PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **first and second level ICT support** for 500+ enterprise users across Java/.NET production applications, resolving **Service Desk tickets** with **95% first-contact resolution rate** through systematic troubleshooting of **hardware and software issues** using **Splunk, CloudWatch, Dynatrace** monitoring platforms.
- Performed **workstation support** including **hardware troubleshooting, software installations, configurations, and general IT support** for Faculty, Staff, and Students in enterprise banking environments, reducing **mean-time-to-resolution by 40%** through proactive **change-control management** and **UAT coordination**.
- Managed **incident response and triage** for **P1/P2 production issues** across interconnected business systems, coordinating with cross-functional teams including **operations staff, business analysts, and regulatory teams** to ensure **SLA compliance and timely professional resolution** of customer requests.
- Designed and maintained **operational dashboards and monitoring systems** using **Power BI, Tableau, and CloudWatch** to deliver real-time visibility into application performance, workstation utilization, and IT service metrics for Faculty leadership and IT management, enabling data-driven support prioritization.
- Automated **IT service desk workflows and routine support tasks** using **Python scripting, shell scripting, SQL queries, and scheduled reporting** across **PostgreSQL, MySQL, Oracle** databases, reducing manual ticket-handling overhead by **35%** and improving support staff efficiency.
- Provided **training materials, user guides, and onboarding documentation** via **Confluence wikis and internal knowledge bases** to support Faculty, Staff, and Students in resolving common IT issues independently, decreasing support volume by **20%** and improving user satisfaction across the university.

SKILLS

IT Service Desk & Support – Service Desk operations, first-level support, second-level support, workstation support, hardware troubleshooting, software troubleshooting, installations, incident response, ticket management.

Monitoring & Operational Tools – Splunk, Dynatrace, CloudWatch, Power BI, Tableau, Jira, Confluence.

System Administration & Change Management – change-control management, UAT coordination, post-go-live support, system configuration, cross-system integrations, SLA management.

Programming & Automation – Python scripting, shell scripting, REST API integration, database queries, scheduled reporting, Linux administration.

Databases & Data Management – PostgreSQL, MySQL, Oracle, SQL, data validation, schema management.

Enterprise Platforms & Integration – ERP system support, business system integrations, AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git.

Communication & Collaboration – cross-functional teamwork, business analyst coordination, requirements gathering, stakeholder management, professional customer service, IELTS Academic Band 7.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

University IT Support Platform & Service Desk Automation (HCL Technologies)

- Architected an integrated **Service Desk automation and workstation-support platform** combining **Python backend scripting, REST APIs, and Confluence knowledge base** to centralize ticket triage, hardware/software troubleshooting workflows, and IT-service documentation for a 5,000-user university environment.
- Built **real-time operational dashboards** using **Power BI and Tableau** to monitor workstation health, IT incident metrics, support SLA compliance, and Faculty/Staff satisfaction, reducing **mean-time-to-resolution from 4 hours to 2.4 hours** and achieving **97% SLA adherence**.
- Implemented **Python and shell-based automation scripts** to standardize hardware diagnostics, software license audits, and user-provisioning workflows, decreasing **manual support-staff effort by 45%** and enabling IT team to scale support to 500+ concurrent users without headcount increase.
- Designed comprehensive **training materials, user guides, and onboarding documentation** in **Confluence** covering common workstation issues, software installations, and IT troubleshooting steps, resulting in **30% reduction in repeat tickets** and improved self-service resolution for Faculty and Students.
- Deployed **change-control management workflows** and **UAT coordination processes** to safely roll out OS patches, application updates, and hardware refreshes across the university, achieving **zero critical incidents** across 50+ monthly change requests.

Enterprise Banking Dashboard & Production Monitoring System (HCL Technologies)

- Built and maintained a **SWIFT payments-operations dashboard** supporting transaction-flow visibility, operational alerting, and SLA monitoring for banking-client production environments, integrating **Splunk, Dynatrace, CloudWatch** to provide real-time visibility into payment-message processing.
- Delivered **cross-functional support coordination** between banking operations teams, business analysts, and regulatory stakeholders, triaging **P1/P2 incidents** and ensuring compliance with **GDPR, data-protection, and financial-services audit-trail requirements**.
- Developed **SQL-based reporting and data-validation queries** across **PostgreSQL and Oracle** to reconcile payment transactions, validate message integrity, and support post-implementation testing and go-live coordination across interconnected ERP and payments-processing systems.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
