PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and maintained **CI/CD pipelines using Jenkins** integrated with **Git** branching and code review workflows; automated deployment processes across **AWS (EC2, S3, Lambda)** and on-premises infrastructure, reducing manual deployment time by **40%** and enabling daily release cadence for enterprise Java and .NET services.
- Built **Python automation scripts and Bash/shell scripts** for infrastructure provisioning, log aggregation, and routine operational tasks; implemented **cron job scheduling** and **Linux systems administration** to reduce manual ops overhead by **35%** and improve mean-time-to-resolution (MTTR) for production incidents.
- Operated and monitored **production observability tooling** including **Splunk, Dynatrace, and CloudWatch**; built operational dashboards and alerting rules for **SLA management** and **P1/P2 incident response**, managing uptime targets of **99.9%** across mission-critical banking payment systems and supporting on-call incident triage.
- Managed **Docker containerization** and container orchestration fundamentals for microservices deployment; contributed to **Infrastructure-as-Code** concepts and cloud resource lifecycle management across **AWS** environments, supporting infrastructure cost monitoring and health checks with **CloudWatch** metrics and logs.
- Executed **change-control management** and **UAT coordination** for system configuration updates across interconnected enterprise platforms; collaborated with cross-functional teams (product engineering, QA, security, operations) to ensure reliable deployments and post-go-live support with zero-downtime release strategies.
- Developed expertise in **Linux systems, networking fundamentals (TCP/IP, DNS, firewalls)**, and command-line system administration; performed **SQL query optimization** and database administration across **PostgreSQL, MySQL, and Oracle** to support infrastructure performance tuning and data pipeline reliability.

SKILLS

DevOps & CI/CD – Jenkins, Git, CI/CD pipelines, deployment automation, release management, GitOps concepts.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Infrastructure-as-Code, cloud resource management, cost monitoring, health checks.

Scripting & Automation – Python, Bash, shell scripting, cron jobs, automation frameworks, operational task scripting.

Containers & Orchestration – Docker, containerization, container orchestration fundamentals, Kubernetes concepts.

Observability & Monitoring – Splunk, Dynatrace, CloudWatch, metrics, logging, alerting, SLA management, incident response.

Systems & Infrastructure – Linux systems administration, networking (TCP/IP, DNS, firewalls), database administration (PostgreSQL, MySQL, Oracle), on-call incident management.

Collaboration & Process – Jira, Confluence, change-control management, UAT coordination, cross-functional delivery, Agile/Scrum.

EDUCATION AND TRAINING

PROJECTS

Multi-Tier Kubernetes GitOps Platform with Observability & Automated Incident Response (HCL Technologies)

- Architected and deployed a **Kubernetes cluster orchestration platform** leveraging **Infrastructure-as-Code (Terraform)** to manage on-premises and cloud resources; integrated **Argo CD for GitOps declarative deployments**, enabling audit-trail-driven configuration management and reducing deployment rollback time by **60%**.
- Built end-to-end **observability stack** combining **Prometheus metrics collection, Grafana dashboards, Azure Monitor integration, and OpenTelemetry tracing**; implemented automated alerting and **incident management workflows** that reduced mean-time-to-detection (MTTD) by **45%** and supported on-call rotation with structured runbooks.
- Developed **Python and Bash automation scripts** for infrastructure provisioning, container image building, cluster health checks, and post-incident remediation; integrated scripts into **CI/CD pipelines** to enable self-healing infrastructure and reduce manual operational overhead by **50%**.
- Designed **Linux networking and firewall policies** for secure communication across distributed Kubernetes services; implemented **TCP/IP and DNS configuration best practices** for service discovery and inter-pod communication, achieving **99.95% cluster uptime** across production workloads.
- Documented **procedures, runbooks, and operational learnings** with clarity for cross-functional teams (product engineering, QA, security, support); facilitated **post-incident reviews** to drive continuous improvement and knowledge sharing across DevOps and platform engineering teams.

Banking Payments Operations Dashboard & SWIFT Message Monitoring System (HCL Technologies)

- Built production-grade **observability and monitoring dashboard** for **SWIFT messaging (MT/MX) and ISO 20022 message flows** in a banking payments operations platform; integrated **Splunk and Dynatrace** for real-time transaction-flow visibility, alerting, and **SLA management** with **99.99% uptime** across mission-critical payment processing.
- Implemented **change-control and UAT coordination processes** for regulatory compliance (GDPR, data protection); collaborated with banking-domain business analysts and operations teams to ensure post-go-live support and operational alerting for **SEPA, cross-border, and instant payments** workflows.
- Executed **on-call incident management and P1/P2 incident response** for production banking systems; developed troubleshooting runbooks and performance tuning strategies that reduced mean-time-to-resolution (MTTR) by **30%** and improved stakeholder confidence in payment system reliability.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
