PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **AWS infrastructure** across **EC2, S3, RDS, and CloudWatch** for enterprise Java/Spring Boot applications, managing production reliability with **SLA compliance of 99.8%** and implementing automated failover mechanisms across multiple availability zones.
- Automated infrastructure provisioning and configuration using **Terraform** and **CloudFormation** templates, reducing manual deployment time by **70%** and eliminating configuration drift across **IAM, VPC, and network security policies** for banking-domain workloads.
- Developed and maintained **Python and Bash scripts** for operational automation, infrastructure orchestration, and scheduled reporting pipelines, improving incident response time by **45%** and enabling self-service cloud resource provisioning for cross-functional teams.
- Implemented robust **identity and access management (IAM)** policies, **VPC network configurations**, and **security best practices** ensuring compliance with financial-services regulatory requirements (GDPR, audit trails, change-control), with zero unauthorized access incidents across **12-month production cycle**.
- Monitored system performance, troubleshooted infrastructure issues, and optimized **AWS CloudWatch** dashboards and alarms, reducing mean-time-to-resolution (MTTR) by **40%** for P1/P2 incidents and achieving **99.9% service availability** in production environments.
- Collaborated with banking operations teams, business analysts, and regulatory stakeholders in a customer-facing capacity to deliver scalable, fault-tolerant cloud solutions, coordinating UAT, post-implementation triage, and cross-system integrations via REST APIs across **EC2, RDS, and S3**.

SKILLS

AWS Core Services – EC2, S3, RDS, IAM, VPC, CloudWatch, Lambda.

Infrastructure as Code – Terraform, CloudFormation, Git, CI/CD pipelines (Jenkins).

Linux Administration & Automation – Bash scripting, shell scripting, Linux system administration, cron jobs, log analysis.

Python Development – Python scripting, automation, data pipelines, ETL, REST API integration, troubleshooting utilities.

Cloud Security & Networking – IAM policies, VPC configuration, security best practices, network troubleshooting, compliance (GDPR, audit trails, change-control).

Monitoring & Troubleshooting – CloudWatch, Splunk, Dynatrace, system performance optimization, incident management, MTTR reduction.

Additional Technical Skills – Java Spring Boot, SQL (PostgreSQL, MySQL, Oracle), Docker, REST APIs, Jira, Confluence, Agile/Scrum.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Multi-Region AWS Infrastructure Automation & Disaster Recovery Platform (HCL Technologies)

- Architected and deployed a **Terraform-based Infrastructure as Code framework** for provisioning and managing **EC2, RDS, S3, IAM, and VPC resources** across two AWS regions, enabling automated disaster recovery failover in under **15 minutes** (RTO) and reducing infrastructure setup time from **3 weeks to 2 days**.
- Implemented comprehensive **CloudWatch monitoring dashboards, alarms, and custom metrics** across compute, database, and network layers, integrated with **SNS notifications** and **Lambda-based automated remediation**, reducing manual incident triage by **60%** and achieving **99.95% service uptime**.
- Developed **Python and Bash automation scripts** for infrastructure health checks, log aggregation, resource tagging compliance, and cost optimization across **EC2 and S3**, saving **\$180K annually** through reserved instance optimization and unused resource cleanup.
- Secured all AWS resources with least-privilege **IAM policies, VPC network segmentation, security group rules, and encryption at rest/in transit**, ensuring compliance with financial-services regulatory requirements and passing **100% of security audits** with zero findings.
- Collaborated with banking operations teams and security stakeholders to design highly available, fault-tolerant architectures across availability zones, coordinating change-management procedures, UAT validation, and post-deployment monitoring for **3 production environments** serving **50+ internal users**.

SWIFT Payments Operations Dashboard & Cloud Migration (HCL Technologies)

- Deployed and maintained a **SWIFT messaging and payments-operations dashboard** on **AWS EC2 and RDS**, providing real-time transaction-flow visibility and operational alerting for payment messages, supporting **500+ daily SWIFT MT/MX transactions** with **99.99% availability SLA**.
- Implemented **Python-based ETL pipelines** for **ISO 20022 message parsing and reconciliation workflows**, automating compliance reporting and reducing manual reconciliation effort by **75%** across SEPA, instant payments, and cross-border payment channels.
- Designed **IAM and VPC network policies** ensuring PSD2 and GDPR compliance with audit trails, change-control procedures, and regulatory oversight, coordinating with banking-domain business analysts and compliance teams to deliver a secure, auditable cloud environment.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
