PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided remote technical advice and troubleshooting for vehicle diagnostics and care to a fleet of **~1,500 drivers**, resolving an average of **20-25 daily inquiries**.
- Coordinated vehicle maintenance and breakdown support, managing service bookings and liaising with repair centres to minimize vehicle downtime by approximately **15%** on average.
- Served as the technical liaison between clients and repair networks, clearly communicating vehicle issues and ensuring efficient, necessary repairs were performed.
- Maintained accurate daily logs of all vehicle maintenance activities and updates within the company's **internal fleet management system**.
- Collaborated within a supportive **operations team** to achieve and exceed key service targets, contributing to a sustained customer satisfaction rating of over **90%**.
- Developed Python scripts to automate the generation of weekly maintenance reports for a fleet of **over 1,000 vehicles**, reducing manual reporting effort by **~8 hours per week**.
- Managed incident response and production support for enterprise applications, ensuring adherence to SLAs and performing root cause analysis for critical issues across systems monitored by **Splunk and Dynatrace**.

SKILLS

Vehicle Systems – Vehicle Diagnostics, Vehicle Care, Mechanical Knowledge, Modern Vehicle Understanding

Operations & Support – Technical Advice, Maintenance Coordination, Breakdown Support, Service Bookings, Garage Liaison, Customer Service, Fleet Management

System & Data Management – Daily Logs, Internal Systems, Data Validation, Reporting, Change Management

Software & Tools – Microsoft Excel, Microsoft Word, Python, Splunk, Dynatrace, Jira, Confluence

Programming & Scripting – Python, Shell Scripting

Database & Cloud – SQL, PostgreSQL, MySQL, Oracle, AWS

PROJECTS

Automated Fleet Maintenance Reporting System (HCL Technologies)

- Developed a Python-based reporting tool to automate the extraction and aggregation of maintenance data from vehicle logs and repair center records for a fleet of **over 1,000 vehicles**.
- Implemented data validation checks using SQL queries against PostgreSQL to ensure the accuracy of maintenance entries, reducing data discrepancies by **~20%**.
- Designed and generated weekly summary reports in CSV format, detailing service history, upcoming maintenance, and repair costs, which were distributed to operations managers.

Vehicle Technical Issue Triage and Resolution Workflow

- Designed a workflow for triaging incoming technical support requests from drivers, categorizing issues based on severity and required expertise.
- Created a knowledge base of common vehicle problems and their resolutions, accessible to support staff, which decreased average resolution time for standard queries by **18%**.
- Collaborated with a small team to define escalation paths and communication protocols for complex mechanical issues requiring specialist garage intervention.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
