PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Maintained and continuously improved configuration and effectiveness of **email security controls, endpoint security (EDR/MDR), identity and access security controls, and cloud security controls** across enterprise applications at HCL, implementing **policy improvements and preventive/detective control enhancements** based on incident learnings and threat intelligence collaboration with Cyber Engineering & Architecture teams, reducing false positives by **35%**.
- Partnered with SOC and Threat Intelligence teams to identify **tooling and control gaps**, design **configuration standards and baseline cyber standards**, and improve **detection coverage and fidelity** through **Splunk, Dynatrace, and CloudWatch** optimization, achieving **28% reduction in alert fatigue** and **99.2% control alignment** with approved security policies.
- Established baseline of **current tooling performance and controls coverage** across production enterprise systems using **Docker containerization, AWS EC2/S3/Lambda/CloudWatch, and Jenkins CI/CD pipelines**, documenting **control intent and configuration rationale** in Confluence runbooks, and identifying **15+ automation opportunities** to remove manual cyber control changes.
- Supported governance and oversight of security tooling by ensuring configurations aligned with approved standards, maintaining comprehensive documentation of **security configuration standards and operational runbooks**, and collaborating cross-functionally with IT Technology teams and Cyber Engineering & Architecture on **cyber tooling selection and control design decisions**, supporting **3 major audits** with complete evidence trails.
- Assisted in roll-out of new **cloud security controls and native security services**, coordinating **UAT, change-control management, and post-go-live support** across interconnected security platforms using **REST API integrations and database-level data flows** (PostgreSQL, Oracle, MySQL), transitioning tooling into operational support with **zero incident delay** during deployment.
- Translated threat actor techniques and recurring incident causes into tangible **cyber tooling improvements** by analyzing production logs with **Linux shell scripting, Python automation, and SQL queries**, designing and implementing **preventive and detective control improvements** that reduced response time by **40%** and strengthened cyber defences across email, endpoint, identity, network, and application security domains.

SKILLS

Cyber Security Operations – email security controls, endpoint security (EDR/MDR), identity and access security controls, cloud security controls, network security, application security tooling, threat intelligence, incident response, control gap analysis, detection coverage optimization.

Security Tooling & Platforms – Splunk, Dynatrace, CloudWatch, configuration management, policy implementation, control effectiveness measurement, alert fidelity tuning, false positive reduction.

Security Governance & Standards – configuration standards development, baseline cyber standards, security policy alignment, control intent documentation, operational runbooks, audit support, compliance evidence trails.

Cloud & Infrastructure Security – AWS (EC2, S3, Lambda, CloudWatch), Docker containerization, cloud native security services, infrastructure hardening, cloud security configuration.

Backend & Integration Technologies – Java Spring Boot, Python, SQL (PostgreSQL, Oracle, MySQL), REST APIs, Jenkins CI/CD, Git, Linux scripting, data pipelines, cross-system integrations.

Operations & Monitoring – production support, SLA management, P1/P2 incident response, change-control management, UAT coordination, post-go-live support, metrics-driven improvement.

Cross-Functional Collaboration – SOC partnering, Threat Intelligence & Hunting alignment, Cyber Engineering & Architecture design input, IT Technology operations coordination, business stakeholder engagement.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Enterprise Cyber Control Optimization & Automation Platform (HCL Technologies)

- Designed and implemented an integrated **cyber tooling configuration governance framework** spanning **email security, endpoint security (EDR/MDR hardening), identity and access controls, cloud security controls, and network security** using **Python automation, SQL data modelling, and Splunk/Dynatrace dashboards**, establishing baseline metrics for **15+ control domains** and eliminating **120+ manual cyber control change processes**.
- Built automated **threat intelligence to tooling translation pipelines** that ingested recurring incident causes and threat actor techniques, converting them into **preventive and detective control improvements** deployed via **Jenkins CI/CD with Git change tracking**, achieving **42% reduction in mean-time-to-remediation (MTTR)** and **38% improvement in detection fidelity** across all security layers.
- Developed comprehensive **security configuration standards and baseline cyber standards documentation** in Confluence with control intent rationale, architectural decisions, and operational runbooks; coordinated **3 enterprise audits** with complete evidence trails, achieving **99.7% policy compliance** across email, endpoint, cloud, and application security tooling.
- Implemented **detection coverage and alert optimization system** using **Splunk advanced searches, Dynatrace root-cause analysis, and CloudWatch metric correlation**, reducing **false positives by 35%**, eliminating **alert fatigue across SOC**, and ensuring **real-world attack technique alignment** through continuous threat intelligence partnerships.
- Led **cloud security controls and AWS native security services** roll-out across **EC2, S3, Lambda** environments with **Docker containerization governance**, managing **UAT, change-control workflows, and post-go-live support** through REST API-driven integration layers (PostgreSQL/Oracle backend), delivering **zero-incident deployment** and **99.2% uptime** within first 6 months.

SWIFT Messaging Security & Controls Integration (HCL Technologies — Banking Domain)

- Configured and optimized **email security controls and data security controls** protecting **ISO 20022 and SWIFT MT/MX messaging flows** in production payments operations environment, implementing **policy improvements** aligned with regulatory compliance (GDPR, PSD2, SEPA standards), achieving **100% audit compliance** across cross-border payment transaction channels.
- Partnered with Threat Intelligence and Cyber Engineering teams to design **detective controls for payments message anomaly detection**, reducing **false positives by 28%** on payment-fraud alerts and improving **control alignment with real-world payment-fraud techniques** through continuous incident learning and SOC feedback loops.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
