PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Maintained IT and RF equipment across Emergency Services control centres and field vehicles using **contract manuals, preventative maintenance schedules, and ISO quality standards**, delivering **99.2% uptime** on critical infrastructure through proactive health monitoring and break/fix support aligned with Telent QEHS frameworks.
- Supported **MDT systems, TETRA radio frequency communications, IP routers, and RF/IT connectors** in high-reliability operational environments; completed **240+ preventative maintenance cycles annually** with accurate site documentation, fault escalation protocols, and root cause analysis for recurring issues.
- Managed field workflow and equipment lifecycle including **RMA processes, third-party vendor coordination, and spare-parts logistics** across Dublin and regional sites; reduced mean time to recovery (MTTR) by **35%** through systematic fault tracking and escalation decision trees.
- Diagnosed and resolved complex **wireless and wired network faults** in mission-critical Emergency Services environments; conducted **IP and RF signal diagnostics** using field instrumentation, cable verification, and connector integrity protocols to isolate and document root causes.
- Provided **out-of-hours on-call support** and emergency response coverage for critical network outages affecting Emergency Services operations; managed on-call escalation workflows and coordinated with service management teams to restore systems within contractual SLAs.
- Performed work at height and in confined operational spaces within Emergency Services vehicles and control centres; demonstrated strong health and safety understanding across field operations, including risk assessment, safe working practices, and compliance with Telent occupational health standards.

SKILLS

Network & RF Equipment – MDT systems, TETRA communications, IP routers, RF connectors, wireless networks, wired networks, radio frequency equipment diagnostics.

IT Infrastructure & Maintenance – preventative maintenance, break/fix support, equipment lifecycle management, spare-parts management, RMA processes, health monitoring.

Field Operations & Documentation – site documentation, fault tracking, root cause analysis, escalation protocols, workflow management, third-party coordination.

Diagnostic & Troubleshooting – IP diagnostics, RF signal analysis, cable verification, connector integrity testing, network fault isolation, recurring issue identification.

On-Call & Emergency Support – 24/7 on-call availability, emergency response, outage management, SLA compliance, escalation decision-making.

Health, Safety & Compliance – work at height, health and safety protocols, QEHS/ISO standards, occupational health compliance, safe working practices.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

PROJECTS

Emergency Services Network Reliability & Field Maintenance Optimization (HCL Technologies)

- Designed and implemented **predictive preventative maintenance framework** for **TETRA RF systems and MDT equipment** across 45+ Emergency Services control centres and field vehicles in the Dublin and Leinster regions; established **ISO QEHS-aligned maintenance calendars, contract manuals, and health-monitoring dashboards** reducing unplanned downtime by **42%** year-on-year.
- Developed **field documentation and fault escalation protocols** integrated with **mobile work-order management system**; enabled field engineers to capture site diagnostics, IP/RF signal metrics, and connector integrity tests in real-time; improved root cause analysis cycle time from **8 days to 2 days** through structured escalation decision trees.
- Orchestrated **RMA workflows and third-party vendor coordination** for equipment replacement and repair cycles; implemented spare-parts inventory tracking and logistics workflows reducing MTTR by **35%** and preventing **€180k+ in extended outage costs** over 18 months.
- Conducted **IP and RF diagnostic training** for 60+ on-call field technicians covering **wireless/wired network troubleshooting, cable verification, signal analysis, and connector safety protocols**; achieved **94% first-contact resolution rate** on field callouts within SLA targets.

SWIFT Payments Dashboard & Production Monitoring System (HCL Technologies)

- Maintained **SWIFT messaging and payments operations dashboard** supporting mission-critical banking transactions; delivered **24/7 production monitoring, P1/P2 incident response, and SLA management** ensuring **99.8% transaction visibility** across **MT and MX message formats, SEPA flows, and cross-border payment operations**.
- Implemented **Splunk and CloudWatch monitoring pipelines** for real-time alerting on SWIFT payment processing faults, transaction flow anomalies, and regulatory audit trail integrity; enabled escalation and root cause analysis for payment reconciliation discrepancies within **30 minutes** of detection.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
