PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **least privilege access policies** and **role-based access control (RBAC)** frameworks across enterprise Java and .NET applications in **AWS** and cloud environments, reducing unauthorized access incidents by **40%** and enforcing identity governance standards for **500+** application users.
- Implemented **Infrastructure as Code (IaC)** using **Terraform** to provision and manage **Azure** and **AWS** cloud resources; automated **CI/CD pipelines** via **Jenkins** and **Git** for repeatable, auditable deployments, reducing infrastructure provisioning time by **65%** and enabling **20+** monthly release cycles.
- Established **cloud IAM compliance** guardrails and regulatory frameworks to enforce **GDPR**, audit trails, and data protection controls across interconnected enterprise systems; conducted periodic **access reviews** and monitored user activity logs using **Azure operations suite** (CloudWatch, Dynatrace) to maintain **99.95%** system health and **100%** regulatory compliance.
- Led **cloud migration and modernization initiatives** from on-premises ERP and enterprise business systems to **Azure** and **AWS**, managing change-control workflows and coordinating **UAT** across development and infrastructure teams; documented best practices for cloud security, reliability, and scalability in enterprise environments serving **10+** mission-critical applications.
- Developed and maintained **disaster recovery** and **data backup strategies** using **Azure** services and **AWS** to ensure business continuity; monitored system performance and optimized cloud costs through infrastructure analysis, reducing monthly cloud spend by **22%** while maintaining **RTO/RPO** targets across production environments.
- Collaborated with development teams to enable **CI/CD pipelines** for efficient software deployment using **Azure services** and **Git**; prototyped and validated **new Azure features** and services for identity and access management; participated in design and implementation of large-scale **proof of concepts** for **application security controls** and cloud-native IAM architectures.

SKILLS

Cloud & DevOps – Azure (identity, operations suite, disaster recovery, migrations), AWS (EC2, S3, Lambda, CloudWatch), Infrastructure as Code, Terraform, CI/CD pipelines, Jenkins, Git.

Identity & Access Management – Least privilege access policies, role-based access control (RBAC), cloud identity governance, access reviews, user activity monitoring, application security controls.

Compliance & Security – GDPR, regulatory compliance frameworks, audit trails, data protection, IAM compliance guardrails, change-control management, disaster recovery strategies.

Monitoring & Operations – Azure operations suite, CloudWatch, Dynatrace, system performance analysis, cost optimization, logging and alerting, incident response.

Software Development – Java Spring Boot, Python, REST APIs, SQL (PostgreSQL, MySQL, Oracle), Docker, Linux, data engineering.

Business Intelligence & Analytics – Power BI, Tableau, DAX, Power Query, data modelling, operational dashboards.

Enterprise Systems – ERP integration, enterprise business system support, cross-system integrations, UAT coordination, SWIFT messaging (MT/MX), ISO 20022, payments processing.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Multi-Region Azure IAM Cloud Security Platform with Least Privilege Enforcement (HCL Technologies)

- Architected and deployed a **cloud identity governance** platform leveraging **Azure Active Directory, Terraform IaC, and CI/CD pipelines** to enforce **least privilege access policies** and **role-based access control (RBAC)** across **12 enterprise cloud applications** and **3,000+** users in regulated healthcare and financial services domains.
- Implemented **disaster recovery** and **automated backup strategies** using **Azure** native services; configured **Azure operations suite monitoring** (CloudWatch, Dynatrace equivalent) to achieve **99.98%** uptime and real-time alerting for access anomalies, reducing incident response time from **4 hours to 12 minutes**.
- Developed **cloud IAM compliance guardrails** and **regulatory frameworks** enforcing **GDPR**, audit logging, and data protection controls; automated periodic **access reviews** and user activity analysis, enabling **100%** compliance audit pass rate and reducing manual review overhead by **70%**.
- Established **Infrastructure as Code (IaC)** governance using **Terraform** and **Git-based CI/CD automation** (Jenkins) to provision and manage **Azure** resources; codified all IAM policies, access controls, and security configurations for repeatable deployments across **4 regions**, reducing provisioning time by **60%** and enabling **50+** policy updates monthly without manual intervention.
- Led **cloud migration and modernization** of legacy on-premises identity systems to **Azure**; collaborated with development teams to integrate identity services into application **CI/CD pipelines**, and conducted proof-of-concepts for emerging **Azure features** and identity services, advancing organizational cloud-native adoption roadmap.

SWIFT Payments Operations Dashboard with Real-Time Access Control & GDPR Compliance (HCL Technologies)

- Designed and maintained a production SWIFT messaging and payments-operations dashboard supporting **ISO 20022 message flows**, cross-border and SEPA payment processing for a major banking client; implemented role-based access controls and audit logging to enforce regulatory compliance including **GDPR** and data protection standards across **500+** operations users.
- Automated monitoring, logging, and alerting for payment message flows using **Splunk, CloudWatch, and Dynatrace**; developed Python scripts for transaction-flow analysis and reconciliation workflows, reducing SLA breaches by **35%** and enabling **100%** traceability of payment operations for audit and regulatory requirements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
