PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, developed and delivered **enterprise-grade Java Spring Boot REST APIs** and microservices in a **metadata-driven development environment**, implementing **object-oriented frameworks** to support mission-critical payment operations and financial settlement workflows, reducing API response latency by **32%** and improving system throughput to **10K+ transactions/second**.
- Architected and maintained **performant, scalable, and resilient enterprise business applications** across **PostgreSQL, MySQL, and Oracle** databases using **Spring Boot, Python, and AWS infrastructure (EC2, S3, Lambda, CloudWatch)**, supporting **SLA-critical production environments** with **99.95% uptime** across interconnected ERP and payments systems.
- Wrote and maintained **reliable unit, integration, and system-level tests** at all levels of the testing pyramid using **JUnit, Mockito, and TestNG**, integrating test suites into **Jenkins CI/CD pipelines** with automated code reviews and **Git branching strategies**, achieving **87% code coverage** and accelerating deployment cycles to **12 builds/day**.
- Mentored and collaborated with **multi-functional teams** across software engineers, business analysts, operations teams, and regulatory stakeholders through **Agile ceremonies (standups, sprint planning, retrospectives)**, code reviews, knowledge-sharing sessions, and pair-programming, translating complex financial domain requirements into scalable technical implementations for **SWIFT messaging, ISO 20022, and SEPA payments standards**.
- Developed **modern UI technologies using React and Angular** for enterprise dashboard frontends, integrated with **integration technologies and REST APIs** for real-time data visualization and operational alerting, reducing incident detection time by **45%** and enabling cross-system visibility across **5+ interconnected business platforms**.
- Managed **change-control processes, UAT coordination, and post-implementation support** in fast-paced environments under tight deadlines, conducting thorough **system integration testing** across **Docker containerized microservices** and cloud infrastructure, ensuring **customer-first delivery** and regulatory compliance (GDPR, PSD2, financial audit trails) with **zero post-go-live production incidents**.

SKILLS

Object-Oriented Languages & Frameworks – Java, Spring Boot, C#, Python, REST APIs, OO design patterns.

Enterprise Development & Testing – Unit testing (JUnit, Mockito, TestNG), integration testing, system-level testing, test automation in CD pipelines, metadata-driven development.

Data & Database Technologies – PostgreSQL, MySQL, Oracle, SQL, data modelling, ETL pipelines, data warehousing.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD, Linux, shell scripting, change-control management.

Modern UI Technologies – React, Angular, responsive design, real-time dashboards.

Integration & Enterprise Systems – SWIFT messaging (MT/MX), ISO 20022, SEPA payments, cross-border payments, ERP integrations, system interconnectivity, PSD2 compliance.

Agile & Team Leadership – Agile software development, Scrum, mentoring, pair programming, code reviews, multi-functional collaboration, Jira, Confluence, knowledge sharing.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Enterprise Metadata-Driven Payments Platform Architecture (HCL Technologies)

- Architected and delivered a **metadata-driven payment settlement engine** using **Java Spring Boot, PostgreSQL, and AWS Lambda** that processed **2.5M+ daily transactions** across **ISO 20022, SWIFT MT/MX, and SEPA message formats**, reducing reconciliation latency from **4 hours to 12 minutes** and enabling real-time cross-border payment visibility.
- Implemented **comprehensive unit, integration, and system-level testing** across the testing pyramid using **JUnit, Mockito, and REST-Assured**, achieving **91% code coverage** and integrating all test suites into **Jenkins CI/CD pipelines** with automated regression testing, reducing deployment risk by **67%**.
- Led **multi-functional collaboration** between backend engineers, frontend developers (React/Angular UI team), financial domain BAs, and regulatory compliance officers to define payment flow requirements, conducted **UAT coordination and post-implementation support**, ensuring **GDPR, PSD2, and audit-trail compliance** with **zero compliance incidents**.
- Designed **scalable, performant REST API integrations** connecting the payment platform to **5+ downstream ERP systems (Oracle, SAP), core banking systems, and third-party payment providers** using **Docker containerization and AWS infrastructure**, achieving **10,500 transactions/second throughput** and **99.98% availability** in production.
- Mentored **3 junior engineers** through pair-programming, code reviews, and knowledge-sharing sessions on **object-oriented design patterns, enterprise testing practices, and metadata-driven architecture**, accelerating team velocity by **28%** and establishing internal best practices adopted across the banking division.

Real-Time Operational Alerting Dashboard & Integration Monitoring Suite (HCL Technologies)

- Built a **modern React-based operational dashboard** integrated with **Splunk, Dynatrace, and CloudWatch** monitoring agents to visualize **SWIFT payment message flows, transaction reconciliation status, and system health** across interconnected ERP platforms, reducing incident detection time by **48%** and enabling **SLA-critical P1/P2 incident response** in **< 15 minutes**.
- Engineered **Python-based data pipelines and ETL workflows** using **pandas and SQL** to aggregate operational metrics from **PostgreSQL, MySQL, and Oracle databases**, feeding real-time alerts and KPI dashboards used by **40+ operations staff** for daily payments processing oversight and regulatory reporting.
- Implemented **automated integration testing** for all dashboard data sources and **REST API endpoints** using **JUnit and TestNG**, ensuring **99.95% data accuracy** and integrating tests into **Jenkins pipelines** for continuous validation, preventing **12+ potential data inconsistencies** during production deployments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
