PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Translated business requirements into technical product specifications and test cases across **15+ feature releases**, collaborating with Data Engineers on ETL pipeline architectures, microservices design patterns, and data-flow validation to ensure scalable, production-ready systems; documented acceptance criteria in **Git-based repositories** with **Jenkins** CI/CD integration for **100% requirement traceability**.
- Maintained system health and operational reliability using **monitoring dashboards (Splunk, CloudWatch, Dynatrace)**, incident-response workflows, and **TDD-aligned** test strategies; reduced P1/P2 incident resolution time by **35%** through proactive SLA management, root-cause analysis, and architectural recommendations to engineering teams.
- Guided **microservices** features from concept through development, rollout, and ongoing operation; refined **ETL** data pipelines and validated **schema changes** across **PostgreSQL, MySQL, and Oracle** databases; ensured **10+ cross-system integrations** remained stable during change-control deployments with **zero production regressions**.
- Developed operational visibility and business intelligence using **Power BI** dashboards, **DAX** measures, and **data modelling** to translate technical system metrics into actionable KPIs for non-technical stakeholders; created **15+ executive reports** covering system performance, data quality, and regulatory compliance across interconnected platforms.
- Communicated technical concepts and architectural decisions in agile ceremonies (**sprint planning, refinement, retrospectives**); bridged engineering teams and business stakeholders by translating requirements into clear acceptance criteria, defining test strategies, and conducting **UAT support sessions** resulting in **98% first-pass test coverage**.
- Demonstrated pragmatic ownership and independent problem-solving across enterprise systems: managed **change-control workflows**, validated **REST API** integrations, performed SQL-based data audits, and used **Linux** shell scripting to automate **7+ operational tasks**; brought structure to complexity by documenting system architectures, defining monitoring baselines, and establishing runbooks for critical services.

SKILLS

Technical Product Ownership & Requirements – business-to-technical translation, technical requirements refinement, test case definition, acceptance criteria, architectural guidance, feature lifecycle management.

Data Engineering & ETL – ETL pipeline architecture, data-flow validation, microservices integration, schema design, cross-system data consistency, Python data automation.

Monitoring & Reliability – monitoring dashboards, Splunk, CloudWatch, Dynatrace, incident response, SLA management, TDD, test strategy, operational visibility.

Data Platforms & Modelling – Power BI, DAX, Tableau, data warehousing, data modelling, Power Query, business intelligence, executive reporting.

Engineering Tools & CI/CD – Git, Jenkins, CI/CD pipelines, change-control management, code review, Jira, Agile/Scrum, Linux, shell scripting.

Databases & System Integration – PostgreSQL, MySQL, Oracle, SQL, REST APIs, microservices architecture, ERP integration, system interconnectivity.

Technical Communication – agile ceremonies, stakeholder collaboration, cross-functional alignment, technical documentation, UAT coordination, business-to-engineering translation.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Data Services Reliability & Scaling Platform (HCL Technologies)

- Led technical product strategy for **3 microservices** supporting enterprise data operations; defined **ETL pipeline** requirements, **data-flow architecture**, and **monitoring strategy** using **Grafana** and **Graylog** to achieve **99.95% system uptime** and reduce mean-time-to-resolution by **42%**.
- Collaborated with Data Engineers to design and validate **PostgreSQL** schema migrations, **microservices** deployment patterns, and **TDD-aligned** test coverage; translated **25+ business requirements** into actionable technical specifications resulting in **zero post-launch defects** across **8 feature releases**.
- Established operational visibility framework using **Power BI** dashboards with **DAX** measures and **data modelling** to track SLAs, incident trends, and system health; presented **weekly KPI reports** to senior stakeholders covering reliability metrics, cost optimization, and scaling readiness across **15+ interconnected systems**.
- Managed change-control workflow for **production deployments** via **Jenkins CI/CD pipelines** and **Git-based** release coordination; conducted **UAT support** and **post-go-live triage** for **12 major rollouts**, reducing rollback incidents by **58%** through proactive architectural reviews and runbook documentation.
- Demonstrated pragmatic problem-solving by automating **7+ operational tasks** using **Python** scripting and **Linux** shell commands; independently investigated **incident root causes**, validated **REST API integrations**, and authored **system architecture documentation** consumed by **20+ engineering stakeholders**.

SWIFT Payments Operations Dashboard & ISO 20022 Migration Governance (HCL Technologies)

- Owned technical product requirements for **SWIFT messaging** operations platform (**MT/MX message formats**, **ISO 20022** compliance, **SEPA / PSD2** standards); translated banking-domain regulatory needs into **architectural specifications**, **monitoring dashboards**, and **data validation rules** for **250+ daily payment transactions**.
- Designed operational reporting using **Power BI** and **Tableau** to visualize payment flows, transaction latency, and reconciliation status; created **real-time dashboards** with **alert thresholds** and **GDPR-compliant** audit trails enabling business operations teams to detect anomalies within **60 seconds** of occurrence.
- Refined **ETL pipelines** and **microservices** integration points during **ISO 20022** migration; validated **Oracle** and **PostgreSQL** data consistency across payment-processing workflows, reconciliation modules, and tokenization services; coordinated **UAT** with banking BAs and regulators, achieving **100% compliance sign-off** pre-launch.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
