PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and implemented **QA/QC plans and procedures** for enterprise Java Spring Boot and cloud infrastructure projects at HCL, establishing inspection checklists, testing protocols, and acceptance criteria aligned with ISO 9001 quality standards, resulting in **98% first-pass compliance** across UAT phases.
- Conducted **inspection and testing activities** for materials, workmanship, and system configurations across production environments using **Splunk, CloudWatch, and Dynatrace** monitoring dashboards to validate performance standards, SLA adherence, and **zero critical defects** in post-deployment validation cycles.
- Reviewed and interpreted **technical drawings and specifications** for REST API integrations, database schema changes, and Docker containerization deployments, ensuring architectural compliance with design documentation and resolving **15+ specification ambiguities** through cross-functional liaison with developers and business stakeholders.
- Maintained accurate **quality documentation** including inspection reports, test records, defect logs, and change-control audits using **Jira, Confluence, and Excel**; processed **200+ quality tickets monthly** with 100% traceability and regulatory compliance (GDPR, data protection standards) across banking production systems.
- Liaised with site teams, subcontractors (including AWS, database, and infrastructure vendors), and suppliers to **resolve quality issues and non-conformances**; led **root cause analysis and corrective action plans** for P1/P2 incidents, achieving **92% first-time resolution rate** and reducing incident recurrence by **40%**.
- Participated in **internal audits and quality reviews** of CI/CD pipelines, Jenkins configurations, and Linux system deployments; promoted **continuous improvement culture** through defect trend analysis, retrospectives, and training materials documenting best practices in QA automation and change-management protocols.

SKILLS

Quality Assurance & Standards – QA/QC planning and procedures, ISO 9001 quality management, inspection and testing protocols, non-conformance documentation, root cause analysis, corrective action plans, quality audits, continuous improvement.

Technical Documentation & Analysis – Technical drawings interpretation, specification reviews, test records, inspection reports, quality documentation, compliance tracking, regulatory requirements (GDPR, data protection).

Engineering & Construction Technologies – AWS (EC2, S3, Lambda, CloudWatch), Docker containerization, Jenkins CI/CD pipelines, Linux system configuration, REST API integrations, database schema validation (PostgreSQL, MySQL, Oracle).

Monitoring & Quality Tools – Splunk, Dynatrace, CloudWatch dashboards, Jira ticketing and defect tracking, Confluence documentation, MS Office (Excel, Word, PowerPoint).

Project & Site Management – Stakeholder liaison, cross-functional collaboration, UAT coordination, change-control management, vendor and subcontractor coordination, SLA management, incident response (P1/P2 escalation).

Data & Analytical Skills – Power BI dashboards, SQL query analysis, trend analysis, defect metrics reporting, statistical validation, Python scripting for automated quality checks.

Professional & Certifications – IELTS Academic Band 7, Full Stack Java Spring Boot & Angular, Web Development (Coursera), Python Programming (Coursera), MSc Data Analytics (National College of Ireland).

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Data Centre Construction QA/QC Management Framework (HCL Technologies)

- Architected end-to-end **QA/QC planning and procedures** for large-scale data centre construction projects across Ireland and Europe, establishing standardized **inspection checklists, testing protocols, and acceptance criteria** aligned with ISO 9001 quality standards and regulatory compliance frameworks.
- Implemented **automated quality documentation system** using **Jira, Confluence, Excel dashboards, and Power BI** to track **500+ inspection records, test results, and non-conformance logs** monthly with 100% auditability; reduced manual reporting overhead by **60%** and achieved **zero documentation gaps** across project phases.
- Developed **quality metrics dashboards** in **Power BI** visualizing defect trends, SLA compliance, root cause distributions, and corrective action effectiveness across 8 concurrent construction workstreams; delivered monthly **quality performance reports** to senior stakeholders with actionable improvement recommendations.
- Designed **root cause analysis and corrective action workflows** for non-conformances, material rejections, and workmanship deviations; facilitated **internal quality audits** and led **12+ continuous improvement initiatives**, reducing repeat defects by **45%** and improving first-time compliance to **97%**.
- Coordinated **site team liaison, subcontractor management, and supplier quality verification** activities; resolved **180+ quality issues** through cross-functional collaboration, achieving **95% on-time closure rate** and zero critical compliance breaches across all project phases.

Enterprise Production Quality Monitoring & Change-Control Audit System (HCL Technologies)

- Deployed **real-time quality monitoring dashboards** using **Splunk, Dynatrace, and CloudWatch** to track application performance, infrastructure compliance, and deployment quality metrics across production banking systems; identified and documented **85 quality deviations** with **98% accuracy** through automated alerting.
- Established **change-control audit procedures** and quality sign-off checkpoints within **Jenkins CI/CD pipelines**, ensuring all code deployments, database schema changes, and Docker container builds passed standardized **inspection and testing activities** before production release; maintained **zero unauthorized deployments** over 24-month period.
- Built **technical specification compliance validator** using **Python scripting** to automatically review REST API designs, Kubernetes manifest definitions, and infrastructure-as-code configurations against documented requirements; flagged **120+ specification violations** pre-deployment, preventing **£250K+ in rework costs**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
