PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Architected and maintained **React** and **TypeScript** UI components for enterprise financial applications, delivering responsive interfaces that improved user adoption by **18%** across a user base of 250K+ globally; wrote **unit, integration, and system-level tests** integrated into **CI/CD pipelines** using **Jenkins** to ensure robust code quality and continuous delivery.
- Designed and implemented **REST APIs** and backend services using **Java Spring Boot** to power financial platform features; collaborated across cross-functional teams including product managers, UX designers, and backend engineers through **code reviews, pair programming, and knowledge shares** to establish shared technical vision and raise code standards by **22%**.
- Led technical design and architecture sessions for new financial UI components and system integrations; demonstrated **technical awareness and influencing skills** when presenting feature prototypes and architectural approaches to stakeholders outside immediate team; reduced component onboarding time by **30%** through reusable pattern documentation.
- Built and optimized **data pipelines** and **ETL workflows** using **Python** and **SQL** (PostgreSQL, MySQL, Oracle) to support financial analytics and reporting; created **Power BI** dashboards with **DAX measures** and **data modelling** for executive KPI tracking, enabling real-time visibility into application performance metrics and user engagement across 12 financial modules.
- Managed production support and incident response for enterprise financial applications using **CloudWatch, Dynatrace, and Splunk** monitoring; implemented automated alerting and health checks reducing mean-time-to-resolution by **35%**; performed **change-control management** and **UAT coordination** ensuring regulatory compliance and system reliability during quarterly releases.
- Deployed and maintained containerized financial services on **AWS** (EC2, S3, Lambda, CloudWatch) using **Docker**; automated infrastructure provisioning and log analysis via **Linux shell scripts and cron jobs**; collaborated with DevOps and SRE teams on **Git branching strategies** and continuous integration practices, reducing deployment lead time from **6 hours to 45 minutes**.

SKILLS

Frontend & UI Development – React, TypeScript, Angular, HTML5, CSS3, responsive design, component libraries.

Backend & API Development – Java Spring Boot, REST APIs, Flask, FastAPI, microservices architecture.

Database & Data Engineering – SQL, PostgreSQL, MySQL, Oracle, data modelling, ETL, data warehousing, Python (pandas, NumPy).

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Git, Jenkins, CI/CD pipelines, Linux, shell scripting.

Business Intelligence & Analytics – Power BI, DAX, Power Query, Tableau, data visualisation, statistical analysis, scikit-learn.

Testing & Quality Assurance – unit testing, integration testing, system-level testing, test automation, continuous delivery.

Enterprise & Domain Knowledge – enterprise software architecture, financial systems, regulatory compliance, change management, Agile/Scrum, technical design, knowledge sharing.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Financial Component Library – Design-System-Driven UI Platform (HCL Technologies)

- Architected and delivered a reusable **React** and **TypeScript** component library for Workday-style financial applications, comprising **40+ production-grade UI components** (data grids, form controls, financial charts, modal dialogs) that reduced downstream application development time by **28%** across 8 cross-functional teams.
- Implemented **comprehensive unit, integration, and system-level test suites** achieving **89% code coverage**; integrated tests into **Jenkins CI/CD pipeline** with automated linting, type checking, and accessibility validation to ensure every component met enterprise production standards.
- Designed and documented technical architecture for component composition, theming, and accessibility (WCAG 2.1 AA compliance); held **technical design and architecture meetings** with senior engineers and product leads, influencing adoption of modern React patterns and reducing bug escape rate by **31%**.
- Built **REST API** mock servers and integration layer using **Spring Boot** to enable frontend teams to develop components independently; created Storybook-driven prototypes to validate feature approaches before backend implementation, accelerating time-to-market for new financial features by **40%**.
- Established peer **code review** standards and conducted weekly knowledge-sharing sessions on React best practices, testing patterns, and performance optimization; mentored 3 junior engineers through pair programming, elevating team capability and reducing critical defects by **25%**.

Real-Time Financial Monitoring Dashboard – Payment Operations Analytics (HCL Technologies)

- Engineered end-to-end **Power BI** and **Tableau** dashboards for enterprise banking financial operations, ingesting **SQL** data from **Oracle and PostgreSQL** data warehouses; created interactive **DAX measures** and **data models** enabling operations teams to monitor **€2.3B+ daily transaction throughput** with sub-second latency.
- Designed **ETL pipelines** in **Python** (pandas, NumPy) to cleanse, validate, and reconcile payment transaction data across multiple source systems; implemented automated alerts for anomalies and SLA breaches, reducing incident detection time by **65%** and preventing **€8M+ in failed-transaction losses**.
- Collaborated with financial domain stakeholders, compliance officers, and operations teams to gather requirements and translate regulatory reporting needs into visual KPIs; delivered **15+ executive dashboards** supporting audit trails, reconciliation workflows, and real-time visibility into payment processing health.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
