PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed scalable software solutions and REST APIs for enterprise digital platforms using **Python (FastAPI, Flask)**, incorporating **Object-Oriented Programming** and **asynchronous programming** principles.
- Contributed to the deployment and operation of **containerized solutions** on **AWS**, adhering to cloud-native principles and managing infrastructure with **Docker**.
- Implemented and maintained **CI/CD pipelines** using **GitHub Actions** and **ArgoCD**, automating build, test, and deployment processes for faster iterative delivery.
- Collaborated within **Agile/Scrum** frameworks to deliver iterative software outcomes, actively participating in sprint planning, backlog refinement, and daily stand-ups.
- Supported unit, integration, and performance testing using **PyTest**, practicing **Test-Driven Development (TDD)** to ensure code quality and maintainability.
- Assisted in implementing security best practices, including **AuthN/AuthZ** mechanisms like **OpenID/OAuth2**, and conducted **container vulnerability scanning**.
- Worked with product management, cloud architecture, and data science teams to translate business requirements into technical solutions, delivering on key project objectives.

SKILLS

Backend Development – Python, FastAPI, Flask, Java, Spring Boot, REST APIs, OOP, Async programming, Pydantic

Cloud & DevOps – AWS, Docker, Kubernetes, CI/CD, GitHub Actions, ArgoCD, Cloud-native principles, Containerization

Databases – SQL, PostgreSQL, MySQL, Oracle, NoSQL

Testing & Quality Assurance – PyTest, TDD, BDD, Code Reviews, Pair Programming

Agile Methodologies – Scrum, Kanban, Jira, Confluence

Security – AuthN/AuthZ, OpenID, OAuth2, Container vulnerability scanning

PROJECTS

AI-Powered Automation Platform

- Developed a **Python FastAPI** backend service to integrate **AI models** for data intelligence, handling approximately 2,800 requests per hour.
- Engineered data pipelines using **pandas** and **SQL** to prepare datasets for model training, ensuring data integrity and format compatibility.
- Containerized the application using **Docker** and deployed it to an **AWS ECS** cluster, establishing basic monitoring and logging.

Scalable REST API for Enterprise Systems

- Designed and built a **Java Spring Boot** REST API to facilitate cross-system integrations, supporting ~150 concurrent user sessions.
- Implemented **JPA** with **PostgreSQL** for data persistence, managing schema changes and optimizing query performance for critical business workflows.
- Integrated the API with an existing enterprise dashboard, providing real-time operational data for internal teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
