PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Evaluated and analyzed financial needs of corporate clients in banking and payments operations by performing comprehensive financial statement analysis and creating dynamic financial models using **Power BI**, **SQL** (PostgreSQL, Oracle, MySQL), and **Python** data pipelines; delivered 15+ client presentations with consolidated company and industry data, supporting transaction structuring and execution across interconnected enterprise systems.
- Supported transaction execution and operational efficiency by architecting **REST API integrations** and **ERP system interconnections** across multiple business systems; managed change-control processes for system configuration updates, UAT coordination, and post-go-live support; ensured regulatory compliance (GDPR, AML/ATF) and operational risk management across all production banking environments.
- Deepened client relationships and leveraged broader Bank relationships by coordinating cross-functional collaboration with product groups, industry teams, legal counsel, and external parties; developed and maintained effective client-centric marketing materials, presentations, and financial analysis supporting corporate banking strategy and revenue generation across the PUI sector.
- Identified and developed business opportunities by collecting, consolidating, and interpreting **SWIFT messaging (MT/MX)**, **ISO 20022 message flows**, **SEPA**, and cross-border payment data; applied product and capital markets knowledge (payments processing, tokenization, Open Banking/PSD2) to help clients achieve financial objectives; monitored transaction flows and operational alerting using **Splunk**, **CloudWatch**, and **Dynatrace** dashboards.
- Ensured adequacy, adherence to, and effectiveness of operational risk management and regulatory compliance controls by implementing **Jenkins CI/CD pipelines**, **Git branching** strategies, and code review processes; managed **AWS** (EC2, S3, Lambda, CloudWatch) infrastructure and **Docker** containerization; maintained audit trails and SLA compliance in high-stakes banking production environments.
- Contributed to a high-performance, inclusive work environment by fostering the team's vision, values, and business strategy; supported Directors and Associate Directors in managing client relationships through UAT coordination, post-implementation triage, and cross-functional requirements gathering; actively pursued effective and efficient operations while strictly adhering to rules, policies, procedures, and the Bank's risk appetite and risk culture.

SKILLS

Financial Analysis & Modelling – comprehensive financial statement analysis, financial modelling, client presentation development, capital markets knowledge, transaction structuring.

Corporate Banking & Payments – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, cross-border payments, Open Banking/PSD2, payments processing, tokenization, Power/Utilities/Infrastructure (PUI) sector.

Regulatory Compliance & Risk Management – GDPR, AML/ATF, operational risk management, regulatory compliance risk, conduct risk, audit trails, internal policies and procedures, Operational Risk Management Framework, Regulatory Compliance Risk Management Framework.

Data & Business Intelligence – Power BI, Tableau, DAX, Power Query, data modelling, SQL (PostgreSQL, Oracle, MySQL), Python (pandas, NumPy), data warehousing, financial reporting.

Enterprise Systems & Integration – ERP integration, REST API integrations, change-control management, UAT coordination, business system interconnections, schema changes, data consolidation.

Cloud, DevOps & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins CI/CD pipelines, Git, Splunk, Dynatrace, Linux, shell scripting.

Stakeholder Management & Business Operations – client relationship management, cross-functional collaboration, legal counsel coordination, requirements gathering, post-implementation support, business strategy alignment, operational efficiency.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
--	----------------

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021
---	----------------

PROJECTS

Corporate Banking Financial Analysis & Client Relationship Platform (HCL Technologies)

- Architected an integrated **Power BI financial analysis dashboard** consolidating SWIFT transaction data, ISO 20022 message flows, and client financial statements using **SQL** aggregation and **Python ETL pipelines**; delivered real-time visibility into 40+ corporate client portfolios across PUI sector, enabling Associates and Directors to identify business opportunities and structure transactions **3 weeks faster** than manual analysis.
- Developed **financial modelling templates** in Power BI with **DAX measures** for client presentation automation, supporting scenario analysis for cross-border payments, SEPA, and capital markets products; reduced presentation-creation time by **60%** and standardized regulatory compliance documentation (GDPR, audit trails) across all client deliverables.
- Implemented **REST API integrations** between ERP systems, Oracle/PostgreSQL databases, and AWS Lambda functions to consolidate company and industry data from external sources; established change-control processes and UAT coordination workflows, ensuring **99.5% SLA compliance** in production banking environments and enabling post-go-live support across interconnected systems.
- Designed operational dashboards using **Splunk** and **CloudWatch** for transaction-flow visibility and operational alerting; tracked P1/P2 incidents and ensured adherence to operational risk management and regulatory compliance controls; supported 8+ concurrent client relationships with **zero regulatory incidents** across AML/ATF and conduct risk frameworks.

SWIFT Messaging & Payments Operations Dashboard (HCL Technologies – Banking Domain)

- Engineered production support and monitoring systems for a payments-operations dashboard managing SWIFT messaging (MT/MX) and ISO 20022 message flows for a tier-1 banking client; leveraged **Dynatrace**, **CloudWatch**, and **Splunk** to achieve **99.9% uptime** and respond to P1/P2 incidents within SLA in a highly regulated environment.
- Developed **Python automation scripts** for ISO 20022 message reconciliation and SEPA/cross-border payment data validation; implemented SQL-based audit trail logging and GDPR compliance controls, enabling audit teams to generate regulatory reports in **2 hours** vs. **8 hours** manually.
- Collaborated with banking-domain business analysts and operations teams to enhance transaction-flow visibility, payment-message alerting, and post-implementation triage; supported change-control processes and UAT sign-off, ensuring all configurations aligned with Open Banking/PSD2 and tokenization standards across interconnected systems.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
