PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **resilient, scalable infrastructure** on **AWS (EC2, S3, Lambda, CloudWatch)** supporting enterprise Java/.NET applications in production, achieving **99.8% uptime** through robust monitoring and **SLA-driven incident response** for P1/P2 events across banking and payments domains.
- Implemented and optimized **CI/CD pipelines** using **Jenkins** with **Git branching strategies** and automated code reviews, reducing deployment cycle time by **40%** and enabling rapid, reliable releases across development, staging, and production environments.
- Automated infrastructure provisioning, configuration management, and system monitoring using **Linux shell scripting, cron jobs, Python automation scripts**, and **Splunk / Dynatrace / CloudWatch observability**, improving operational efficiency by **35%** and enabling proactive alerting for **system health and performance** anomalies.
- Implemented **robust access management and secrets handling** across interconnected enterprise systems by enforcing security best practices, enforcing least-privilege **IAM principles**, and managing sensitive credentials for cross-system integrations via REST APIs and database-level data flows across **PostgreSQL, MySQL, Oracle**.
- Collaborated cross-functionally with distributed operations teams, BAs, and stakeholders on infrastructure troubleshooting, change-control coordination for production deployments, and post-go-live support across **large-scale, distributed systems** serving banking clients with mission-critical SWIFT messaging and payments processing workflows.
- Developed comprehensive **infrastructure automation and monitoring dashboards** using **Power BI and Tableau** to consolidate logs, performance metrics, and deployment statuses from **Prometheus, Grafana, CloudWatch, Splunk**, enabling real-time visibility and reducing incident triage time by **45%** across microservices and containerized environments.

SKILLS

Cloud Platforms & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Azure, GCP, Digital Ocean, Linux system administration, networking fundamentals.

Containerization & Orchestration – Docker, Kubernetes, container networking, cluster management, microservices architectures.

Infrastructure as Code & Automation – Terraform, Ansible, configuration management, provisioning automation, Python scripting, shell scripting, cron job scheduling.

CI/CD & Deployment – Jenkins pipelines, Git branching strategies, automated code reviews, blue-green deployments, rapid and reliable release automation.

Monitoring, Logging & Observability – Prometheus, Grafana, Splunk, Dynatrace, CloudWatch, centralized logging solutions, system health and performance metrics.

Security & Access Management – IAM principles, secrets management, key rotation, least-privilege access control, security best practices enforcement.

DevOps & Agile Methodologies – Agile/Scrum ceremonies, change-control management, cross-functional collaboration, incident response (P1/P2), SLA management, remote team communication.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Multi-Region Kubernetes GitOps Platform with Automated Blue-Green Deployments (HCL Technologies)

- Architected and deployed a **Kubernetes-orchestrated, multi-region infrastructure** using **Terraform Infrastructure as Code** and **Ansible configuration management** to manage containerized microservices across AWS and Azure, reducing manual provisioning time by **60%** and enabling self-service deployments for 8+ global development teams.
- Implemented **blue-green deployment automation** with **GitOps CI/CD pipelines** (Jenkins, Git) coupled with **Terraform state management** and **Ansible orchestration**, achieving **zero-downtime releases** and reducing deployment duration from **45 minutes to 8 minutes** while maintaining 100% rollback capability.
- Engineered comprehensive **monitoring, logging, and observability** across the platform using **Prometheus metrics collection**, **Grafana dashboards**, **ELK centralized logging**, and **Splunk alerting**, providing real-time visibility into **system health and performance** and reducing incident detection time to **under 2 minutes**.
- Enforced **IAM principles, secrets management, and security best practices** across all infrastructure layers using HashiCorp Vault for credential rotation, AWS IAM role-based access control, and Kubernetes RBAC, achieving SOC 2 compliance and eliminating **100% of hardcoded secrets** from pipelines and configuration files.
- Automated infrastructure provisioning for 40+ microservices deployed across Kubernetes clusters, reducing manual setup time by **70%** and enabling on-demand scaling to handle **10x traffic spikes** during peak transaction periods in the payments processing domain.

SWIFT Payments Dashboard Infrastructure Monitoring & Reliability Engineering (HCL Technologies)

- Designed and maintained **scalable, resilient cloud infrastructure** on AWS (EC2, S3, Lambda, CloudWatch) supporting a mission-critical SWIFT messaging and payments-operations dashboard processing **500K+ daily transactions** across SEPA instant payments, ISO 20022 message flows, and cross-border payment operations.
- Implemented **robust monitoring and alerting** using **Dynatrace, Splunk, CloudWatch** with automated **SLA-driven incident response** procedures, achieving **99.95% uptime** and reducing mean time to resolution (MTTR) for P1 payment flow disruptions from **30 minutes to 8 minutes**.
- Automated operational tasks and data validation workflows using **Python scripting and Linux shell automation** for transaction reconciliation across **PostgreSQL and Oracle databases**, reducing manual reconciliation effort by **50%** and ensuring 100% audit trail compliance for regulatory reporting and GDPR data protection requirements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
