PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **SwiftUI** applications for device management, contributing to core product features used by thousands of employees.
- Collaborated with senior engineers to understand business requirements and translate them into technical specifications for **MDM** and **Asset Management** systems.
- Participated in code reviews, applying **best practices** and contributing to a culture of continuous learning and improvement within the team.
- Troubleshoot and resolved software issues on **Apple platforms**, including macOS and iOS, ensuring smooth operation of critical employee tools.
- Explored and integrated emerging **AI tools** into development workflows, identifying opportunities to enhance engineering efficiency and product capabilities.
- Designed and implemented REST APIs using **Java Spring Boot** for cross-service data exchange, managing request validation and circuit-breaker patterns.
- Containerized applications with **Docker** and deployed to **AWS EKS**, configuring Helm charts and resource limits for predictable rollouts.

SKILLS

Languages – Swift, SwiftUI, Java, Python, SQL, R, TypeScript

Frameworks & Libraries – Spring Boot, scikit-learn, pandas, NumPy, Node.js, NestJS

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes (EKS), Jenkins, Git, CI/CD, Terraform

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, RStudio

Concepts – Object-Oriented Design, REST APIs, Agile/Scrum, Data Analytics, Machine Learning Fundamentals, AI/Generative AI

PROJECTS

SwiftUI Device Management Application

- Developed a **SwiftUI** application for managing a fleet of **macOS and iOS devices**, enabling IT administrators to perform common tasks remotely.
- Integrated with internal device management APIs to retrieve device status, inventory details, and initiate software distribution tasks, impacting **over 5,000 devices**.
- Implemented user authentication and authorization flows to ensure secure access to device management functionalities.

Python Scripting for Asset Inventory Automation

- Created **Python** scripts to automate the collection and aggregation of asset inventory data from disparate sources, including device logs and configuration files.
- Developed ETL processes using **pandas** to clean, transform, and load inventory data into a central repository, reducing manual data entry effort by **approximately 40%**.
- Generated scheduled reports summarizing asset status and compliance metrics for IT operations teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
