## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Managed **standard extracts requests and support** for outbound portfolio data interfaces, investigating and resolving **file generation and data issues** across **Spos 4x, Standard Trade, and Taxlot** formats; reduced extract error resolution time by **35%** through systematic troubleshooting and root-cause documentation.
- Configured and maintained **electronic interfaces** exchanging outbound data from enterprise applications using **SQL (PostgreSQL, MySQL, Oracle)** and **REST APIs**; ensured **99.2% uptime** for client-facing data feeds through proactive monitoring, alerting, and change-control management across interconnected systems.
- Provided **level one support** for reconciliation workflows, data instructs, and **SWIFT messaging** (MT/MX formats) to internal Operations and Client Integration teams; communicated technical issues and resolutions with clients, vendors, and counterparties, reducing query resolution time by **28%**.
- Analyzed and developed **data extraction pipelines** using **Python scripting, SQL, and ETL workflows** to support payments operations and financial data reconciliation; automated **12+ monthly reporting cycles**, eliminating manual data entry errors and improving stakeholder reporting SLAs.
- Collaborated with **Citco Technology** and internal business teams to establish data interface standards and benchmarks, translating operational requirements into technical specifications for **configuration automation** and **self-service operational tools** supporting **25+ concurrent client onboarding projects**.
- Demonstrated expertise in **client onboarding and client relationship management** for outbound reporting; documented data flows, file specifications, and operational procedures; supported **UAT coordination** and **post-implementation triage** across Asia Pacific, Europe, and North America time zones, achieving **98% first-contact resolution rate**.

## SKILLS

**Data Operations & Reporting** – Standard extracts (Spos 4x, Standard Trade, Taxlot), outbound data interfaces, file generation and validation, reconciliation workflows, data instructs, SWIFT messaging (MT/MX), ISO 20022 message flows, payments processing, SEPA.

**Database & SQL** – PostgreSQL, MySQL, Oracle, schema design, data validation, ad-hoc query development, ETL data pipelines, data warehousing.

**Programming & Scripting** – Python, SQL, shell scripting, REST APIs, system integrations, automation of data workflows.

**Business Intelligence & Analytics** – Power BI dashboards, Tableau, DAX measures, data modelling, Power Query, operational reporting, executive KPI visualization.

**Production Support & Monitoring** – SLA management, incident response, troubleshooting, change-control management, UAT coordination, client communication, cross-functional collaboration.

**Technology Stack** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins CI/CD, Git, Jira, Confluence, Linux, Splunk, Dynatrace.

**Domain Knowledge** – Financial services operations, hedge fund administration, portfolio data management, regulatory compliance (GDPR, Data Protection), cross-border payments, PSD2 awareness.

## EDUCATION AND TRAINING

## PROJECTS

### **Outbound Reporting Automation & Client Data Interface Platform (HCL Technologies)**

- Architected and deployed an automated **outbound data extraction and reporting platform** managing **Spos 4x, Standard Trade, and Taxlot** extracts for 18+ hedge fund clients, consolidating manual file-generation processes into **scheduled, self-service data pipelines** using **Python ETL, SQL, and REST API integrations**.
- Designed **configuration management framework** for electronic interfaces, enabling business teams to modify extract specifications without engineering support; reduced client-requested extract modifications from **5-day turnaround to 2-hour turnaround**, improving client satisfaction scores by **42%**.
- Implemented **real-time monitoring dashboards** in **Power BI** tracking extract success rates, data quality metrics, and SLA compliance across all outbound feeds; integrated with **CloudWatch and Splunk alerts** to detect and notify operations teams of **SWIFT messaging, reconciliation, and payment-data anomalies** within **5 minutes**.
- Led **client onboarding workflow standardization** for 12 new fund clients across Asia Pacific and Europe regions; documented data requirements, file specifications, and operational procedures; achieved **zero post-implementation data quality escalations** through comprehensive UAT coordination and cross-functional collaboration with Client Integration teams.
- Reduced extract error rates from **3.2% to 0.7%** by establishing root-cause analysis protocols and implementing automated **data validation scripts** that identified schema mismatches, missing fields, and reconciliation failures before client delivery; created self-service troubleshooting guides reducing support burden by **31%**.

### **SWIFT Payments Operations Dashboard & Reconciliation Intelligence System (HCL Technologies)**

- Developed operational monitoring dashboard for **SWIFT MT/MX messaging, ISO 20022 payment flows, and SEPA cross-border transaction tracking** supporting a tier-1 banking client; consolidated payment status data from **ERP systems, PostgreSQL data warehouses, and REST API transaction feeds** into a single **Power BI executive KPI view**.
- Automated **reconciliation workflows and payment-data validation** using **Python pandas, NumPy, and SQL stored procedures**; reduced daily reconciliation batch processing time from **90 minutes to 12 minutes**, enabling real-time settlement visibility and **regulatory audit trail compliance** for GDPR and Data Protection requirements.
- Collaborated with banking-domain Business Analysts and Operations teams to translate **PSD2 instant payment requirements and tokenization concepts** into technical data specifications; supported UAT and post-implementation triage, ensuring **100% regulatory compliance** across production environments.

## ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
