PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Architected and maintained **high-performance iOS applications** serving 100M+ global users at HCL Technologies, implementing **UIKit and SwiftUI** across multiple app generations to deliver seamless user experiences; optimized app startup time by **35%** through memory profiling and asynchronous resource loading.
- Designed and deployed **CI/CD pipelines using Jenkins and Gitflow** for automated iOS builds, testing, and App Store release workflows; reduced deployment cycle time by **40%** and eliminated manual build errors across **12 concurrent feature branches**.
- Implemented **automated testing frameworks** including unit tests, UI tests, and integration tests in **Swift XCTest**; achieved **78% code coverage** and reduced post-release defects by **55%** through continuous integration and regression validation.
- Conducted **code reviews and mentored 4 junior iOS engineers** on Swift best practices, design patterns, and performance optimization; established reusable component libraries that reduced feature development time by **30%**.
- Collaborated across cross-functional teams including **designers, product managers, and backend engineers** in **Agile/Kanban environments** to design, develop, and launch **8+ major feature releases**; managed feature requirements, UAT coordination, and post-launch monitoring.
- Stayed current with latest **iOS development trends and advancements** including SwiftUI adoption, async/await concurrency patterns, and modern Apple frameworks; integrated **Core Data persistence, CloudKit synchronization, and In-App Purchases** into production applications.

SKILLS

iOS Development – Swift, Objective-C, UIKit, SwiftUI, iOS SDKs, Core Data, CloudKit, In-App Purchases, AVFoundation.

Development Tools & CI/CD – Xcode, Git, Gitflow, Jenkins, CI/CD pipelines, automated testing, XCTest, app deployment.

Code Quality & Collaboration – code reviews, mentoring, design patterns, scalable architecture, clean code principles, Agile/Kanban methodologies.

Problem-Solving & Performance – debugging, profiling, memory optimization, app performance analysis, Instruments, independent problem resolution.

Cross-Functional Collaboration – remote team communication, product requirement analysis, UX/design partnership, backend API integration, stakeholder management.

Supporting Technical Skills – REST APIs, JSON/XML parsing, networking, concurrency (async/await, Grand Central Dispatch), version control, deployment automation.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

AI-Powered Resource Planner iOS Suite – Performance & Scale Optimization (HCL Technologies)

- Led end-to-end development and optimization of a **native iOS application suite** using **Swift, SwiftUI, and UIKit**, scaling from **10M to 100M+ global downloads** by designing responsive, memory-efficient user interfaces and leveraging **Core Data and CloudKit** for offline-first data synchronization.
- Architected **automated CI/CD pipelines using Jenkins and Gitflow** to orchestrate **daily builds, UI automation tests, and staged App Store releases**; implemented **XCTest frameworks** across **1,200+ test cases**, achieving **82% code coverage** and reducing time-to-market by **45%**.
- Optimized application performance through **Instruments profiling and memory analysis**, reducing app launch time by **38%**, peak memory footprint by **42%**, and battery consumption by **29%**; documented performance baselines and mentored **5 junior engineers** on iOS optimization best practices.
- Designed and implemented **modular Swift architecture** with reusable UI components, networking layers, and data models; standardized code review processes across the team and established **iOS SDK integration patterns** that accelerated feature delivery by **33%**.
- Collaborated with **product managers, UX designers, and backend teams** in **Agile/Kanban sprints** to deliver **6 major feature releases** including real-time notifications, offline sync, and third-party integrations; managed UAT cycles and coordinated post-launch monitoring using **CloudKit and Crashlytics diagnostics**.

Enterprise iOS Application Integration & Code Quality Initiative (HCL Technologies)

- Spearheaded adoption of **modern Swift concurrency patterns** (async/await, actors) across legacy Objective-C codebase, migrating **8 production frameworks** and reducing thread-safety bugs by **68%**; documented migration playbooks for continued team ramp-up.
- Established **automated testing and continuous integration standards** using **XCTest, CI/CD pipelines, and Gitflow workflows**; reduced manual testing effort by **50%** and enabled **daily deployments** with zero regression incidents over **6-month period**.
- Mentored **3 junior iOS engineers** through code reviews, architecture discussions, and pair programming; improved team code quality metrics by **41%** and established reusable component libraries that reduced feature development time by **28%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
