, and alerting; managed on-prem and cloud resource health checks and cost optimization, reducing alert noise by **35%** and improving MTTR by **2 hours**.
- Wrote **Python** and **Bash scripts** for automation of routine operational tasks including data pipeline orchestration, scheduled reporting, and infrastructure health checks; built ETL workflows that reduced manual toil by **20 hours per week** and improved data validation accuracy to **99.8%**.
- Participated in **incident management** and on-call rotation supporting production enterprise systems; performed root-cause analysis, triage, and post-incident review documentation using **Jira** and **Confluence**; maintained **SLA compliance** for P1/P2 incidents in financial-services environments with **99.5% uptime** across mission-critical payment-operations systems.
- Managed cross-functional collaboration with engineering, QA, security, and business operations teams using **Agile/Scrum** ceremonies and **change-control** processes; supported **UAT coordination**, post-implementation triage, and runbook documentation; facilitated knowledge-sharing sessions on infrastructure patterns and security best practices.
- Demonstrated **Linux systems administration** and **networking fundamentals** (TCP/IP, DNS, firewalls) through log analysis, shell scripting, and cron-job management; applied **SQL** (PostgreSQL, MySQL, Oracle) for infrastructure data validation and schema changes; maintained strong **security-first** mindset and documented all operational procedures with clarity for team onboarding and compliance.

SKILLS

DevOps & CI/CD – Jenkins, Git, CI/CD pipelines, Infrastructure-as-Code, Terraform, Helm, change-control management, release automation.

Cloud & Container Platforms – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes concepts, AKS, Azure environment management, cost monitoring.

Programming & Scripting – Python, Bash, PowerShell, automation scripts, ETL pipeline development.

Observability & Monitoring – Prometheus, Grafana, Splunk, Dynatrace, Azure Monitor, metrics, logging, alerting, tracing, OpenTelemetry.

Systems & Infrastructure – Linux administration, TCP/IP networking, DNS, firewalls, on-prem resource management, health checks.

Data & Databases – SQL (PostgreSQL, MySQL, Oracle), data validation, schema management.

Collaboration & Process – Agile/Scrum, Jira, Confluence, incident management, on-call rotation, cross-functional delivery, security-first practices.

EDUCATION AND TRAINING

PROJECTS

Multi-Region Kubernetes GitOps Platform with Blue-Green Deployment Automation (HCL Technologies)

- Architected and deployed a **Kubernetes (AKS)** orchestration platform across multiple Azure regions using **Helm charts** and **Terragrunt** for Infrastructure-as-Code; integrated **Argo CD** for declarative GitOps workflows, enabling fully auditable, version-controlled infrastructure deployments with **zero-downtime** blue-green rollouts.
- Implemented comprehensive **observability stack** leveraging **Prometheus** for metrics collection, **Grafana** for dashboards, **Azure Monitor** for cloud-native telemetry, and **OpenTelemetry** for distributed tracing; reduced incident detection time from **15 minutes to 2 minutes** and enabled cross-team visibility into application and infrastructure health.
- Developed **Python** and **Bash automation scripts** for cluster provisioning, certificate rotation, and disaster-recovery procedures; integrated automation into **Jenkins CI/CD pipelines** to eliminate manual operational toil and reduce deployment errors by **95%**.
- Established **incident management** workflows and on-call runbooks; documented GitOps deployment procedures, troubleshooting guides, and security hardening checklists in **Confluence**; trained 12+ engineers on **Linux systems, networking fundamentals**, and first-principles root-cause analysis.
- Deployed **Azure DevOps** integration for pipeline automation and **cost monitoring** dashboards tracking per-region spending; reduced cloud infrastructure costs by **25%** through resource optimization while maintaining **99.9% uptime** SLA across all production workloads.

Financial-Services Payment Operations Monitoring & SWIFT Integration Platform (HCL Technologies)

- Engineered and maintained a real-time **Splunk** and **Dynatrace** observability platform for banking-client payment-operations dashboard supporting **SWIFT messaging** (MT/MX formats) and **ISO 20022** cross-border transaction flows; achieved **99.5% SLA uptime** and reduced P1 incident MTTR by **40%** through proactive alerting and transaction-flow visibility.
- Developed **Python ETL scripts** and **SQL queries** across PostgreSQL and Oracle databases to reconcile payment messages, validate **SEPA** settlement workflows, and audit **GDPR**-compliant data retention; processed **50,000+ daily transactions** with **99.8% accuracy**.
- Collaborated with banking-domain business analysts and regulatory teams to implement change-control procedures, UAT coordination, and post-go-live incident triage; documented operational runbooks and security protocols aligned with financial-services compliance requirements and data-protection standards.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
