PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Provided first- and second-level **end-user IT support** across enterprise environments, managing **user account provisioning**, **Active Directory** permissions, and **Microsoft 365** access for 200+ users; resolved **desktop, laptop, mobile device, and printer** hardware issues with **99.2% first-contact resolution rate**.
- Supported **SAP Business One on HANA** and **ERP integrations** through production monitoring, **user setup**, functional troubleshooting, and **system update testing & rollout validation**; coordinated **master data maintenance** and **reporting requirements** with business stakeholders across finance, sales, and operations.
- Administered **SUSE Linux Enterprise Server** environments including **patching, access control, monitoring, and system troubleshooting**; performed **SAP HANA database operations** such as **backups, health checks, and performance monitoring**, reducing unplanned downtime by **34%**.
- Authored and optimized **SQL and SAP HANA SQL Script queries and views** to support **data accuracy**, operational **reporting**, and **system analysis**; assisted in **database housekeeping** tasks and schema validation across **PostgreSQL, MySQL, and Oracle** platforms.
- Supported **LAN/WAN networks, Wi-Fi, VPN access, and remote connectivity** infrastructure; monitored **backups, endpoint protection, and system availability**; assisted with **firewall, switch, and server administration** and enforced **IT security best practices and compliance requirements** including change-control documentation.
- Drove **digital process improvement initiatives** by documenting as-is and to-be workflows for **ERP usage, system integrations, and reporting**; identified automation opportunities across warehouse, sales, and finance operations, reducing manual data entry by **40%** through **REST API integrations** and **system interconnections**.

SKILLS

End-User Support & Systems – Active Directory, Microsoft 365, user account provisioning and access management, desktop and laptop configuration, mobile device support, printer and peripheral troubleshooting, ticket resolution and support queue management.

ERP & Business Systems – SAP Business One on HANA, SAP user setup and functional support, system update testing and rollout coordination, master data maintenance, reporting requirements gathering, change-control management, business process documentation.

Linux, Database & Technical Systems – SUSE Linux Enterprise Server administration, SAP HANA database operations, backups and health checks, performance monitoring, SQL and SAP HANA SQL Script query writing, data analysis and troubleshooting, database housekeeping.

Infrastructure & Security – LAN/WAN networks, Wi-Fi administration, VPN and remote connectivity support, firewall and switch administration, server administration, backup monitoring, endpoint protection, IT security best practices, compliance and audit requirements.

Technical & Data Skills – SQL (PostgreSQL, MySQL, Oracle), REST API integrations, system interconnections, Python scripting, Linux administration, Git and CI/CD concepts, data validation and accuracy assurance.

Certifications & Education – MSc Data Analytics (National College of Ireland, Feb 2026), Bachelor of Engineering in Computer Science (SNS College of Technology, 2021), IELTS Academic Band 7/9, Full Stack Java Spring Boot & Angular, Web Development (Coursera).

Business & Process Skills – Digital process improvement, business process analysis and documentation, cross-functional stakeholder coordination, operational reporting, requirements gathering, UAT support, post-implementation triage.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

SAP HANA ERP Infrastructure & Process Automation Platform (HCL Technologies)

- Architected end-to-end **SAP Business One on HANA support framework** integrating **SUSE Linux Enterprise Server** infrastructure, **SAP HANA database operations**, and **user account provisioning** across 150+ concurrent users in warehouse, sales, and finance modules.
- Developed **SAP HANA SQL Script queries and views** for operational **reporting** and **master data accuracy validation**; automated **daily backups, health checks, and performance monitoring** using shell scripts, reducing manual DBA overhead by **45%** and achieving **99.8% system uptime**.
- Coordinated **system update testing and rollout validation** across 3 business units; documented as-is and to-be **ERP usage workflows** and **system integrations** via **REST APIs**, identifying **12 process automation opportunities** that reduced month-end close time by **28%**.
- Established **IT security best practices** and **compliance requirements** enforcement, including **Active Directory access control, change-control documentation, and endpoint protection monitoring**; provided first-line **SAP user setup, troubleshooting, and functional assistance** to reduce user-reported issues by **38%**.
- Managed **LAN/WAN networks, Wi-Fi, VPN access, and remote connectivity** for hybrid warehouse and office environments; liaised with external SAP partners on escalations and assisted in **database housekeeping** tasks to optimize system reliability and performance.

SWIFT Payments Operations Monitoring & Integration Dashboard (HCL Technologies)

- Delivered **real-time payment-operations monitoring dashboard** for banking client, tracking **SWIFT MT/MX message flows**, transaction status, and **ISO 20022 compliance** across **SEPA and cross-border payment corridors**; provided **first-line production support** and SLA management for 200+ daily payment messages.
- Engineered **REST API integrations** between legacy payment systems and **ERP platforms**, enabling cross-system **data accuracy** and **reconciliation workflows**; reduced manual reconciliation touch-points by **52%** and supported **PSD2 / Open Banking regulatory compliance** through audit-trail logging.
- Authored **SQL queries** against **PostgreSQL and Oracle** databases to validate **master data maintenance**, message integrity, and **GDPR data protection** requirements in production; liaised with banking-domain BAs and operations teams on **UAT support** and post-implementation triage for payment-operations enhancements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
