PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed matching and settlement of OTC, client and exchange trades across equities, bonds, and ETFs using **trade reconciliation platforms** and **direct market access (DMA) provider integrations**; coordinated with prime brokers and execution brokers to maintain **99.2% settlement rate** and resolve failed trades within **24 hours**.
- Monitored and analyzed **buy-in notices**, **interest claims**, and **settlement fines** from exchanges, clients, and DMA providers; performed root-cause investigation and authored monthly management reports on trading volume, buy-in impact, and PnL exposure to drive **18% reduction** in settlement costs.
- Directed position management across multi-listed securities by analyzing **long/short positions** and instructing **security reregistration** to cover short exposure; liaised with trading desks, securities lending, and corporate actions teams to ensure prompt settlement and proactive communication on critical trades.
- Built **Python-based settlement reconciliation and reporting workflows** using **SQL queries** against enterprise databases to automate daily monitoring of trade status, match rates, and client service metrics; reduced manual reconciliation time by **35%** and eliminated **12+ weekly manual reports**.
- Developed proficiency in **European settlements**, **DTC settlement procedures**, and **SSI (Static Settlement Instructions)** across SEPA and cross-border payment flows; managed change-control workflows and UAT coordination for settlement system upgrades affecting **500+ daily transactions**.
- Collaborated with trading desks, sales traders, and inter-company departments (Technology, Trade Support) to identify process improvement and automation opportunities; delivered **4 strategic efficiency initiatives** that enhanced operational resilience and reduced settlement risk in a fast-paced, client-focused environment.

SKILLS

Settlements & Trading Operations – trade matching, OTC settlement, exchange trade settlement, client settlement services, buy-in management, settlement fails, position management, security reregistration, interest claims analysis, fine reconciliation.

Settlements Platforms & Standards – DTC settlement procedures, European settlements, SEPA, cross-border payments, SSI (Static Settlement Instructions), ISO 20022, direct market access (DMA) provider management, prime broker management.

Data & Reporting – SQL (PostgreSQL, MySQL, Oracle), Python (pandas, NumPy), trade reconciliation, management reporting, analytics, monthly PnL reporting, trading volume analysis, settlement metrics.

Financial Markets & Products – equities, bonds, ETFs, OTC derivatives, exchange-traded products, client portfolio management, regulatory and economic impact analysis.

Client & Stakeholder Management – client relationship management, cross-functional collaboration, prime broker liaison, execution broker management, trader communication, UAT coordination, change management.

Tools & Systems – Microsoft Excel (advanced), Git, Jira, Confluence, Linux, trade support platforms, enterprise business systems integration.

Professional Attributes – attention to detail, problem-solving under pressure, multi-tasking, time-critical decision-making, financial markets acumen, organizational excellence.

EDUCATION AND TRAINING

PROJECTS

European Settlements Operations Platform – Settlement Fail Prevention & Reconciliation Automation (HCL Technologies)

- Architected and deployed a **Python + SQL-based settlement reconciliation system** that automated daily matching of OTC, client, and exchange trades across equities, bonds, and ETF positions; integrated with **prime broker and DMA provider APIs** to capture real-time buy-in notices and settlement fines, reducing manual intervention by **40%**.
- Built **settlement fail alert dashboard** using **Python pandas workflows** and **SQL stored procedures** to identify at-risk trades **48 hours** before settlement deadline; prioritized critical trades by client impact and instructed **proactive security reregistration** logic, preventing **€2.3M in buy-in costs** annually.
- Designed monthly management reporting suite aggregating trading volume, interest claims, buy-in notices, and PnL impact across 12 European settlement corridors; delivered **15-minute automated report generation** (vs. **8 hours manual**) and surfaced cost-reduction recommendations that lowered settlement expenses by **22%** year-on-year.
- Collaborated with trading desks and securities lending teams to map SSI requirements and European settlement procedures (SEPA, cross-border flows); documented configuration changes and trained **35+ traders and operations staff** on new settlement workflows, achieving **99.2% first-time settlement rate** within **3 months** of go-live.
- Implemented **automated DMA provider settlement instruction validation** using **Python regex and SQL data quality checks** to catch ISO 20022 compliance errors pre-settlement; eliminated **8 settlement fails per week** and improved client satisfaction scores by **26%**.

SWIFT Payments Operations Monitoring & Client Reconciliation Dashboard (HCL Technologies)

- Supported production monitoring of a **SWIFT messaging and payments-operations dashboard** used by a global banking client; managed real-time transaction-flow visibility using **Splunk and CloudWatch** to track payment status, detect anomalies, and maintain **99.8% uptime SLA**.
- Conducted daily analysis of SWIFT MT/MX message flows and reconciliation workflows; performed root-cause investigation on failed cross-border and SEPA instant payments; coordinated UAT and post-implementation triage with banking operations teams and regulatory stakeholders, ensuring compliance with **ISO 20022** and **GDPR data handling protocols**.
- Developed **Python ETL pipelines** to validate transaction reconciliation across **PostgreSQL and Oracle databases**; automated **daily reconciliation reporting** and identified **€1.8M in unmatched payments**, enabling resolution of regulatory audit findings within **SLA timelines**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
