## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Produced and validated actuarial liability data sets for economic scenarios, supporting IFRS and SII reporting requirements for a cross-border life insurer.
- Assisted in the production of solvency and IFRS movement analysis and projections, contributing to the financial health assessment of the company.
- Supported the streamlining and automation of existing actuarial reporting processes using Python scripting, reducing manual effort by approximately **30%**.
- Provided actuarial support on various project initiatives, including new model developments and annual assumption setting exercises.
- Contributed to the development and implementation of risk function deliverables under Solvency II, assisting in capital calculations and movement analysis.
- Supported the production of risk management communications to the business, including drafting content for **risk dashboards** and committee papers.
- Containerized actuarial and risk analysis tools using **Docker** and deployed them to **AWS EC2** instances, ensuring consistent execution environments for reporting.

## SKILLS

**Actuarial** – Actuarial Liability Data, Economic Scenarios, IFRS, SII Reporting, Solvency II, Standard Model, Internal Model, ORSA, Actuarial Reserves, Assumption Setting

**Data Analysis & BI** – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Warehousing, Statistical Analysis, R, RStudio

**Programming & Scripting** – Python, Java, Spring Boot, SQL, pandas, NumPy, scikit-learn, Flask, FastAPI

**Cloud & DevOps** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

**Business Systems** – ERP Integration, Change Management, Jira, Confluence, Production Support, Incident Response

## PROJECTS

### Actuarial Reporting Automation (HCL Technologies)

- Developed Python scripts to automate the extraction and transformation of transaction data from PostgreSQL and Oracle databases for actuarial reporting.
- Implemented data validation checks within Python scripts to ensure the accuracy of liability data and economic scenario inputs, reducing data error rates by **~15%**.
- Generated scheduled reports in CSV and Excel formats using pandas, which were then used by business analysts for IFRS and SII compliance.

### Risk Management Dashboard Enhancement (HCL Technologies)

- Designed and developed interactive dashboards in **Power BI** to visualize key risk indicators and Solvency II capital requirements for financial services operations.
- Wrote complex **DAX** measures to aggregate and analyze solvency capital projection data, providing insights into potential future capital needs.
- Collaborated with operations teams to gather requirements for risk reporting, ensuring the dashboards met their analytical needs for internal model support.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
