PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Prepared **monthly management accounts and financial reports** across enterprise banking systems by reconciling **balance sheet accounts** in **PostgreSQL, MySQL, and Oracle** databases, investigating discrepancies with **SQL ad-hoc queries** and achieving **100% audit-ready accuracy** for P1/P2 production systems.
- Supported **budgeting and forecasting processes** through **Python scripting** for automated data pipelines and ETL workflows, enabling finance teams to process monthly actuals and variance reports **40% faster** than manual methods while maintaining **compliance with internal controls**.
- Performed **financial analysis and variance reporting** using **Power BI dashboards with DAX measures** to model complex financial data, delivering **7+ interactive reports** to business stakeholders for cross-functional decision-making and process improvement initiatives.
- Assisted with **year-end audit preparation** and liaised with external auditors by maintaining accurate financial records, coordinating **change-control management** across interconnected ERP and business systems, and ensuring **GDPR and regulatory compliance** in banking-domain financial documentation.
- Developed **technical analytical skills** through coursework in **statistical analysis, hypothesis testing, and data modelling** during MSc in Data Analytics at NCI, applying R and Python data science methods to real-world financial datasets and A/B testing scenarios.
- Demonstrated **strong organisational ability and attention to detail** managing multiple concurrent financial deadlines across production support, CI/CD deployments, and Agile/Scrum ceremonies, coordinating cross-functional collaboration between finance teams, BAs, and operations staff on UAT coordination and post-go-live triage.

SKILLS

Financial Analysis & Reporting – monthly management accounts, balance sheet reconciliation, variance reporting, budget and forecasting support, financial data modelling.

Data & Analytics Tools – Power BI, Tableau, DAX, Power Query, SQL (PostgreSQL, MySQL, Oracle), Python (pandas, NumPy, scikit-learn), R, RStudio.

Business Systems & ERP – enterprise business systems support, ERP integration, change-control management, system configuration, cross-system data flows.

Compliance & Governance – internal controls, GDPR, regulatory compliance, audit preparation, audit liaison, financial record accuracy.

Core Competencies – financial analysis, reconciliation, attention to detail, numerical and analytical skills, data warehousing, business intelligence, stakeholder reporting.

Professional & Technical Skills – Microsoft Excel, IT systems, Agile/Scrum, cross-functional collaboration, communication, adaptability, proactive self-learning.

Programming & Automation – Python scripting, ETL pipeline development, Java Spring Boot, REST APIs, AWS (EC2, S3, Lambda, CloudWatch), Git, Jenkins.

EDUCATION AND TRAINING

PROJECTS

Financial Reporting & Variance Analysis Platform (HCL Technologies)

- Engineered an integrated **monthly management accounts and variance reporting system** using **Power BI dashboards with DAX measures** connected to **PostgreSQL and Oracle databases**, consolidating real-time balance sheet reconciliation data across 12+ banking business units and reducing report generation time by **45%**.
- Developed **automated ETL pipelines in Python** to extract actuals from source ERP systems, transform financial data through pandas-based reconciliation logic, and load variance metrics into a centralized data warehouse, enabling finance teams to close month-end processes **3 days faster** with **99.8% data accuracy**.
- Built **7 interactive Power BI reports with dynamic DAX calculations** for forecasting variance analysis, budget vs. actuals trending, and anomaly detection, supporting cross-functional decision-making for **15+ business stakeholders** and enabling leadership to identify cost-saving opportunities worth **€2.1M annually**.
- Implemented **internal control validation workflows** within the reporting pipeline to flag reconciliation discrepancies and audit exceptions, reducing manual investigation time by **60%** and ensuring **100% compliance** with GDPR and regulatory requirements for financial documentation in banking-domain environments.

Banking Operations Balance Sheet Reconciliation & Audit Support (HCL Technologies)

- Supported **year-end audit preparation** by automating **balance sheet account reconciliation** across SWIFT messaging platforms and enterprise banking systems, using **SQL queries and Python scripts** to validate **€850M+ in transaction flows** against general ledger entries with **zero discrepancies**.
- Collaborated with external auditors and internal finance teams during audit cycles, maintaining **accurate financial records** and coordinating **change-control management** for ERP system updates, ensuring **full regulatory compliance** with GDPR, audit trails, and payments-processing standards including ISO 20022 and SEPA requirements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
