PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built and maintained **lead routing automations** and **system integrations** using **REST APIs** and **Python** scripting to optimize sales rep productivity; reduced manual lead allocation overhead by **40%** and improved inbound lead flow efficiency through proactive identification and remediation of routing bottlenecks.
- Designed and deployed **data enrichment pipelines** using **Python (Pandas, NumPy)** and **SQL** to maintain revenue data hygiene across **HubSpot** and downstream GTM systems; automated **lead enrichment workflows** that increased data completeness by **35%** and enabled accurate sales forecasting.
- Conducted **root cause analysis** on sales process performance using **SQL queries** and **Power BI dashboards**; identified inefficiencies in lead allocation logic and built **self-sourced data solutions** that improved sales team conversion rates by **18%** and embedded continuous improvement metrics into operational KPIs.
- Configured and administered **HubSpot** sales enablement, engagement, and orchestration platforms; coordinated **cross-functional collaboration** with Sales, Partnerships, Marketing, and Finance teams to gather requirements, drive adoption, and execute change management initiatives that scaled automated solutions across **6+ business functions**.
- Managed **data integrity** and **process improvements** across interconnected **GTM-function technologies** including **CPQ (Configure, Price, Quote)** and **CLM (Contract Lifecycle Management)** systems; automated validation workflows using **Jenkins CI/CD pipelines** and **Git** that reduced data errors by **50%** and accelerated go-live cycles by **3 weeks**.
- Drove **operational excellence** through implementation and scaling of **automated solutions** leveraging **Zapier** and **n8n** orchestration platforms; built end-to-end workflow automations that eliminated **12+ hours/week** of manual operations work and demonstrated strong **project management** and **problem-solving** capabilities in fast-paced, ambiguous environments.

SKILLS

Revenue Operations & Automation – lead routing optimization, sales rep productivity, system integrations, data enrichment, lead allocation, inbound lead flow.

Data Analytics & BI Tools – Power BI (dashboards, DAX measures, data modelling), Tableau, SQL (PostgreSQL, MySQL, Oracle), Python (Pandas, NumPy), root cause analysis, KPI measurement.

RevOps & GTM Technology Stack – HubSpot configuration and administration, sales enablement platforms, engagement orchestration, CPQ (Configure Price Quote), CLM (Contract Lifecycle Management), customer-success platforms.

Automation & Integration Platforms – Zapier, Pipedream, n8n, UIPath, REST APIs, workflow automation, process optimization.

Technical & Programming Languages – Python, Java Spring Boot, SQL, shell scripting, Git, Jenkins CI/CD, Linux.

Cross-Functional Collaboration & Project Management – stakeholder management, requirements gathering, change management, training and adoption, organizational problem-solving, ambiguous environments.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, monitoring and observability.

EDUCATION AND TRAINING

PROJECTS

Lead Routing & Revenue Intelligence Platform (HCL Technologies)

- Architected an end-to-end **lead routing optimization system** that consumed inbound lead data via **REST APIs**, enriched records using **Python (Pandas, NumPy)** ETL pipelines, and allocated leads to sales reps using custom allocation logic; integrated with **HubSpot** sales engagement platform and **CPQ** systems to drive real-time distribution.
- Built **Power BI dashboards** with **DAX measures** tracking lead flow KPIs (conversion rate, time-to-contact, allocation efficiency); dashboards surface inefficiencies in routing logic, enabling operations team to conduct **root cause analysis** and implement continuous improvements; reduced manual lead triage by **60%**.
- Automated **data enrichment workflows** using **n8n** and **Zapier** to standardize lead records across **HubSpot**, **CLM**, and downstream sales-enablement systems; implemented **data validation rules** via **SQL** to maintain revenue data hygiene and prevent bad-quality leads from reaching sales reps.
- Deployed **Jenkins CI/CD pipelines** to orchestrate daily lead enrichment batch jobs, routing validations, and **Power BI** report refreshes; automated monitoring alerts using **CloudWatch** to proactively identify routing failures; achieved **99.2% pipeline uptime** and reduced manual intervention by **45%**.
- Collaborated with Sales, Partnerships, and Finance stakeholders to gather requirements, define SLAs, and execute **change management** rollout across **150+ sales reps**; delivered training materials and adoption guides that achieved **92% platform adoption** within **3 weeks**.

Revenue Operations Data Hub & GTM System Integration (HCL Technologies)

- Designed a centralized **revenue operations data hub** ingesting data from **HubSpot**, **CPQ**, **CLM**, and marketing-automation platforms; built **SQL** data warehousing schemas (PostgreSQL) and **Python** orchestration scripts to synchronize **lead enrichment metadata**, pricing rules, and contract data across **6+ interconnected systems**.
- Implemented **data integrity workflows** using **UIPath** RPA and custom **Python** validation scripts to audit GTM system data completeness, detect schema mismatches, and enforce consistency rules; reduced data discrepancies by **72%** and improved sales forecasting accuracy to **88%**.
- Created operational dashboards in **Tableau** and **Power BI** summarizing lead-routing performance, sales-team efficiency, and revenue pipeline health; embedded KPI tracking aligned to business goals and enabled **cross-functional problem-solving** across Sales, Partnerships, and Finance teams.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
