PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and deployed **Python**-based data processing pipelines on **AWS Lambda**, handling approximately 3,500 events per second during peak hours to replace a legacy batch system.
- Managed and optimized **CI/CD pipelines** using **Jenkins** and **Git**, implementing automated testing stages and code reviews to improve deployment frequency by **20%**.
- Containerized microservices using **Docker** and orchestrated deployments to **AWS EC2** instances, improving application portability and reducing environment setup time.
- Collaborated with engineering and QA teams to implement **DevOps best practices**, focusing on secure and scalable delivery of AI-driven applications and services.
- Automated infrastructure provisioning and configuration management using **Python scripts** and **Ansible**, ensuring consistency across development, staging, and production environments.
- Monitored and optimized application performance and infrastructure health using **Splunk** and **CloudWatch**, contributing to a **15%** reduction in critical incidents.
- Developed and maintained **REST APIs** using **Java Spring Boot** for seamless integration between backend services and frontend applications.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

CI/CD & Automation – Jenkins, GitHub Actions, Git, Python scripting, Ansible

Containerization & Orchestration – Docker, Kubernetes

Programming & Scripting – Python, Java, Spring Boot

Infrastructure & Operations – Linux, Bash scripting, Monitoring (Splunk, Dynatrace), Infrastructure as Code

Development Tools – Jira, Confluence

PROJECTS

Automated Cloud Infrastructure Deployment

- Developed a suite of **Python scripts** and **Ansible playbooks** to automate the provisioning and configuration of cloud infrastructure on **AWS**, including EC2 instances and S3 buckets.
- Integrated automated testing and security scanning tools into the **CI/CD pipeline**, reducing deployment errors by **18%** and ensuring adherence to security best practices.
- Documented infrastructure-as-code processes and deployed services using **Docker** containers, enabling faster and more reliable application rollouts.

CI/CD Pipeline Enhancement for Microservices

- Refactored existing **Jenkins pipelines** to support multiple microservices, implementing parallel build and test stages that decreased average build times by **30%**.
- Implemented automated deployment strategies to **Kubernetes** clusters, including health checks and rollback mechanisms to ensure high availability.
- Collaborated with development teams to integrate code quality checks and vulnerability scans (e.g., **Bandit**) directly into the pipeline, improving overall code security.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
