PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Engineered and maintained **Java Spring Boot** microservices and **REST APIs** handling payment transaction flows, achieving **99.8% uptime** through proactive **production monitoring** using **Splunk, CloudWatch, and Dynatrace**; implemented **SLA management** and **P1/P2 incident response** protocols reducing mean-time-to-resolution by **35%**.
- Designed and deployed **Python automation scripts** and **data pipelines** for financial transaction reconciliation and **ETL processes**, processing **2M+ daily payment records** across **PostgreSQL, MySQL, and Oracle** databases; built **scheduled reporting** systems for regulatory compliance and audit-trail validation.
- Architected **AWS cloud infrastructure** deployments leveraging **EC2, S3, Lambda, and CloudWatch**; containerized enterprise applications using **Docker** and orchestrated **CI/CD pipelines** via **Jenkins** with **Git** version control, reducing deployment cycles by **40%** and enabling **20+ releases monthly**.
- Led production support for **SWIFT messaging (MT/MX) payments-operations dashboard**, ensuring real-time transaction-flow visibility and operational alerting; implemented **ISO 20022 message flows, SEPA instant payments**, and **cross-border payment processing** with full **GDPR compliance** and regulatory audit-trail enforcement.
- Executed **ERP system integration** and **change-control management** across interconnected enterprise business systems, coordinating **UAT testing** and post-go-live support with cross-functional banking operations teams; managed schema changes and data validation for **PSD2 / Open Banking API** enablement across **8+ system modules**.
- Developed **business intelligence dashboards** and **Power BI** reports with **DAX measures** and **data modelling** for financial-services stakeholders; applied **statistical analysis** and **Python data stack (pandas, NumPy, scikit-learn)** to produce actionable insights on payment performance, SLA compliance, and operational KPIs.

SKILLS

Backend & API Development – Java, Spring Boot, REST APIs, FastAPI, Flask, microservices architecture.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, CI/CD pipelines, Git, Linux, shell scripting.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, SQL, ETL pipelines, data warehousing, data modelling.

Production Support & Monitoring – Splunk, Dynatrace, CloudWatch, SLA management, incident response, application reliability.

Payments & Financial Services – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, cross-border payments, PSD2, Open Banking, payments processing, transaction reconciliation.

Business Intelligence & Analytics – Power BI, Tableau, DAX, Power Query, R, Python (pandas, NumPy, scikit-learn), statistical analysis, data visualisation.

Enterprise Systems & Integration – ERP systems, change-control management, UAT coordination, cross-system REST API integrations, GDPR compliance, regulatory audit trails.

EDUCATION AND TRAINING

PROJECTS

Real-Time Payments Transaction Router & Reconciliation Engine (HCL Technologies)

- Architected a **Java Spring Boot microservice** handling **ISO 20022 / SWIFT message routing** and **cross-border payment orchestration** across **SEPA, instant payments, and international corridors**; integrated with **AWS Lambda** for serverless message validation, reducing processing latency by **45%** and increasing throughput to **10K+ transactions/second**.
- Built **Python ETL pipelines** with **pandas and NumPy** for automated reconciliation of payment records across **PostgreSQL and Oracle databases**; implemented daily **scheduled reporting** jobs that identified **99.2% of discrepancies** within **15 minutes** of settlement, ensuring **regulatory compliance** and **audit-trail integrity**.
- Deployed **Docker containerized** payment-operations dashboard with **Power BI backends** and **real-time Splunk monitoring**; achieved **99.95% uptime SLA** through proactive **CloudWatch alerting** and **incident response automation**, supporting **€2B+ daily payment volume** for Tier-1 banking clients.
- Implemented **PSD2 / Open Banking API gateway** using **REST API design patterns** and **OAuth 2.0 tokenization**; coordinated **UAT testing** with banking stakeholders and regulatory teams, achieving **zero critical defects** at go-live and enabling **15 new payment partners** within **Q1**.
- Orchestrated **CI/CD pipeline** via **Jenkins and Git** for **20+ monthly releases** with automated **schema migration** and database rollback capabilities; embedded **GDPR compliance checks** into deployment gates, reducing compliance violations by **100%** and audit remediation time by **8 weeks annually**.

Enterprise Banking ERP Change-Control & Integration Hub (HCL Technologies)

- Led **change-control management** framework for **ERP system integrations** across core banking modules (payments, settlement, reconciliation); coordinated **UAT testing** with business operations teams and validated **cross-system data flows** via **REST APIs** and database-level synchronization, ensuring **zero post-go-live incidents** across **8 interconnected systems**.
- Developed **Python automation scripts** for bulk **data validation** and **ETL transformation** during system cutover events; reduced manual reconciliation effort by **65%** and improved data accuracy to **99.98%**, enabling **12-hour cutover windows** instead of **48+ hours**.
- Built **Tableau dashboards** and **Power BI reports** for ERP change tracking, UAT metrics, and post-implementation KPIs; delivered **real-time visibility** on system health, data integrity, and regulatory compliance status to **40+ business stakeholders**, reducing escalation time by **30%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
