PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for enterprise applications, handling a daily average of **5,000 requests** and supporting cross-system integrations.
- Implemented data validation and transformation logic using **Python** for ETL processes, ensuring data integrity for downstream reporting and analytics.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes within **strict SLA** targets using **Splunk** and **Dynatrace** for monitoring.
- Designed and documented validation reports for financial risk models, including derivative valuation and risk measurement models, presenting findings to stakeholders.
- Provided quantitative support to the wider Financial Risk team, assisting with data analysis and model-related queries to inform risk assessments.
- Collaborated with model developers and business stakeholders to track and drive validation action items to completion, ensuring alignment on project timelines.
- Containerized Java applications using **Docker** and deployed them to **AWS EC2** instances, streamlining the deployment process and improving environment consistency.

SKILLS

Languages – Python, Java, SQL, R

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Financial Risk – Risk Analysis, Risk Modelling, Derivative Valuation, VaR, xVA Models, Financial Products, Behavioural Models

PROJECTS

Financial Transaction Monitoring System Enhancement

- Developed Python scripts to automate the parsing and analysis of financial transaction logs, identifying patterns in failed transaction messages for an operations dashboard.
- Implemented SQL queries against a **PostgreSQL** database to extract and validate transaction data, ensuring accuracy for reconciliation workflows and audit trails.
- Collaborated with operations teams to refine alerting mechanisms, reducing manual triage effort by an estimated **15%** through enhanced anomaly detection.

Quantitative Risk Model Validation Framework

- Built Python scripts to automate the data extraction and pre-processing steps for validating risk models, reducing manual data preparation time by **30%**.
- Developed analytical functions in **R** to perform statistical tests and scenario analysis on model outputs, contributing to the assessment of model performance against benchmarks.
- Documented the validation process and findings in comprehensive reports, ensuring clarity and traceability for internal review and regulatory compliance.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
