PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **SQL** and **MS SQL** query building and data management across **PostgreSQL, MySQL, Oracle** databases; created **complex reporting models** for production dashboards supporting **SLA-driven operational teams**, enabling **30% faster incident triage** through ad-hoc analysis of performance variance and KPI trending.
- Designed and maintained **Excel**-based planning tools and internal data structures with **VBA automation** for workforce forecasting; developed **Power BI** operational reporting dashboards delivering daily and weekly **call centre performance metrics** including queue performance, staffing adherence, shrinkage analysis, and agent KPIs (AHT, Resolve Rate, Transfer Rate, NPS), reducing manual reporting overhead by **40%**.
- Conducted **data analysis and reporting** within banking operations environment; built **Splunk and CloudWatch dashboards** presenting **agreed operational KPIs** with supporting commentary to senior stakeholders; analysed planning effectiveness, forecast accuracy, and process inefficiencies, improving operational forecasting precision by **25%**.
- Collaborated with **Operational Teams, Workforce Planning, and Business Systems** stakeholders to ensure system information was accurately updated, plans clearly communicated, and execution tracked; provided analytical support for WFM and Operations Administration through **Jira**-driven change-control and **UAT coordination** across interconnected systems.
- Developed **Python ETL pipelines** and **data warehousing** solutions for cross-system integration using **REST APIs** and database-level data flows; delivered bespoke data insight on historic performance, staffing metrics, and glide-path analysis to drive continuous improvement across call centres and operational service delivery.
- Applied strong **analytical and data mining** techniques using **statistical methods, hypothesis testing, and machine learning** to identify performance anomalies and forecast variances; created presentation-ready reports in **PowerPoint and Excel** tailored to different audience levels; demonstrated **commercial awareness and customer focus** through proactive identification of operational bottlenecks and cost-saving opportunities.

SKILLS

Data & Reporting – SQL, MS SQL, T-SQL, query building, data management, complex reporting models, Power BI, Tableau, DAX, data modelling, data warehousing.

Business Intelligence & Analytics – ad-hoc analysis, performance variance analysis, KPI development, data mining, statistical analysis, forecasting, A/B testing, business intelligence dashboards.

Tools & Platforms – Microsoft Excel, VBA, Power BI, Azure, Business Objects, Splunk, CloudWatch, Jira, Confluence, Git.

Data Engineering & Integration – Python, ETL pipelines, REST APIs, system integrations, PostgreSQL, MySQL, Oracle, data pipeline development.

Workforce & Operations Domain – WFM reporting, call centre analytics, agent KPIs (AHT, Resolve Rate, Transfer Rate, NPS), queue performance, staffing adherence, shrinkage analysis, glide-path metrics, operational forecasting.

Business Systems & Change Management – ERP support, system implementation, UAT coordination, change-control management, operational process improvement, cross-functional stakeholder alignment.

Microsoft Applications – Excel, PowerPoint, data presentation, reporting automation, business-focused analytics delivery.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Operational KPI Dashboard & Forecasting Analytics Platform (HCL Technologies)

- Architected and deployed a **Power BI**-based operational intelligence platform integrating **SQL** data models across **multiple call centre and WFM systems**; delivered daily and weekly reporting on queue performance, staffing adherence, shrinkage, absence analysis, early-life performance, and agent KPIs (AHT, Resolve Rate, Transfer Rate, NPS) to **senior stakeholders across 8 operational sites**.
- Built **complex reporting models** using **DAX measures and Power Query ETL** to transform raw operational data into **bespoke client-specific KPI views**; automated previously manual Excel reporting workflows, reducing report generation time by **60%** and enabling real-time performance insights.
- Conducted **ad-hoc analysis** on planning effectiveness, forecast variance, and process inefficiencies using **statistical methods and data mining techniques**; identified root causes of scheduling deviations and provided actionable recommendations, improving forecasting accuracy by **22%** and enabling **15% reduction in unplanned shrinkage**.
- Maintained and developed internal **Excel planning tools with VBA automation** for resource forecasting and schedule optimization; designed **data structures** to ensure fit-for-purpose reporting infrastructure, working closely with Workforce Planning and Operations Administration teams to keep system information accurately updated across all interconnected platforms.
- Presented tailored reporting dashboards and **PowerPoint analytics narratives** to different audience levels (operational teams, senior management, clients); demonstrated **commercial awareness** by surfacing cost-saving opportunities, efficiency gains, and performance benchmarking insights that drove **12% improvement in overall operational output**.

Banking Payments Operations Monitoring & Performance Analytics Dashboard (HCL Technologies)

- Designed and maintained a production **Splunk** and **CloudWatch**-based monitoring dashboard for SWIFT payments messaging operations; delivered **agreed operational KPIs** and performance metrics to banking operations teams, supporting **SLA management** and **P1/P2 incident response** for payment message processing flows.
- Executed **SQL queries** across **PostgreSQL and Oracle** databases to extract transaction-level performance data, reconciliation metrics, and compliance audit trails; built **data models** supporting historic performance trending and planning effectiveness analysis across cross-border SEPA and ISO 20022 payment corridors.
- Collaborated with **operational teams and business stakeholders** to define KPI requirements, present performance insights, and support post-implementation analysis; applied **analytical techniques** to identify process inefficiencies in payment routing and settlement workflows, reducing transaction processing latency by **18%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023

- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
