PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Architected and developed **RESTful API endpoints** in **Java Spring Boot** supporting enterprise payment-operations dashboards, ensuring **sub-100ms latency** and **99.9% uptime SLA** across **PostgreSQL** and **Oracle** relational databases with optimized data models and schema design.
- Collaborated with front-end engineers to deliver dynamic, responsive web applications using **React** and **Angular** frameworks, implementing **HTML, CSS, and JavaScript** with strong **UI/UX design principles**, reducing page load time by **40%** and improving user engagement metrics by **35%**.
- Designed and maintained **relational database schemas** in **PostgreSQL, MySQL, and Oracle**, ensuring data integrity and performance through normalized data models, automated ETL pipelines in **Python**, and **SQL** query optimization that reduced query execution time by **50%** across enterprise systems.
- Engineered production monitoring and incident response workflows using **Splunk, CloudWatch**, and **Dynatrace**, implementing operational dashboards and alerting rules that reduced **P1 incident resolution time** by **45%** and maintained **SLA compliance at 98%+** for mission-critical applications.
- Implemented **CI/CD pipelines** with **Jenkins**, automated deployment workflows, and infrastructure-as-code using **Docker containerization** and cloud technologies (**AWS EC2, S3, Lambda, CloudWatch**), enabling **daily deployments** with zero-downtime releases and reducing deployment failures by **60%**.
- Led cross-functional collaboration across engineering, business analysis, and operations teams using **Agile/Scrum methodologies**, maintained comprehensive application design and configuration documentation in **Confluence**, provided accurate task timelines and estimates, and participated in on-call rotation responding to production emergencies with **15-minute MTTR averages**.

SKILLS

Back-End & API Development – Java, Spring Boot, Python, REST API design and implementation, RESTful architecture, API performance optimization.

Front-End Development – React, Angular, HTML, CSS, JavaScript, TypeScript, UI/UX design principles, responsive web design.

Databases & Data Management – PostgreSQL, MySQL, Oracle, relational database design, data modeling, schema optimization, data integrity, NoSQL concepts.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, CI/CD pipelines, Jenkins, Git, automated deployment, Terraform, infrastructure automation.

Monitoring & Incident Management – Splunk, Dynatrace, CloudWatch, SLA management, production support, on-call rotation, P1/P2 incident response.

Methodologies & Tools – Agile, Scrum, SAFe, Jira, Confluence, documentation, change-control management, Linux, shell scripting.

Business Intelligence & Analytics – Power BI, Tableau, DAX, data visualization, data warehousing, business dashboards, statistical analysis, Python data stack (pandas, NumPy, scikit-learn).

EDUCATION AND TRAINING

PROJECTS

Full-Stack Payment Services Platform (HCL Technologies)

- Designed and implemented a **scalable full-stack payment-operations application** featuring **Spring Boot microservices** exposing **RESTful API endpoints** for transaction processing, settlement workflows, and payment-message routing; supported **10,000+ requests per minute** with **sub-150ms response times** using optimized **PostgreSQL** and **Redis** caching layers.
- Developed responsive front-end dashboard using **React** with **TypeScript**, **Material-UI**, and **CSS Grid** layouts implementing **UI/UX best practices** for payment-operations staff; enabled real-time transaction visibility and SLA monitoring, reducing manual reconciliation overhead by **70%**.
- Engineered automated **CI/CD pipelines** in **Jenkins** with **Docker containerization**, deployed on **AWS ECS** clusters across multiple availability zones, and implemented blue-green deployment strategies enabling **zero-downtime releases** with automated rollback capabilities.
- Established comprehensive operational monitoring using **Splunk** and **CloudWatch**, created automated alerting rules for SLA violations and anomaly detection, and reduced **mean time to resolution (MTTR) from 2 hours to 20 minutes** through proactive incident detection and runbook automation.
- Created complete **application design documentation** in **Confluence** covering API specifications, data models, deployment architecture, and operational procedures; facilitated knowledge transfer across teams and reduced onboarding time for new engineers by **5 days**.

SWIFT Payments Dashboard & ISO 20022 Migration System (HCL Technologies)

- Built production-grade **SWIFT messaging dashboard** supporting MT/MX message formats and ISO 20022 payment flows, integrating with banking-client ERP systems via **REST API endpoints** and **Oracle database** queries; tracked **500K+ daily payment transactions** with real-time operational visibility and regulatory audit-trail compliance.
- Implemented cross-system data synchronization workflows using **Python ETL scripts** and scheduled **cron jobs** on **Linux** infrastructure, ensuring SEPA, instant payments, and cross-border payment reconciliation across **3 interconnected enterprise platforms** with **99.97% data accuracy**.
- Collaborated with banking-domain business analysts and regulatory teams to define GDPR-compliant data retention policies, PSD2 Open Banking integration requirements, and change-control procedures; facilitated UAT cycles and post-go-live support achieving **zero critical defects** at production launch.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
