PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **production readiness frameworks** for enterprise payment gateway services, embedding **operational resilience, automation, and compliance** across the entire service lifecycle from design through operations; reduced Mean Time to Recovery (MTTR) by **35%** through **self-healing capabilities** and **robust monitoring standards** using **Dynatrace and Splunk**.
- Led **incident management** and **blameless postmortem** practices across mission-critical payment processing systems handling **ISO 20022 message flows** and **SEPA/cross-border payments**; coordinated **sustainable incident response** across global teams, improving system availability to **99.95% SLA** compliance.
- Developed and maintained **CI/CD pipelines** using **Jenkins, Groovy, Git, and Bitbucket** with **software promotion gating** and **operational readiness checks**; automated **certificate renewal, traffic routing, and alerting** using **Ansible, Venafi, and XLR templates**, reducing manual deployment overhead by **40%**.
- Implemented **logging, monitoring, and alerting standards** using **Dynatrace and Splunk** for **observability** across distributed payment gateway architectures; configured **gRPC event-driven alerting** and **NGINX load balancer monitoring**, achieving **zero-escalation customer resolution** for **95%** of operational issues.
- Drove **compliance and risk management initiatives** for **PCI compliance, Safety & Soundness, and ITSM defect resolution**; implemented **certificate lifecycle management, mutual TLS, and SSL handshake verification** controls; embedded **GDPR and regulatory compliance** into operational gating, reducing compliance violations by **100%**.
- Collaborated with development teams across multiple time zones on **reliability engineering and scalability optimization**; provided feedback on **resiliency gaps** and mentored junior engineers on **AWS infrastructure, secure access practices, and cloud-native deployments**; diagnosed **stack traces, TCP dumps, heap/thread dumps, and OS-level issues** to improve system performance by **28%**.

SKILLS

Site Reliability Engineering & DevOps – production readiness, incident management, blameless postmortems, Mean Time to Recovery optimization, operational resilience, self-healing systems.

DevOps Tools & CI/CD – Jenkins, Groovy, Git, Bitbucket, Ansible, Venafi, XLR templates, Chef, shell scripting.

Monitoring & Observability – Dynatrace, Splunk, logging standards, alerting configuration, system health monitoring, proactive issue detection.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), NGINX configuration, load balancers (BIG-IP F5), gRPC event-driven architectures, Docker.

Security & Compliance – PCI compliance, certificate lifecycle management, mutual TLS, SSL handshake, SSH keys, encryption standards, GDPR, ITSM processes, Active Directory, SAML, LTPA, SSO, OAuth.

Payments & Banking Domain – payment gateway operations, ISO 20022 message flows, SEPA payments, cross-border payments, SWIFT messaging (MT/MX), PSD2, Open Banking.

Systems & Networking – client-server architecture, network layers (L1–L7), stack trace analysis, TCP dumps, heap/thread dumps, OS-level troubleshooting, Linux administration.

EDUCATION AND TRAINING

PROJECTS

Multi-Region Payment Gateway Operational Readiness Platform (HCL Technologies)

- Architected an end-to-end **production readiness framework** for a distributed payment gateway processing **ISO 20022 message flows** across multiple regions; integrated **Dynatrace and Splunk monitoring** with **Ansible-driven automation** for **certificate renewal, traffic routing, and compliance alerting**.
- Implemented **CI/CD pipeline automation** using **Jenkins, Groovy, and Bitbucket** with **software promotion gating** and **operational readiness gates**; deployed **XLR templates** for release orchestration and **Venafi certificate lifecycle management**, reducing manual deployment time by **40%** and enabling **zero-touch certificate rotation**.
- Designed **gRPC event-driven alerting architecture** with **NGINX load balancer configuration** and **BIG-IP F5 routing policies**; configured **mutual TLS, SSL handshake verification, and mTLS mutual authentication** for secure service-to-service communication in payment processing workflows.
- Established **PCI compliance and GDPR-aligned observability standards** across all payment gateway services; automated **compliance reporting** and **ITSM defect resolution** workflows, achieving **100% compliance audit pass rate** and reducing **Safety & Soundness violations** by **100%**.
- Led **incident management and blameless postmortem practices** for production payment outages; optimized **Mean Time to Recovery (MTTR)** from **45 minutes to 12 minutes** through automated **self-healing capabilities, alerting thresholds, and runbook automation** using **Ansible orchestration**.

Banking Payment Operations Dashboard & Regulatory Compliance Monitoring (HCL Technologies)

- Supported production **SWIFT messaging (MT/MX)** and **payments-operations dashboard** for enterprise banking client; managed **monitoring and observability** using **Splunk dashboards and Dynatrace APM**, providing real-time transaction-flow visibility and **SLA-based alerting** for **P1/P2 incident response**.
- Implemented **compliance and regulatory frameworks** including **GDPR, PCI compliance, and SEPA payment standards**; coordinated **change-control management** and **UAT support** with banking-domain stakeholders and regulatory teams, ensuring **zero audit violations** across all payment processing flows.
- Developed **Python automation scripts and SQL-based data validation** for **ISO 20022 message reconciliation workflows** and cross-border payment settlement; integrated **REST APIs** across **PostgreSQL and Oracle databases**, reducing manual reconciliation overhead by **35%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
