PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Reviewed and critically assessed **AI-generated outputs** across diverse content types for quality, clarity, usability, and user experience; identified **inconsistencies, weaknesses, and improvement opportunities** through structured evaluation guidelines, delivering **98% accuracy** in feedback consistency across 500+ evaluations to inform model training and refinement.
- Applied **exceptional reading comprehension and acute attention to detail** to evaluate complex, ambiguous scenarios involving creative, visual, and editorial content; developed and refined **quality standards and scoring criteria** in collaboration with cross-functional teams, ensuring reliable and actionable results that enhanced training data quality by **35%**.
- Demonstrated **strong observational skills with excellent aesthetic and editorial judgment** through production-support and monitoring workflows at enterprise scale; analyzed operational dashboards using **Power BI, Splunk, and Dynatrace** to identify patterns and quality degradation, delivering **nuanced feedback** that improved system reliability and reduced escalations by **22%**.
- Contributed to **continuous enhancement of evaluation workflows and best practices** by documenting annotation, QA, and moderation processes in **Confluence**; supported development of training materials and best-practice guides that accelerated team onboarding by **40%** and maintained high accuracy across 12+ concurrent evaluation campaigns.
- Worked extensively with **AI tools and LLMs** during MSc Data Analytics coursework, applying **Python, scikit-learn, and statistical methods** to evaluate model outputs, assess performance metrics, and refine training approaches; built **Power BI and Tableau dashboards** to visualize evaluation results and communicate findings to non-technical stakeholders with clarity and precision.
- Demonstrated **open-minded approach to learning and quick adaptation** to new workflows and evaluation guidelines across banking-domain systems, ERP integrations, and enterprise business processes; maintained **strong sense of ownership and commitment to excellence** through UAT coordination, post-implementation triage, and cross-functional collaboration with domain experts, operations teams, and regulatory stakeholders, delivering **zero-defect quality** on 15+ production deployments.

SKILLS

AI Evaluation & Content Assessment – AI-generated output review, quality assessment, aesthetic judgment, editorial judgment, creative content evaluation, visual content analysis, inconsistency identification, improvement opportunity identification, structured evaluation guidelines, scoring criteria development.

Evaluation & Quality Assurance Workflows – annotation workflows, QA processes, moderation workflows, evaluation frameworks, best-practice development, workflow optimization, accuracy tracking, consistency assurance, training data development, LLM evaluation.

Communication & Documentation – written communication, verbal communication, critical feedback delivery, nuanced feedback, requirement gathering, cross-functional collaboration, stakeholder communication, training material development, documentation.

Data Analytics & Visualization – Power BI, Tableau, DAX, Power Query, data modelling, exploratory data analysis, statistical analysis, R, Python pandas, NumPy, scikit-learn.

Technical Stack – Python, SQL, PostgreSQL, MySQL, Oracle, AWS (EC2, S3, Lambda, CloudWatch), Splunk, Dynatrace, Docker, Linux, Git, Jenkins, Confluence, Jira.

Domain Expertise – payments processing, SWIFT messaging (MT/MX), ISO 20022, SEPA, cross-border payments, ERP systems, enterprise business systems, change-control management, regulatory compliance, GDPR, data protection.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
--	----------------

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021
---	----------------

PROJECTS

AI Training Quality Framework & Content Evaluation Pipeline (HCL Technologies)

- Architected and deployed an end-to-end **AI evaluation specification system** to assess AI-generated content across creative, visual, and editorial domains; defined **quality standards, scoring criteria, and structured evaluation guidelines** covering clarity, usability, consistency, and user experience across 8 distinct content categories.
- Implemented a **quality assurance and moderation workflow** using **Confluence documentation, Jira ticketing, and Python-based evaluation tracking scripts**; trained cross-functional teams on annotation best practices and consistency standards, achieving **97% inter-rater reliability** across 2,000+ independently-scored outputs.
- Developed **Power BI dashboards** to visualize evaluation metrics, scoring distributions, and model-improvement signals; identified **15 systematic weaknesses** in AI outputs through acute observational analysis and communicated **nuanced, actionable feedback** that informed 3 major model refinement cycles, improving user-experience scores by **28%**.
- Established **continuous improvement processes** for evaluation workflows by documenting lessons learned, refining guidelines, and adapting to evolving content types; reduced evaluation turnaround time by **33%** while maintaining high accuracy, processing 5,000+ assessments over 6-month period with zero quality escapes.

SWIFT Payments Dashboard & Operational Monitoring System (HCL Technologies)

- Designed and maintained a production-grade **AI-informed operational dashboard** for payments processing, applying **Splunk and Dynatrace monitoring** to assess transaction-flow clarity, alert usability, and end-user experience across payment-operations workflows; identified and resolved **12 UI/UX inconsistencies** that improved operator efficiency by **18%**.
- Collaborated with banking-domain **business analysts and regulatory stakeholders** to define quality criteria for **SWIFT MT/MX message rendering, ISO 20022 compliance visibility, and SEPA cross-border payment transparency**; ensured dashboard output met **GDPR and financial regulatory standards** through meticulous content review and impact assessment.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
