PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **software applications support and issue troubleshooting** for enterprise Java Spring Boot and .NET services at HCL, resolving **P1/P2 production incidents** with **99.5% SLA attainment** through root-cause analysis, log review using **Splunk, CloudWatch, and Dynatrace**, and coordinated remediation with development teams.
- Managed **application administration and configuration** across **PostgreSQL, MySQL, and Oracle** databases, performing schema changes, data validation, and performance tuning; supported **change-control management** for system updates and configuration rollouts with full UAT coordination and post-go-live testing across interconnected enterprise systems.
- Collaborated with **suppliers and third-party vendors** on troubleshooting complex application issues, reviewing technical solutions, validating patches, and coordinating testing cycles; documented resolutions in **Jira and Confluence** to build institutional knowledge and accelerate future issue resolution by **40%**.
- Designed and executed **application testing protocols** including regression testing, user acceptance testing (UAT), and smoke testing for feature releases and bug fixes; created **test cases and validation scripts** to verify application behavior across **AWS EC2, S3, Lambda, and Docker** containerized environments, achieving **98% test coverage**.
- Engineered **Python automation scripts and shell scripting** for application monitoring, data extraction, and reporting workflows; developed **REST API integrations** between enterprise business systems using **Java Spring Boot and SQL queries** to automate routine support tasks and reduce manual effort by **35 hours monthly**.
- Provided **technical support and guidance to end users** across banking and financial-services domains, troubleshooting application errors, documenting known issues, and creating **user guides and training materials** via **Confluence**; maintained detailed **application documentation** and knowledge base articles supporting **50+ concurrent users** in production environments.

SKILLS

Applications Support & Troubleshooting – software applications support, issue troubleshooting, application administration, configuration management, incident response, SLA management, root-cause analysis, P1/P2 incident triage.

Monitoring & Observability Tools – Splunk, CloudWatch, Dynatrace, application performance monitoring, alerting, operational dashboards, log analysis.

Databases & Data Management – PostgreSQL, MySQL, Oracle, SQL query optimization, schema administration, data validation, performance tuning.

Application Technologies – Java Spring Boot, .NET, REST APIs, Docker containerization, AWS (EC2, S3, Lambda, CloudWatch), Python scripting, shell scripting, Linux.

Change Management & Testing – change-control processes, UAT coordination, regression testing, test case design, deployment validation, supplier coordination, vendor troubleshooting.

Documentation & Ticketing – Jira, Confluence, user guides, training materials, knowledge base management, technical documentation, defect tracking.

Enterprise & Business Systems – ERP support, business system integrations, CI/CD pipelines (Jenkins), Git version control, Agile/Scrum methodologies.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Enterprise Hospital Clinical Applications Support & Integration Platform (HCL Technologies)

- Architected and deployed a **centralized applications monitoring and incident management system** using **Splunk and CloudWatch** for real-time tracking of **15+ mission-critical hospital business applications**, reducing mean time to resolution (MTTR) by **45%** and enabling **99.7% uptime SLA compliance** across clinical workflow systems.
- Engineered **REST API integrations and database synchronization workflows** using **Java Spring Boot and Python ETL scripts** to connect hospital ERP modules, appointment scheduling systems, and reporting databases on **PostgreSQL and Oracle**, ensuring real-time data consistency across **12 interconnected enterprise systems** supporting **4,000+ hospital staff**.
- Implemented **change-control and configuration management processes** for application updates, conducting **UAT planning, test-case design, and regression testing** for quarterly releases; coordinated with **application vendors and third-party suppliers** on patch validation, achieving **zero critical defects in production** across **24 sequential deployments**.
- Developed **automated troubleshooting and reporting dashboards** using **Python scripting, shell scripts, and cron jobs** to proactively detect application performance degradation, memory leaks, and database query bottlenecks; generated **daily operational reports** reducing manual support ticket volume by **30%**.
- Created comprehensive **user guides, training materials, and knowledge base articles** via **Confluence and Jira** documenting application workflows, error resolutions, and best practices; trained **50+ end users** on application features, reducing support request frequency by **25%**.

SWIFT Payments Operations Dashboard & Troubleshooting System (HCL Technologies)

- Delivered **production support and issue troubleshooting** for a **SWIFT messaging and payments-operations dashboard**, managing **P1/P2 incidents** affecting transaction flow visibility and operational alerting; achieved **99.8% uptime SLA** and resolved payment message errors within **2-hour SLA windows** through root-cause analysis of **SWIFT MT/MX message formats** and payment processing workflows.
- Collaborated with **banking-domain business analysts and operations teams** on troubleshooting payment failures, reviewing **ISO 20022 message structures, SEPA reconciliation flows, and cross-border payment routing logic**; coordinated **supplier escalations and vendor testing** to validate payment gateway integrations, supporting **€2B+ in daily transaction throughput**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
