PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **first and second-line support for business-critical ERP systems, CAD tools, project management platforms, and financial systems** at HCL Technologies, managing software installations, troubleshooting application issues, and liaising with external vendors to resolve P1/P2 incidents within SLA, reducing mean-time-to-resolution by 35%.
- Designed and deployed **operational dashboards and reporting templates** using **Power BI, DAX, and SQL** to improve decision-making across engineering, finance, and HR workflows; created **15+ executive-grade KPI reports** enabling real-time visibility into system health, user adoption, and business process efficiency.
- Managed **system integrations across finance, HR, engineering tools, and enterprise business systems** via **REST APIs and database-level data flows** using **PostgreSQL, Oracle, and MySQL**; coordinated change-control and UAT for **12+ system upgrades and data migrations**, ensuring **zero downtime** and full compliance with company policies.
- Ensured **data protection, GDPR compliance, and IT security standards** across all software environments; supported IT audits by implementing **access controls, encryption protocols, and audit trails**; maintained compliance documentation and security controls in accordance with internal policies and regulatory frameworks.
- Delivered **end-user training on software tools, best practices, and workflows** to **80+ users across engineering and business operations teams**; produced comprehensive **technical documentation, user guides, FAQs, and onboarding materials** using Confluence, reducing support ticket volume by 28%.
- Identified and implemented **process automation and digital tool improvements** through collaboration with engineering and operations teams; developed **Python scripts for ETL pipelines, scheduled reporting, and data validation**; tested and rolled out **8+ new software features and modules** with minimal user disruption via **Jenkins CI/CD pipelines** and Git version control.

SKILLS

Software Support & Systems Administration – ERP systems support, CAD tool integration, business-critical software troubleshooting, software installations, vendor management, system performance monitoring, backups, compliance.

Programming & Development – Python, Java, Spring Boot, C#, REST APIs, web technologies, JavaScript, React, ASP.NET, Django, Flask, FastAPI.

Data & Business Intelligence – Power BI, Tableau, DAX measures, Power Query, SQL, data modelling, data warehousing, ETL, PostgreSQL, MySQL, Oracle, reporting dashboards.

Systems Integration & DevOps – CI/CD pipelines, Jenkins, Git, Docker, AWS (EC2, S3, Lambda, CloudWatch), system upgrades, data migrations, change-control management.

Security & Compliance – GDPR compliance, IT security standards, data protection, access controls, encryption, audit trails, IT audit support.

Process Improvement & Training – workflow analysis, process automation, end-user training, technical documentation, user guides, FAQs, agile methodologies.

Enterprise & Domain Knowledge – ERP integration, enterprise business systems, manufacturing/industrial workflows, cross-functional team collaboration.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Engineering Data Interoperability & CAD-Integrated ERP System (HCL Technologies)

- Architected and deployed a **CAD software integration layer** connecting **PTC Creo design files to ERP financial and project management systems** using **REST APIs, Python ETL pipelines, and SQL data models**; automated synchronization of **3D model metadata, design-to-manufacture workflows, and bill-of-materials updates** across disconnected platforms, eliminating **8 hours/week of manual data re-entry**.
- Built operational **Power BI dashboards and reporting templates** to surface real-time CAD asset inventory, engineering change orders, and procurement data; implemented **DAX measures for design cycle time, cost variance, and resource utilization** analytics; enabled engineering leadership to track **12+ KPIs with 99.2% data accuracy**.
- Established **change-control and UAT governance workflows** for bi-weekly CAD tool and ERP module upgrades; coordinated with engineering teams and external vendors to test new features, validate data migrations, and rollout **6 major system releases with zero production downtime**; maintained comprehensive **technical documentation and user runbooks** reducing support escalations by **32%**.
- Implemented **GDPR compliance, ISO 9001 audit controls, and data protection protocols** across CAD and ERP systems, including access-role enforcement, encryption at rest, and audit trail logging; passed **3 internal IT security audits** with zero control gaps.
- Delivered hands-on training to **65+ design engineers, project managers, and finance staff** on new CAD workflows, ERP procurement modules, and data governance practices; created **15-piece FAQ and video training library**, reducing helpdesk tickets by **26%**.

Enterprise Business System Monitoring & Operational Alerting Platform (HCL Technologies)

- Developed **production monitoring dashboards** for mission-critical ERP and financial systems using **CloudWatch, Splunk, and Dynatrace**; configured **SLA-aligned alerting thresholds, automated incident escalation, and performance metrics collection** across **18 business-critical applications**; achieved **99.8% system uptime** and reduced P1 incident response time by **42%**.
- Engineered **Python automation scripts** for system health checks, log analysis, and data validation; integrated alerts with **Jira ticketing and Confluence runbooks** to enable rapid incident triage and post-mortem analysis; processed **2.5M+ log events/week** with **99.5% accuracy**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
