PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and maintained **infrastructure monitoring and alerting systems** using **Splunk, CloudWatch, and Dynatrace** across virtual and physical enterprise environments, achieving **99.8% SLA uptime** through proactive anomaly detection and rapid incident response for P1/P2 production incidents.
- Automated infrastructure provisioning and operational workflows using **Python scripting, shell scripting, and cron jobs** on **Linux** systems, reducing manual operational overhead by **40%** and enabling self-service infrastructure tasks across cross-functional teams.
- Deployed and managed containerized applications using **Docker** across **AWS** environments (**EC2, S3, Lambda, CloudWatch**), implementing infrastructure-as-code principles and DevOps best practices to improve deployment velocity by **35%**.
- Established and optimized **CI/CD pipelines** using **Jenkins, Git branching, and code reviews**, automating build, test, and deployment stages to reduce release cycles by **50%** and strengthen infrastructure change-control governance.
- Troubleshoot complex infrastructure and application issues across interconnected systems by analyzing **Linux logs, database queries (PostgreSQL, MySQL, Oracle), and application performance metrics**, resolving critical system failures within **2-hour SLA** targets.
- Collaborated with engineering teams, system architects, and DevOps stakeholders to design reliability improvements and infrastructure enhancements, documenting runbooks and operational procedures in **Confluence** to enable knowledge transfer and continuous learning.

SKILLS

Infrastructure & Site Reliability Engineering – infrastructure provisioning, infrastructure monitoring, troubleshooting, automation, DevOps, SLA management, incident response, change-control management.

Operating Systems & Networking – Linux, log analysis, shell scripting, cron jobs, networking fundamentals, virtual and physical environments.

Scripting & Programming Languages – Python, shell scripting, Java, SQL, REST API development.

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker, infrastructure-as-code.

Monitoring & Observability Tools – Splunk, Dynatrace, CloudWatch, alerting, metrics collection, operational dashboards.

CI/CD & Version Control – Jenkins, Git, code review processes, deployment automation, pipeline orchestration.

Databases & Data Systems – PostgreSQL, MySQL, Oracle, SQL query optimization, schema management, data validation.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Multi-Region Infrastructure Automation & Reliability Platform (HCL Technologies)

- Architected and deployed a **Python-based infrastructure automation framework** integrated with **AWS (EC2, Lambda, CloudWatch) and Docker** to automate provisioning, scaling, and monitoring of mission-critical trading and operational systems across multiple regions, reducing infrastructure setup time by **65%**.
- Implemented comprehensive **monitoring and alerting infrastructure** using **Splunk and Dynatrace** with custom dashboards and anomaly detection models, enabling real-time visibility into system health and reducing mean-time-to-detection (MTTD) by **70%** for production incidents.
- Designed and automated **CI/CD pipelines using Jenkins** with **Git workflow integration and containerized deployment strategies**, enabling **20+ daily deployments** with zero-downtime releases and reducing deployment failures by **55%**.
- Established **infrastructure runbooks and operational documentation** in **Confluence**, reducing onboarding time for new engineers by **50%** and standardizing troubleshooting procedures across **15+ systems**.
- Collaborated with infrastructure architects and trading-systems teams to identify and remediate **Linux kernel tuning, database query optimization (PostgreSQL/Oracle), and network configuration bottlenecks**, achieving **99.8% uptime SLA** and reducing infrastructure-induced latency by **30%**.

SWIFT Payments Operations Monitoring & Incident Management Dashboard (HCL Technologies)

- Supported and monitored a **SWIFT messaging payments-operations dashboard** handling **ISO 20022 message flows** and **SEPA cross-border payment processing**, maintaining **99.95% transaction visibility SLA** and enabling sub-second incident detection for regulatory compliance.
- Implemented **Splunk and CloudWatch-based operational alerting** integrated with payment message workflows to detect and escalate P1 incidents, reducing incident response time from **15 minutes to 3 minutes** and preventing payment processing delays.
- Coordinated change-control management and UAT support across banking-domain business systems, ensuring **zero compliance violations** during infrastructure updates and leveraging **Jira and Confluence** for cross-functional communication with banking operations teams and regulatory stakeholders.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
