PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **highly scalable distributed systems** handling **10,000+ concurrent transactions/sec** using **Java Spring Boot, REST APIs, and AWS (EC2, S3, Lambda, CloudWatch)**; implemented robust routing, validation, and authentication logic across enterprise microservices with **99.95% uptime SLA**.
- Built and deployed **API Gateway services** with **clean, well-documented, and testable code** using **CI/CD pipelines (Jenkins, Git)**; conducted code reviews and knowledge-sharing sessions across cross-functional teams, reducing defect escape rate by **35%** and improving deployment velocity by **40%**.
- Diagnosed and resolved **production issues** including **on-call support** for mission-critical payment-operations dashboards using **Splunk, CloudWatch, and Dynatrace**; implemented **P1/P2 incident response** workflows achieving **sub-5-minute MTTR** for critical system failures affecting **2,000+ daily transactions**.
- Contributed to developing **resilient distributed systems** supporting **high-volume API traffic** through **SQL (PostgreSQL, Oracle) optimization, Docker containerization, and Linux system administration**; designed data transformation and validation pipelines reducing processing latency by **28%**.
- Collaborated with **multi-functional teams** including banking-domain business analysts and operations engineers to deliver **high-quality solutions**; led UAT coordination and post-implementation support for interconnected enterprise systems handling **SWIFT MT/MX messaging, ISO 20022 message flows, and regulatory compliance (GDPR, PSD2)**.
- Improved efficiency and reliability of services through **Python scripting** for automation, **ETL data pipelines, and scheduled reporting**; built monitoring dashboards and operational alerting systems reducing mean resolution time by **32%** while supporting **change-control management** across enterprise business systems.

SKILLS

Distributed Systems & API Development – Scala, Akka HTTP, Akka Streams, REST APIs, API Gateway services, routing, validation, authentication, transformation logic.

Backend & Cloud Engineering – Java Spring Boot, Python, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, microservices architecture, scalable systems design.

Data & Storage – SQL (PostgreSQL, MySQL, Oracle), data pipelines, ETL, schema design, query optimization.

DevOps & Reliability – CI/CD (Jenkins, Git), code reviews, production support, on-call incident response, monitoring (Splunk, Dynatrace), SLA management.

Enterprise & Payments Domain – SWIFT messaging (MT/MX), ISO 20022 message flows, payments processing, SEPA, PSD2, GDPR compliance, ERP integration, change-control management, cross-system integrations.

Analytics & BI Tools – Power BI, Tableau, DAX, Power Query, data modelling, data warehousing.

Development Practices – Agile/Scrum, Jira, Confluence, knowledge-sharing, cross-functional collaboration, UAT support.

EDUCATION AND TRAINING

PROJECTS

Distributed API Gateway Platform with Akka Streams – Multi-Region Resilience & High-Throughput Routing (HCL Technologies)

- Architected and implemented a **distributed API Gateway platform** using **Scala, Akka HTTP, and Akka Streams** to replace legacy single-region routing infrastructure; designed **robust routing, validation, and authentication logic** supporting **50,000+ requests/sec** across **3 geographic regions** with automatic failover, reducing latency by **18%**.
- Developed **resilient transformation and message-processing pipelines** using **Akka Streams** to handle complex API payload validation and enrichment; implemented **back-pressure handling** and **circuit-breaker patterns**, achieving **99.99% reliability** and eliminating request timeouts that previously affected **2% of traffic**.
- Deployed platform on **AWS (EC2 auto-scaling, S3 for config versioning)** with **Docker containerization** and **CI/CD pipelines (Jenkins, Git)**; established **on-call incident response procedures** and monitoring via **CloudWatch and Dynatrace**, reducing mean-time-to-resolution from **25 min to 4 min** for critical incidents.
- Contributed to development of **clean, well-documented, and testable code** including unit tests, integration tests, and load-test suites; participated in **code reviews and knowledge-sharing sessions** across **multi-functional teams** (platform, backend, operations), improving code quality metrics by **42%**.
- Enhanced operational observability by implementing **custom Akka HTTP metrics** and alerting rules; collaborated with **multi-functional teams** to improve service efficiency, reducing operational overhead by **30%** and enabling rapid scaling during peak-traffic periods affecting **banking-sector integrations**.

SWIFT Payments Dashboard & ISO 20022 Message Validation Engine (HCL Technologies)

- Built production-grade **payments-operations dashboard** with **transaction-flow visibility** and **operational alerting** for **SWIFT MT/MX messaging** and **ISO 20022 message flows**; implemented **real-time validation logic** using **Java Spring Boot REST APIs** and **PostgreSQL** to ensure **GDPR and PSD2 regulatory compliance**.
- Designed **ETL data pipelines** in **Python** to extract, transform, and load payment message data from **SWIFT gateways** into operational warehouse; developed **SQL queries and schema changes** supporting **reconciliation workflows** and audit-trail reporting, processing **15,000+ daily transactions** with **100% data accuracy**.
- Collaborated with **cross-functional teams** (banking-domain BAs, operations, compliance) for requirements gathering, UAT support, and post-implementation triage; implemented **change-control management** procedures ensuring zero-downtime deployments of **SEPA and cross-border payment rules** updates, supporting **12+ financial institutions**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
