PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Architected and deployed **CI/CD pipelines using Jenkins, Groovy, Git, and Bitbucket** for software promotion across production environments; implemented **operational gating** and **automated compliance reporting** for Payment Gateway platforms, reducing deployment-to-production cycle time by **35%** and eliminating manual gate reviews.
- Designed and operationalized **monitoring and alerting standards using Dynatrace and Splunk** for payment processing systems; configured **gRPC event-driven architecture observability**, implemented **SSL/TLS certificate lifecycle management** with **mutual TLS** and **SSH key rotation automation**, and established proactive issue detection reducing Mean Time to Recovery (MTTR) by **40%**.
- Led **incident management and blameless postmortem** processes for production payment systems; drove **PCI compliance and Safety & Soundness** initiatives across **ITSM defect resolution** workflows; mentored junior engineers on **SRE fundamentals** and operational resilience, resulting in **99.95% system availability** and **zero compliance violations** over **18 months**.
- Developed **Infrastructure-as-Code automation using Ansible and XLR templates** for certificate renewal, traffic routing, and compliance configuration management; integrated **Venafi certificate orchestration** and **NGINX configuration management** to standardize secure access practices across multi-region deployments, reducing manual operational toil by **50%**.
- Partnered with development teams on **production readiness design** and **lifecycle ownership** of Payment Gateway services; implemented **capacity planning, performance monitoring, and self-healing capabilities** using **AWS infrastructure (EC2, Lambda, CloudWatch)** and **Docker containerization**; provided **reliability engineering feedback** improving system resilience across **12+ microservices**.
- Executed **change-control management and UAT coordination** for Payment Domain systems; collaborated across global teams on **NGINX routing, gRPC protocol optimization, and network layer (L1–L7) troubleshooting**; maintained **client-server relationship documentation** and security standards; delivered **continuous improvement feedback loops** reducing operational incidents by **45%**.

SKILLS

DevOps & SRE Tools – Jenkins, Groovy, Ansible, Chef, XLR, Venafi, Git, Bitbucket, GitOps, Blue-Green Deployment.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, NGINX, gRPC architectures, Kubernetes concepts.

Monitoring & Observability – Dynatrace, Splunk, alerting standards, logging, proactive issue detection, performance monitoring.

Security & Compliance – SSL/TLS, mutual TLS, SSH key management, certificate lifecycle management, PCI compliance, ITSM, Safety & Soundness, encryption standards.

Payment Domain & Networking – Payment Gateways, gRPC event-driven systems, NGINX configuration, client-server architecture, network layers (L1–L7), ISO 20022, SEPA, cross-border payments.

Incident Management & Reliability – SRE fundamentals, blameless postmortems, Mean Time to Recovery (MTTR) optimization, incident response, capacity planning, self-healing systems.

Languages & Scripting – Shell scripting, Python, Groovy, SQL (PostgreSQL, MySQL, Oracle), Linux.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Payment Gateway Production Readiness & Reliability Platform (HCL Technologies)

- Engineered end-to-end **lifecycle ownership framework** for Payment Gateway services, integrating **Dynatrace** and **Splunk monitoring**, **Jenkins CI/CD pipelines with Groovy automation**, and **Ansible-driven infrastructure provisioning**; implemented **gRPC event-driven architecture observability** and **NGINX traffic routing policies** across production and staging environments.
- Deployed **certificate lifecycle management automation using Venafi and XLR templates** for mutual TLS and SSL handshake optimization; configured **automated certificate renewal, SSH key rotation, and compliance reporting** workflows reducing manual operational overhead by **60%** and achieving **zero certificate expiration incidents** over **24 months**.
- Established **operational readiness standards** covering capacity planning, performance thresholds, and self-healing capabilities; implemented **PCI compliance and Safety & Soundness** controls across multi-region **AWS infrastructure (EC2, Lambda, CloudWatch)** deployments; conducted **blameless postmortems** and SRE mentoring reducing Mean Time to Recovery by **42%**.
- Designed **incident management automation** using **Jenkins orchestration, ITSM defect workflows, and Splunk alerting**; implemented **network layer (L1–L7) monitoring and client-server relationship tracking** for Payment Gateway transactions; achieved **99.96% availability SLA** and **sub-2-minute MTTR** for critical payment processing incidents.
- Delivered **continuous improvement feedback loops** to development teams; provided architectural guidance on **gRPC optimization, NGINX configuration tuning, and encryption standards**; reduced operational toil and compliance risk by **55%** through automation and standardization across **8+ Payment Gateway instances** supporting **\$2B+ annual transaction volume**.

SWIFT Payments Operations Dashboard & Compliance Automation (HCL Technologies)

- Architected **production support and monitoring infrastructure** for SWIFT messaging and payment operations dashboard; integrated **Splunk and Dynatrace** for real-time transaction-flow visibility and operational alerting on **MT/MX message formats** and **ISO 20022 message flows**; reduced alert resolution time by **38%**.
- Implemented **compliance reporting automation** and **GDPR/Data Protection controls** for banking-domain payment systems; coordinated **change-control management and UAT** across global banking operations teams and regulators; maintained audit trails and transaction reconciliation workflows supporting **SEPA and cross-border instant payments**.
- Collaborated with business analysts and operations stakeholders to design **self-healing capabilities and capacity planning** for payment message processing; reduced P1/P2 incident response time by **45%** and maintained **99.98% SLA compliance** for mission-critical payment operations over **36+ months**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)

- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
