PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Coordinated live project delivery and production processes across multiple precast concrete manufacturing lines, liaising with design teams on **technical drawings, specification compliance, and quality control** to ensure adherence to engineering standards and project timelines; supported **programme delivery** through real-time progress monitoring and cross-functional collaboration with operations, site, and commercial teams.
- Prepared technical documentation, project records, and engineering reports using **Microsoft Office** and **CAD software**; managed change-control processes for design coordination and system configuration updates across interconnected operational platforms, ensuring audit trails and regulatory compliance aligned with company standards.
- Promoted and maintained **health & safety standards** across production and site activities; coordinated **quality assurance processes** and compliance verification workflows with internal quality teams and external regulatory stakeholders, demonstrating strong attention to detail and process adherence.
- Assisted with planning, coordination, and delivery of precast and construction projects by analyzing project data using **analytical and numerical methods**; generated performance dashboards and operational reports to track key metrics, timelines, and resource allocation across concurrent project schedules.
- Collaborated with cross-functional engineering teams including senior engineers, BAs, and operations staff through structured meetings, documentation reviews, and knowledge-transfer sessions; demonstrated strong **communication and interpersonal skills** in translating technical requirements into actionable project deliverables.
- Applied practical **engineering principles and construction methods** learned through structured training and mentorship; demonstrated problem-solving capability and hands-on approach in supporting production efficiency improvements and resolving quality or scheduling issues in real-time project environments.

SKILLS

Engineering & Construction – engineering principles, construction methods, precast concrete design, structural coordination, design drawing interpretation, specification compliance, technical documentation.

Project & Programme Management – project planning, coordination, delivery timelines, progress monitoring, change-control management, quality assurance processes, cross-functional collaboration.

Technical & Design Tools – Microsoft Office (Excel, Word, PowerPoint), CAD software, technical drawing coordination, design verification, engineering documentation.

Quality & Compliance – quality control processes, company standards adherence, health & safety standards, regulatory compliance, audit trails, process verification.

Analytical & Professional Skills – numerical analysis, analytical problem-solving, technical report writing, data-driven decision-making, communication, teamwork, attention to detail.

Domain Knowledge – production processes, site operations, ERP systems integration, business system coordination, operational efficiency, resource planning.

EDUCATION AND TRAINING

PROJECTS

Precast Production & Delivery Coordination Platform (HCL Technologies)

- Designed and implemented an integrated **technical documentation and project tracking system** to coordinate planning, design coordination, and live project delivery across 15+ concurrent precast concrete manufacturing schedules; centralized **engineering drawings, specifications, quality records, and change-control logs** to eliminate manual handoffs and reduce design-to-production cycle time by **18%**.
- Developed **analytical dashboards using Microsoft Office and CAD integration** to monitor project progress, resource allocation, and compliance against engineering standards; tracked **25+ key performance indicators** including production efficiency, quality metrics, and programme timeline adherence in real-time, enabling proactive identification of scheduling conflicts and specification deviations.
- Coordinated **cross-functional collaboration workflows** connecting design teams, production staff, quality assurance, and site operations through structured documentation and communication protocols; reduced internal coordination delays by **22%** and improved first-pass quality compliance to **96%** through standardized technical verification checklists.
- Managed **change-control and quality assurance processes** for design updates, production method improvements, and regulatory compliance requirements; maintained comprehensive audit trails and compliance records aligned with company standards and external stakeholder requirements, supporting zero non-conformance incidents across 40+ project deliveries.
- Provided structured mentorship and knowledge transfer to junior engineering staff by creating technical training materials, design guides, and operational procedures; improved onboarding efficiency by **35%** and reduced production errors attributed to training gaps by **28%** over 12 months.

Engineering Data & Quality Metrics Reporting System (HCL Technologies)

- Built automated **technical reporting and analytical dashboards** to consolidate project performance, quality control metrics, and production efficiency data across multiple precast manufacturing facilities; provided senior engineers and operations managers with real-time visibility into programme delivery timelines, specification compliance, and resource utilization.
- Applied **analytical and numerical skills** to analyze production processes, identify bottlenecks, and quantify quality improvements; generated monthly engineering reports with actionable insights that supported **15% improvement in production throughput** and **12% reduction in material waste** over a 9-month period.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
