PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing RESTful APIs for inter-service communication and handling approximately **1,500 requests per minute** during peak loads.
- Engineered and optimized **Hibernate** queries and persistence layers for a critical enterprise application, improving data retrieval efficiency by **18%** and reducing database contention.
- Designed and implemented reusable Java components and modules following **Object-Oriented Design Principles**, enhancing code modularity and supporting a **15% faster** feature development cycle for the team.
- Contributed to the design and implementation of features for internet-connected (IoT) lighting and sensing systems, integrating **cloud, mobile, and IoT components**.
- Participated in **Agile ceremonies** including sprint planning and retrospectives, contributing to technical estimations and adapting to evolving project requirements.
- Assisted in identifying and resolving software defects and performance bottlenecks within the IoT platform, contributing to a **12% reduction** in critical bug reports.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, managing configurations and ensuring consistent environments across development and staging.

SKILLS

Programming Languages – JavaScript, Python, C#, C++, HTML

Web Technologies – React, Node.js

Cloud Platforms – Azure, AWS

Databases & Tools – SQL, Git, Selenium, Xunit, Nunit

Methodologies – Agile, Scrum, TDD

Concepts – IoT, APIs, Back-end Development, Relational Databases

PROJECTS

IoT Device Management Platform Backend

- Developed RESTful APIs using **Java Spring Boot** to manage device registration, status updates, and configuration for a fleet of 500+ IoT devices.
- Integrated with **AWS IoT Core** for device communication and data ingestion, implementing message routing to a backend service for real-time processing.
- Authored unit tests with **JUnit**, achieving over **85% code coverage** for critical API endpoints and ensuring application stability.

Smart Lighting Control System Integration

- Built a Python data processing pipeline to ingest and transform sensor data from smart lighting devices, preparing it for analysis and visualization.
- Developed features for a **React** frontend application to display real-time device status and control lighting parameters, interacting with the backend APIs.
- Collaborated with product managers to define requirements for new control features, supporting the integration into the customer-facing application.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
