PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Monitored and triaged **production incidents** across enterprise Java/.NET applications using **Splunk, CloudWatch, and Dynatrace**, responding to **P1/P2 incidents** in accordance with **SLA agreements** and escalating **critical outages** to appropriate teams; documented all troubleshooting steps, incident details, and resolution outcomes in ticketing systems achieving **95% first-response SLA compliance**.
- Supported **end-user hardware, software, and connectivity troubleshooting** in enterprise environments by resolving **common system issues, device configuration problems, and application errors**; provided users with temporary workarounds and guided them through resolution steps while maintaining detailed records in **Jira ticketing system**.
- Managed **user access requests** including account provisioning, role changes, and offboarding workflows across enterprise business systems; coordinated with cross-functional teams to ensure **timely access management** and compliance with **access control procedures** across interconnected systems.
- Performed **routine system maintenance, monitoring, and administrative tasks** on enterprise infrastructure including **Linux systems, database monitoring via PostgreSQL/MySQL/Oracle, and cloud services (AWS EC2, S3, Lambda)**; conducted **log analysis** and identified issues requiring escalation to specialized teams or vendors.
- Supported **organizational change management** across system deployments by coordinating **UAT activities, post-go-live triage, and configuration updates**; documented procedures, maintained knowledge base entries, and participated in **team projects** to improve IT service delivery across the enterprise.
- Delivered **operational dashboards and activity reports** using **Power BI and data visualization tools** to track ticket metrics, SLA performance, and incident trends; presented regular status updates to stakeholders and contributed insights for process improvement initiatives.

SKILLS

IT Support & Service Desk – incident triage and diagnosis, first-level technical support, Service Desk operations, troubleshooting escalation, SLA management, ticket documentation, knowledge base research.

Hardware & Connectivity – hardware troubleshooting, software issue resolution, device setup and configuration, printer and peripheral support, connectivity diagnostics, IT equipment management.

Access Management & Security – user access requests, account provisioning, onboarding and offboarding procedures, role change coordination, access control compliance, confidentiality and information security.

System Administration & Monitoring – Linux system administration, log analysis, shell scripting, cloud services (AWS EC2, S3, Lambda, CloudWatch), PostgreSQL, MySQL, Oracle, system maintenance and monitoring.

Ticketing & Documentation – Jira ticketing systems, Confluence knowledge management, incident documentation, activity reporting, procedure documentation, regular status updates.

Business Systems & Change Management – ERP support, enterprise system integration, change-control management, UAT coordination, post-go-live support, cross-functional collaboration.

Reporting & Business Intelligence – Power BI dashboards, operational metrics tracking, SLA performance reporting, data visualization, stakeholder communication.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Enterprise IT Service Desk Ticket Automation & SLA Tracking Dashboard (HCL Technologies)

- Designed and deployed a **Power BI operational dashboard** that consolidated **Service Desk ticket metrics, incident response times, and SLA compliance tracking** across **1,200+ monthly tickets**, enabling real-time visibility into first-response performance and escalation patterns.
- Automated **routine ticket triage and assignment workflows** using **Python scripting and scheduled reporting** to categorize incidents by severity, component, and resolution team; reduced manual ticket routing overhead by **40%** and improved average first-response time from **4 hours to 1.5 hours**.
- Implemented **knowledge base article linking and intelligent search functionality** in **Confluence** to surface common troubleshooting steps for end-user connectivity, hardware, and software issues; tracked article utilization and updated procedures based on **recurring incident patterns**, reducing escalation rate by **28%**.
- Coordinated **change-management and post-implementation support** across enterprise system upgrades by documenting step-by-step user guides, conducting **UAT coordination sessions**, and capturing post-go-live incidents; ensured **100% SLA adherence** during three major infrastructure transitions.
- Established **escalation routing procedures** to identify and flag **critical outages, security incidents, and access-related issues** for immediate attention by specialized teams; created automated alerts and dashboards to monitor **system health and user impact** in real time.

Banking Payments Operations Support & Transaction Monitoring (HCL Technologies)

- Provided **production support and incident response** for a **SWIFT messaging and payments-operations dashboard** supporting a major banking client, monitoring **payment message flows, transaction visibility, and operational alerting**; triaged **P1/P2 incidents** related to **SWIFT MT/MX message processing and ISO 20022 payment formats** with **99.8% uptime SLA achievement**.
- Collaborated with banking-domain business analysts and operations teams on **UAT support, requirements gathering, and post-implementation triage**; documented **reconciliation workflows, tokenization processes, and Open Banking/PSD2 compliance requirements** in knowledge management systems to support cross-functional troubleshooting.
- Monitored **ERP and enterprise business system integrations** supporting payments processing across **PostgreSQL, Oracle, and MySQL databases**; tracked **SEPA and cross-border payment flows** and supported system configuration updates in accordance with **GDPR, data-protection, and regulatory audit-trail requirements**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
