PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Evaluated and tracked special situations including mergers, acquisitions, and corporate actions by synthesizing breaking news, regulatory filings, and market data using **Python** (pandas, NumPy) and **SQL** to identify event-driven trading opportunities; delivered real-time analytical opinions to trading desks on 50+ corporate events, directly influencing trade execution decisions.
- Analysed upcoming events and equity valuations using **fundamental company research** methodologies combined with quantitative analysis in **R** and **Python scikit-learn**; built predictive models for event-outcome scenarios with **70% accuracy** in forecasting stock-price impact post-announcement.
- Provided real-time opinions on breaking news and market developments by monitoring **Splunk** and **Dynatrace** dashboards for anomalous trading patterns, regulatory announcements, and derivative product signals; collaborated with senior analysts and traders to synthesise findings into actionable investment ideas within **15 minutes** of event detection.
- Collaborated with traders on investment ideas and derivative products strategy by leveraging hands-on exposure to **options pricing models**, **Greeks analysis**, and **volatility surface dynamics**; participated in cross-functional strategy sessions to evaluate risk-reward profiles on 200+ option positions per trading cycle.
- Performed stock valuation analysis using **fundamental research frameworks**, financial modelling in **Power BI** and **Excel**, and **statistical hypothesis testing** in **R**; built interactive **Power BI dashboards** tracking enterprise metrics, earnings forecasts, and peer-relative valuations for 100+ equities under coverage.
- Managed multiple analytical tasks in a fast-paced trading environment by prioritizing event-driven research workflows, incident-response protocols, and real-time monitoring across **AWS CloudWatch**, **Jenkins CI/CD pipelines**, and **Git version control**; demonstrated ability to context-switch rapidly while maintaining accuracy under pressure, supporting trading desk SLAs with **99.2% uptime** on research-infrastructure systems.

SKILLS

Quantitative Research & Analysis – event-driven analysis, special situations evaluation, corporate actions tracking, mergers and acquisitions analysis, fundamental company research, stock valuation, equity research.

Financial Modelling & Derivatives – options pricing models, Greeks analysis (delta, gamma, vega, theta), volatility surfaces, derivative products, risk-reward analysis, financial forecasting.

Programming & Data Analysis – Python (pandas, NumPy, scikit-learn), R, SQL (PostgreSQL, MySQL, Oracle), statistical analysis, hypothesis testing, regression analysis, exploratory data analysis.

Business Intelligence & Reporting – Power BI (dashboards, DAX measures, data modelling), Tableau, interactive analytics, real-time dashboards, business metrics tracking.

Trading Infrastructure & Monitoring – Splunk, Dynatrace, AWS CloudWatch, real-time monitoring, incident response, application reliability, SLA management, trading-desk systems.

Development & Collaboration – Git, Jenkins, CI/CD pipelines, Jira, Agile/Scrum, cross-functional collaboration, documentation, written and analytical communication.

Domain Knowledge – equity markets, options markets, trading environments, financial markets, corporate event analysis, regulatory filings, market data interpretation.

EDUCATION AND TRAINING

PROJECTS

Event-Driven Opportunity Discovery & Real-Time Analytics Platform (HCL Technologies)

- Architected an end-to-end **event-driven research pipeline** ingesting breaking news, corporate filings, and market signals via **Python** (pandas, NumPy) ETL scripts and **SQL** data aggregation across **PostgreSQL** warehouse; processed 500+ daily events with **95% classification accuracy** for merger/acquisition, earnings, and regulatory triggers.
- Built a real-time **Power BI dashboard** consolidating upcoming events, stock valuations, and derivative-product signals; used **DAX measures** to compute event-impact probability scores and options Greeks across 150+ equities in coverage, enabling traders to identify **12+ high-confidence trade ideas weekly** with **68% win rate**.
- Developed **Python scikit-learn regression models** forecasting stock-price movements post-event using historical corporate-action data, sector momentum, and volatility metrics; achieved **0.74 R² accuracy** and reduced false-positive event alerts by **40%**, saving 3+ analyst hours daily on noise filtering.
- Deployed **AWS Lambda** functions triggered on news-feed updates to auto-generate fundamental valuation snapshots and email real-time alerts to trading desk within **2 minutes** of event detection; containerised pipeline in **Docker** and automated deployment via **Jenkins CI/CD**, reducing manual alert latency from 15 minutes to **120 seconds**.
- Collaborated with traders and senior analysts to validate model outputs and refine event-classification heuristics; documented trading-strategy frameworks and onboarded 8 new analysts on platform usage through Confluence wikis and live training sessions.

SWIFT Payments & Derivative Settlement Real-Time Monitoring Dashboard (HCL Technologies)

- Designed and deployed a real-time **Splunk/Dynatrace** monitoring dashboard tracking **SWIFT MT/MX message flows**, settlement status, and regulatory compliance for a global banking client; monitored 2,000+ daily payment transactions with **99.7% visibility** across cross-border, SEPA, and instant-payment corridors.
- Implemented **SQL queries** (Oracle, PostgreSQL) to reconcile transaction flows and validate **ISO 20022 message structure** compliance; reduced settlement exceptions by **35%** and audit-trail discrepancies by **22%** through automated data-quality checks and UAT-supported change-control procedures.
- Collaborated with banking-domain business analysts, operations teams, and regulatory stakeholders to translate PSD2, GDPR, and payment-processing requirements into dashboard KPIs and alerting rules; delivered monthly compliance reports demonstrating **100% adherence** to regulatory SLAs across all payment corridors.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
