PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and maintained **CI/CD pipelines** using **Jenkins**, **Git**, and **Azure DevOps** for enterprise Java/Spring Boot and Python microservices, reducing deployment time by **40%** and enabling **50+ weekly releases** across production banking infrastructure.
- Built and operationalized **Infrastructure as Code** templates using **Terraform** and **Azure** services (compute, networking, storage) to provision cloud environments, achieving **99.8% uptime** across **12 production instances** with automated compliance scanning and **zero-touch environment parity**.
- Deployed and managed **Kubernetes**-based application workflows with **Helm** charts and **GitOps** principles, orchestrating containerized **Docker** services and supporting blue-green deployments that reduced rollback incidents by **85%** and cut mean-time-to-recovery to **8 minutes**.
- Implemented secure delivery practices including **SSO integration**, role-based access control, and **artifact repository management** via **JFrog Artifactory**, enforcing container image scanning and dependency vulnerability checks across **200+ monthly deployments** with zero security incidents.
- Troubleshoot and resolved build, **pipeline**, and **environment issues** across interconnected cloud systems, leveraging **Azure Portal** diagnostics, **CloudWatch** logs, and **Git** branching analysis to identify root causes and reduce incident resolution time by **35%**.
- Collaborated with software engineers, cloud architects, and security partners to establish operational runbooks, CI/CD best practices, and infrastructure standards; contributed **30+ documentation assets** (Confluence) and participated in agile ceremonies (sprint planning, retrospectives) for platform modernization roadmap alignment.

SKILLS

CI/CD & Build Automation – Jenkins, Azure DevOps, GitHub, TeamCity, Git, JFrog Artifactory, pipeline design, build orchestration, deployment automation.

Infrastructure as Code & Cloud – Terraform, Microsoft Azure, Azure Portal, EC2, S3, Lambda, CloudWatch, infrastructure provisioning, environment automation, Infrastructure as Code.

Kubernetes & Containerization – Kubernetes, Helm, Docker, container workflows, GitOps, blue-green deployments, Helm charts.

Secure Delivery & Access Management – SSO, role-based access control, security scanning, artifact repositories, container image scanning, vulnerability management.

Programming & Scripting – Python, Java, Spring Boot, SQL, PostgreSQL, MySQL, Oracle, shell scripting, Linux, REST APIs.

Monitoring, Observability & Documentation – Splunk, Dynatrace, CloudWatch, runbook development, operational documentation, troubleshooting.

Agile & Collaboration – Jira, Confluence, agile ceremonies, cross-functional collaboration, change-control management.

EDUCATION AND TRAINING

PROJECTS

Multi-Region Kubernetes GitOps Platform with Secure Delivery & Blue-Green Automation (HCL Technologies)

- Architected and deployed a **Kubernetes-based GitOps platform** across **3 Azure regions** (US, EU, APAC) using **Terraform Infrastructure as Code**, **Helm**, and **GitHub** as the single source of truth, enabling **100+ microservices** to deploy declaratively with **zero-downtime rollouts**.
- Designed a **CI/CD pipeline** using **Azure DevOps** and **Jenkins** that orchestrated **Docker** container builds, automated **JFrog Artifactory** artifact publication, and executed **Kubernetes** deployments via GitOps reconciliation, cutting deployment time from **2 hours to 12 minutes** and reducing human error by **92%**.
- Implemented **blue-green deployment strategy** with **Helm** traffic routing and **Azure Load Balancer** integration, enabling **instant rollback capability** and reducing mean-time-to-recovery from **45 minutes to 3 minutes**; achieved **99.95% uptime** across **6-month production run**.
- Integrated **secure delivery practices** including **SSO authentication** via Azure AD, **role-based access control** (RBAC) for cluster operations, container image vulnerability scanning, and artifact signing; prevented **12 critical supply-chain security risks** before deployment.
- Developed comprehensive operational runbooks and **infrastructure documentation** in **Confluence**, detailing troubleshooting procedures, **Kubernetes** node recovery, **Terraform state** management, and disaster recovery; reduced oncall escalation time by **40%**.

Enterprise CI/CD Automation & Pipeline Modernization for Banking Payments Infrastructure (HCL Technologies)

- Modernized legacy payment-operations infrastructure by building **5 enterprise-grade CI/CD pipelines** in **Jenkins** supporting Java/Spring Boot REST APIs and Python data services, enabling **daily deployments** where previously releases occurred **quarterly**, reducing payment-processing latency by **28%**.
- Engineered **Infrastructure as Code** templates in **Terraform** for **AWS** (EC2, RDS, S3) and **Azure** environments, automating database schema migrations, securing secrets management, and enforcing compliance tagging across **18 production instances** supporting **\$2.1B annual transaction volume**.
- Implemented **Docker containerization** strategy for monolithic payment-services application, reducing image size by **65%** and enabling **Kubernetes-ready** deployments; collaborated with security partners to embed **vulnerability scanning** into the **artifact repository** pipeline, eliminating **100% of unscanned images**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
