PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **technical support and incident resolution** for production enterprise applications supporting 50+ banking customers, managing **SLA compliance** across P1/P2 incidents with **98% first-contact resolution rate** using **Splunk, CloudWatch, and Dynatrace** for application diagnostics and root-cause analysis.
- Communicated technical solutions to business stakeholders via **email, live chat, screen shares, and conference calls**, translating complex system behaviors into actionable guidance; demonstrated **product knowledge and best practices** for SWIFT messaging (MT/MX) and ISO 20022 message flows, enabling customer self-sufficiency and reducing support escalations by **35%**.
- Developed **in-depth product expertise** across WalkMe's Digital Adoption Platform by mastering **HTML, jQuery, and CSS** debugging techniques using **browser developer tools** and application logs to diagnose user adoption blockers; created **knowledge base articles and customer community guides** documenting best practices for optimal product use across SAP ERP environments.
- Applied **problem-solving with a customer-first approach** to understand and fulfil customer goals, collaborating with cross-functional teams (product, engineering, operations) to identify systemic issues; proposed **5+ product enhancements** adopted into roadmap, improving customer satisfaction scores by **22%** and reducing repeat support tickets by **28%**.
- Grasped and articulated new technologies quickly across **REST APIs, microservices integrations, and enterprise system interconnections** (Oracle, PostgreSQL, MySQL); maintained poise and articulation in challenging customer interactions involving regulatory compliance (GDPR, PSD2), change-control management, and UAT coordination in production financial environments.
- Demonstrated independent and team capabilities while supporting multiple concurrent customer streams, utilizing **Jira ticketing, Confluence documentation, and Agile/Scrum ceremonies** to track issues and share knowledge; maintained availability for onsite collaboration 3 days weekly and participated in continuous learning to stay current with platform updates and emerging customer use cases.

SKILLS

Technical Support & Customer Communication – SLA management, incident response (P1/P2), email support, live chat, screen sharing, conference calls, knowledge base development, customer community engagement.

Diagnostics & Troubleshooting Tools – Splunk, CloudWatch, Dynatrace, browser developer tools, application logs, HTML, jQuery, CSS debugging, system monitoring.

Product Knowledge & Domain Expertise – WalkMe Digital Adoption Platform, SAP ERP systems, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, payments processing, PSD2, change-control management, GDPR compliance.

Enterprise Systems & Integration – REST APIs, microservices, Oracle, PostgreSQL, MySQL, ERP integration support, cross-system data flows, UAT coordination, post-implementation support.

Issue Tracking & Collaboration – Jira, Confluence, Agile/Scrum, cross-functional teamwork, problem-solving, customer success metrics.

Technical Stack – Java Spring Boot, Python, SQL, AWS (EC2/S3/Lambda/CloudWatch), Docker, Linux, Git, Jenkins, CI/CD pipelines.

Data & Analytics – Power BI, Tableau, DAX, Power Query, data modelling, pandas, NumPy, R/RStudio.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

WalkMe Digital Adoption Platform — Customer Onboarding & Success Acceleration Suite (HCL Technologies)

- Designed and delivered a **comprehensive customer onboarding framework** integrating **WalkMe guidance, engagement, and insights modules** across SAP ERP environments, reducing new customer time-to-value by **40 days** and increasing feature adoption rates by **56%** within first 90 days.
- Implemented **interactive product walkthroughs using HTML, jQuery, and CSS** to guide end-users through complex ERP workflows; leveraged **browser developer tools** to diagnose JavaScript execution issues and optimize rendering performance, reducing walkthrough failure rate from **18% to 3%**.
- Built **real-time customer success dashboards using Power BI and DAX** to surface product usage metrics, adoption blockers, and feature engagement trends; delivered automated weekly reports to 40+ customers via email and live dashboard sharing, enabling proactive support and **92% renewal rate**.
- Established **knowledge base and community documentation repository** within Confluence with **120+ best-practice articles** covering SAP integration patterns, GDPR compliance in digital adoption, and change-management strategies; community self-service resolution improved by **47%**, reducing support ticket volume by **1,200 incidents annually**.
- Coordinated **cross-functional customer success initiatives** with product, engineering, and operations teams; tracked all support requests in **Jira using SLA-driven workflows** and maintained **98% on-time resolution** across P1/P2 incidents; contributed **8 product enhancement proposals** adopted into quarterly roadmap based on customer feedback synthesis.

SWIFT Payments Operations Dashboard & ISO 20022 Migration Support (HCL Technologies)

- Delivered production support and **real-time monitoring** for SWIFT messaging (MT/MX) payments dashboard supporting tier-1 banking client; leveraged **Splunk and CloudWatch** to maintain transaction-flow visibility, ensuring **99.95% SLA compliance** for payment message processing across SEPA and cross-border payment corridors.
- Collaborated with banking-domain business analysts and operations teams to troubleshoot ISO 20022 message format issues, payment reconciliation workflows, and tokenization compliance; provided technical guidance on PSD2 regulatory requirements and GDPR data-protection implications, enabling smooth UAT coordination and post-implementation triage.
- Articulated complex financial-services requirements to cross-functional stakeholders via screen shares and documentation; demonstrated **best practices for payment message auditing and regulatory compliance**, reducing post-settlement discrepancies by **31%** and improving audit-trail completeness to **100%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
