PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained Java Spring Boot REST APIs for internal financial data exchange, ensuring robust error handling and seamless integration with downstream systems.
- Designed and implemented data persistence layers using **Hibernate** and JPA, managing complex relational schemas across PostgreSQL and Oracle databases to support reporting requirements.
- Wrote JUnit and Mockito tests to achieve over 90% code coverage for new Java modules, significantly reducing post-deployment defects.
- Participated in sprint planning and technical estimation sessions, contributing to the accurate scoping of new features for the payments operations dashboard.
- Collaborated with cross-functional teams including business analysts and operations to gather requirements for fee-related system enhancements and UAT coordination.
- Managed client and internal finance queries related to fee arrangements, ensuring timely resolution and comprehensive documentation of issues and solutions.
- Containerized Java microservices using **Docker** and deployed them to an AWS EC2 environment, configuring basic resource limits for predictable performance.

SKILLS

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

BI & Data Analytics – Power BI, Tableau, DAX, Power Query, data modelling, data warehousing

Tools & Methodologies – Jira, Confluence, Agile/Scrum, Linux, Shell Scripting, Splunk, Dynatrace

PROJECTS

Enterprise Java Fee Management System

- Developed a **Java Spring Boot** application to manage client fee structures, integrating with **PostgreSQL** for data storage and retrieval.
- Implemented RESTful APIs for fee data access, enabling consumption by downstream reporting tools and client services teams.
- Authored comprehensive unit tests using **JUnit** and Mockito, ensuring the reliability of fee calculation and data persistence logic.

Automated Client Billing Data Pipeline

- Engineered a **Python** data pipeline to extract, transform, and load fee data from disparate sources into a central data warehouse.
- Automated the generation of client billing summaries and payment instructions using **pandas** and SQL, reducing manual processing time by approximately 40%.
- Developed scheduled reporting scripts that fed into the month-end close process, ensuring timely revenue recognition for a portfolio of ~15 key clients.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
