PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Analyzed requirements and design documentation for regulated financial services platforms; created comprehensive test scenarios and test cases aligned with ISO 20022 message flows, SEPA payment processing, and multi-jurisdictional compliance rules, reducing defect escape rate by **18%** and accelerating UAT sign-off by **2 weeks**.
- Executed end-to-end testing workflows within production-grade financial services environments using **Jira** for defect tracking and **SharePoint** for documentation; performed smoke testing of multi-tier deployments (Angular portal, REST API layer, .NET back-end services, SQL Server databases) on **Windows Server / IIS** infrastructure, validating **40+ test cases** per release cycle with **zero production incidents**.
- Designed and executed regulatory and compliance testing frameworks against wealth management and investment services platforms serving multiple client segments; verified GDPR data-protection controls, audit-trail integrity, and cross-border payment compliance across **8 regulated jurisdictions**, achieving **100% compliance sign-off** pre-launch.
- Collaborated with Delivery teams to decompose test-execution requirements; performed defect triage and re-testing of resolved defects across **Java Spring Boot** REST APIs and **.NET** microservices using **Postman** and **REST Assured** API testing frameworks, validating **payload integrity** and **SLA adherence** with **95%+ first-pass fix rate**.
- Supported client queries and environment fit-for-purpose verification using **SQL** (PostgreSQL, MySQL, Oracle) for data validation, schema inspection, and reconciliation workflows; leveraged **MS Excel** formulae for test-data preparation and defect trend analysis, reducing environment setup time by **30%**.
- Championed adoption of test automation and AI-assisted testing tooling; contributed to automated test suite maintenance using **Selenium** and **Playwright** frameworks, integrated AI-powered test case generation and defect triage tools, and documented testing best practices in **SharePoint**, enabling **25% faster regression cycles** across **12-person QA team**.

SKILLS

QA & Testing Methodologies – test case design, smoke testing, defect management, test automation, regulatory compliance testing, UAT coordination, defect triage, re-testing, AI-assisted testing tooling.

Testing Frameworks & Tools – Postman, REST Assured, Selenium, Playwright, Jira, SharePoint, MS Excel, defect management systems.

Financial Services & Compliance – ISO 20022 message flows, SEPA payments, cross-border payment processing, SWIFT MT/MX standards, PSD2, GDPR, multi-jurisdictional regulatory requirements, audit-trail validation, wealth management, investment services.

API & Integration Testing – REST API testing, .NET RESTful services, payload validation, API contract verification, microservices testing.

Database & Data Validation – SQL, PostgreSQL, MySQL, Oracle, schema inspection, data integrity checks, reconciliation workflows.

Technology Stack – .NET, Java Spring Boot, Angular, Windows Server, IIS, SQL Server, REST APIs.

Domain Expertise – financial services, regulated environments, multi-client-segment platforms, wealth management systems, payments operations.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Regulated Multi-Jurisdictional Wealth Management Testing Platform (HCL Technologies)

- Designed and executed comprehensive test strategy for a **Java Spring Boot + Angular** wealth management platform serving **8 regulated jurisdictions** with distinct compliance regimes; created **120+ test scenarios** covering ISO 20022 cross-border payment flows, SEPA instant-payment settlement, and PSD2 Strong Customer Authentication (SCA) workflows.
- Implemented **Postman** and **REST Assured** API test suites against **.NET microservices** layer validating payload structures, error handling, and SLA latency (< **500ms** for transaction queries); automated smoke testing of multi-tier **Windows Server / IIS / SQL Server** deployments, reducing manual environment verification from **4 hours to 45 minutes** per release.
- Conducted regulatory compliance and audit-trail testing across **GDPR**, **FCA**, and local payment-scheme requirements; authored **45+ regulatory test cases** validating data-protection controls, cross-border transaction logging, and client-segment data segregation; achieved **100% compliance certification** and **zero post-launch regulatory findings**.
- Managed defect lifecycle using **Jira** across **35+ defects** spanning API contract violations, database reconciliation failures, and UI-layer regulatory messaging; performed root-cause analysis and collaborated with Development teams on critical-path fixes, maintaining **96% first-pass resolution rate** and reducing defect re-open rate by **22%**.
- Piloted AI-assisted test case generation and defect-triage tooling; automated regression test suite maintenance in **Selenium**, reducing manual test execution overhead by **28%** and enabling continuous validation across **4 environment tiers** (dev, sit, uat, pre-prod).

SWIFT Payments Operations Dashboard – Compliance & Smoke Testing Initiative (HCL Technologies)

- Performed comprehensive smoke testing and UAT support for SWIFT MT/MX messaging dashboard serving a Tier-1 banking client; validated message-flow visibility, transaction-status reporting, and operational alerting across **SEPA cross-border payment corridors**, confirming SLA compliance and regulatory audit-trail integrity.
- Collaborated with banking-domain Business Analysts and operations teams to decompose requirements for payment-message reconciliation workflows; created **60+ test cases** validating ISO 20022 payment-instruction parsing, transaction-status synchronization, and exception-handling logic, reducing UAT defect density by **31%**.
- Executed environment validation and fit-for-purpose testing using **SQL** queries (PostgreSQL, Oracle) for transaction reconciliation and data-integrity checks; raised and tracked **12 production-critical defects** via **Jira**, collaborated with Delivery teams on fixes, and confirmed resolution through targeted re-testing.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)

- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
