PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Reviewed and critically assessed **AI-generated outputs** across diverse content types for quality, clarity, usability, and user experience; identified inconsistencies, weaknesses, and improvement opportunities with **98% evaluation accuracy** using structured annotation guidelines and insightful feedback loops at HCL Technologies enterprise platforms.
- Applied **structured evaluation guidelines** and **scoring criteria** to assess production system outputs, monitoring dashboards, and application performance reports; maintained **high consistency** across evaluations by collaborating with cross-functional banking operations and business analysis teams to refine quality standards and define scoring rubrics.
- Demonstrated **exceptional reading comprehension** and **acute attention to detail** through SQL data validation, transaction reconciliation workflows, and SWIFT messaging format analysis; identified data inconsistencies in payment operations dashboards with **99.2% precision**, supporting regulatory compliance and audit trail accuracy.
- Delivered **high-quality, nuanced feedback** on system workflows and operational processes by synthesizing requirements from diverse stakeholders; contributed to enhancement of evaluation workflows and best practices across **15+ interconnected enterprise systems**, with **40% improvement** in UAT defect detection rates.
- Maintained **strong sense of ownership and reliability** in production-support environments, managing **P1/P2 incident response** with critical SLA commitments; demonstrated commitment to delivering actionable, consistent results through **Splunk and Dynatrace** log analysis, ensuring **99.8% system uptime** across banking and payments platforms.
- Brought **open-minded approach to learning** and quick adaptation to new workflows through exposure to diverse enterprise domains including banking payments, ERP systems, and business intelligence; applied **aesthetic and editorial judgment** in Power BI and Tableau dashboard design, translating technical outputs into clear, user-centric visualizations for business stakeholders.

SKILLS

AI Evaluation & Quality Assurance – critical assessment of AI-generated outputs, structured evaluation guidelines, scoring criteria development, annotation workflows, nuanced feedback synthesis, consistency and accuracy tracking.

Content Review & Analysis – exceptional reading comprehension, acute attention to detail, observational skills, aesthetic judgment, editorial review, inconsistency identification, improvement opportunity assessment.

Domain Knowledge & Compliance – SWIFT messaging (MT/MX formats), ISO 20022 message flows, SEPA and cross-border payments, PSD2 Open Banking, GDPR and regulatory compliance, payments operations, financial-services production environments.

Business & Technical Communication – written and verbal communication, cross-functional collaboration, stakeholder requirements gathering, UAT support, training material development, Confluence documentation, Jira ticketing.

Data Analysis & Quality Metrics – SQL (PostgreSQL, MySQL, Oracle), data validation, reconciliation workflows, Power BI dashboards, Tableau visualizations, Python data analysis (pandas, NumPy), statistical

accuracy measurement.

Production Support & Monitoring – incident response management, SLA tracking, operational alerting, Splunk and Dynatrace monitoring, system reliability assessment, log analysis, change-control management.

Enterprise Systems & Integration – ERP integration support, REST API workflows, enterprise business system analysis, interconnected system design, production environment governance, Git version control, Jenkins CI/CD pipelines.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

AI Output Quality Evaluation Framework & Workflow Automation (HCL Technologies)

- Architected and deployed a **comprehensive AI evaluation framework** combining **structured scoring criteria**, **annotation guidelines**, and **quality metrics dashboards** using **Power BI** and **Python**; enabled real-time assessment of AI-generated content across **8 distinct content categories** with **97% inter-rater consistency** across evaluation teams.
- Developed **critical feedback synthesis workflows** leveraging **SQL data warehousing** and **Python automation scripts** to process **5,000+ evaluations monthly**, identifying inconsistencies and improvement opportunities; reduced feedback turnaround by **35%** while maintaining **99.1% accuracy** in usability and clarity assessments.
- Collaborated with cross-functional stakeholders to define and refine **evaluation guidelines**, **scoring rubrics**, and quality standards; built **Tableau dashboards** visualizing evaluation trends, model performance gaps, and reviewer reliability metrics, enabling data-driven model-training decisions that improved downstream AI output quality by **28%**.
- Established **quality assurance and best-practices documentation** in Confluence, codifying evaluation methodologies and workflow standards; trained **12+ team members** on annotation protocols and aesthetic/editorial judgment criteria, achieving **rapid onboarding** and consistent high-quality evaluations across geographically distributed teams.
- Implemented **continuous workflow enhancement processes** through iterative feedback loops with banking and business-intelligence stakeholders; optimized evaluation templates and scoring logic based on **observational insights**, reducing ambiguity in edge-case scenarios by **42%** and strengthening overall system reliability.

SWIFT Payments Operations Evaluation & Compliance Assessment Platform (HCL Technologies)

- Reviewed and assessed **SWIFT messaging outputs** (MT/MX formats) across a production payments-operations dashboard supporting a major banking client; applied **ISO 20022 message flow evaluation** standards and **regulatory compliance guidelines** (GDPR, SEPA standards) to ensure **100% audit-trail accuracy** and **zero compliance violations** across **50,000+ monthly transactions**.
- Provided **insightful, nuanced feedback** on payment reconciliation workflows and cross-border transaction visibility; identified critical inconsistencies in transaction-flow documentation and operational alerting logic, resulting in **corrective actions** that eliminated **12 high-severity SLA breaches** and strengthened **99.7% message-delivery accuracy**.
- Collaborated with banking-domain business analysts and operations teams to define and refine quality standards for payments-processing outputs; applied **strong observational and aesthetic judgment** to

transaction-dashboard design and reporting clarity, ensuring executive and operational stakeholders received **clear, actionable insights** for daily operations and regulatory reporting.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
