PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Supported 2nd line risk oversight and challenge activities by conducting **Risk Assessments** and **Risk Reviews** on enterprise Java/.NET applications using **Splunk**, **CloudWatch**, **Dynatrace** monitoring platforms; tracked improvement actions and regulatory compliance (GDPR, Data Protection) across **P1/P2 incident response** workflows, ensuring SLA adherence and audit trail integrity for financial-services production environments.
- Collaborated with **Chief Risk Officer and ERM team** to embed **Enterprise Risk Management (ERM) framework** methodologies through production support and operational alerting; designed **risk reporting dashboards** using **Power BI** and **Tableau** for Risk Governance committees, delivering 25+ **monthly risk governance reports** with emerging-risk visibility and remediation tracking across interconnected systems.
- Strengthened organizational **risk management culture** by developing and delivering **training materials**, user guides, and governance documentation via **Confluence**; supported adoption of **Group Risk Management tools and templates** across 1st and 2nd line teams, resulting in **40% faster risk assessment cycle time** and standardized risk-response workflows.
- Performed **risk monitoring activities** and **assurance reviews** on SWIFT messaging / payments-operations dashboards serving banking clients; managed **regulatory compliance** for **ISO 20022 message flows**, **SEPA**, and **cross-border payments** processes; provided subject-matter expertise on **PSD2 / Open Banking** and tokenization concepts to support governance sign-offs and audit-trail validation.
- Supported **1st line risk responses** through technical review and challenge of proposed mitigations on ERP and enterprise business systems; coordinated **change-control management** for system configuration updates and **UAT coordination** across interconnected **PostgreSQL**, **MySQL**, **Oracle** databases; documented risk-control effectiveness with **data validation** and reconciliation workflows achieving **99.2% transaction-flow accuracy**.
- Assisted with **Risk Governance process coordination** and reporting to Risk Oversight Committees using **Jira**, **Confluence** and automated **Python scripting** for data pipelines; consolidated risk data from multiple business systems via **REST APIs** and ETL processes, enabling **real-time risk-position visibility** and emerging-risks escalation across the organization.

SKILLS

Enterprise Risk Management – ERM framework, Risk Assessments, Risk Reviews, 2nd line risk oversight, Risk Identification and Assessment, Risk Response, Risk Monitoring, Assurance activities.

Risk Governance & Reporting – Risk reporting, Risk Governance process, Emerging Risks reporting, Risk culture promotion, governance documentation, Risk Oversight Committee coordination.

Regulatory & Compliance – GDPR, Data Protection, Insurance regulation, ISO 20022, SEPA, PSD2, Open Banking, audit trails, change-control management, regulatory compliance frameworks.

Business Intelligence & Analytics – Power BI, Tableau, DAX, Power Query, data modelling, data warehousing, dashboard development, KPI reporting, Executive reporting.

Enterprise Systems & Integration – ERP systems, REST APIs, system integrations, cross-system data flows, PostgreSQL, MySQL, Oracle, business-system support, configuration management.

Data Engineering & Automation – Python scripting, ETL pipelines, data validation, SQL queries, Splunk, CloudWatch, Dynatrace, incident monitoring, SLA management.

Tools & Platforms – Jira, Confluence, Jenkins, Git, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, shell scripting.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Enterprise Risk Management Framework & Governance Dashboard (HCL Technologies)

- Architected and deployed an integrated **ERM reporting platform** combining **Power BI dashboards** with **Python ETL pipelines** to consolidate risk data from 15+ enterprise systems (ERP, payments operations, banking platforms) via **REST APIs** and **SQL data warehousing**; reduced risk governance report production time by **60%** (from 5 days to 2 hours).
- Designed **Risk Assessment and Risk Review workflows** embedded into **Jira** with automated **DAX-driven metrics** for emerging-risks identification, 2nd line challenge activities, and regulatory compliance tracking (GDPR, ISO 20022, PSD2); enabled **40 concurrent risk reviews monthly** across business units with **100% audit-trail integrity**.
- Developed comprehensive **training materials and governance documentation** in **Confluence** covering ERM framework adoption, Risk Governance process, and 1st line risk-response templates; delivered 8 live training sessions to 200+ staff across operations, finance, and IT, achieving **92% framework adoption** and **35% reduction in policy-exception requests**.
- Implemented **real-time risk monitoring dashboards** using **Splunk and CloudWatch alerts** for payments operations and enterprise business systems, providing **P1/P2 incident escalation visibility** to Risk Oversight Committees; integrated **change-control logs** and **assurance data** to demonstrate risk-control effectiveness across **99.7% SLA compliance**.

SWIFT Payments Risk & Regulatory Compliance Monitoring System (HCL Technologies)

- Led 2nd line risk oversight of a SWIFT messaging / payments-operations dashboard supporting a banking client, implementing **ISO 20022 message validation** and **regulatory compliance controls** (GDPR, PSD2, SEPA, cross-border payments); reduced transaction-flow anomalies by **45%** through automated **SQL data validation** and reconciliation workflows.
- Designed risk-assessment templates and emerging-risks reporting mechanisms for payments operations, enabling **Risk Governance committees** to review tokenization, open-banking, and regulatory change impacts; documented **25+ monthly risk reviews** with audit-trail evidence supporting external regulatory audits and internal compliance sign-offs.
- Collaborated with banking-domain business analysts and operations teams to support **UAT coordination** and **change-control management** for payment-flow configuration updates; provided **subject-matter expertise** on SWIFT standards and financial-services risk methodologies, reducing post-implementation incidents by **38%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
