PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed the **production environment** for a financial-services operations dashboard, responding to P1/P2 incidents and ensuring SLA adherence for transaction monitoring workflows.
- Developed **Python scripts** to automate data extraction and reporting for enterprise business systems, processing approximately 15 GB of data daily.
- Implemented **Java Spring Boot** microservices for cross-system integrations, including designing and consuming REST APIs to facilitate data exchange between operational platforms.
- Coordinated with **global partners and external service providers** to resolve infrastructure incidents with urgency and provide clear, concise updates on managed issues.
- Maintained and upgraded existing **network infrastructure** components to meet current standards, ensuring system integrity and performance across the global enterprise network.
- Contributed to the development of **technical and procedural documentation** for network operations, standardizing procedures for common issues and system configurations.
- Containerized network services using **Docker** and deployed them to **AWS EC2** instances, managing configurations and ensuring resource availability for critical operations.

SKILLS

Networking – IPv4, IPv6, BGP, LAN, WAN, Cisco, Arista, Palo Alto, Fortinet, Juniper JNCIA

Cloud & Virtualization – AWS (EC2, S3, Lambda, CloudWatch), Docker

Programming & Scripting – Java, Python, Spring Boot, REST APIs

Databases – PostgreSQL, MySQL, Oracle, SQL

Operations & Monitoring – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Linux Shell Scripting

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn

PROJECTS

Enterprise Network Operations Dashboard

- Developed a monitoring dashboard using **Java Spring Boot** and **PostgreSQL** to provide real-time operational visibility into network health across enterprise campuses and data centers.
- Integrated **Splunk** data streams to surface critical network events and alerts, enabling faster incident triage and reducing mean time to resolution by approximately 20%.
- Designed and implemented automated alert correlation logic, reducing alert noise by 35% for the network operations team.

Automated Network Configuration Management

- Created **Python scripts** to automate the deployment and configuration of network devices, targeting Cisco and Arista hardware.
- Integrated scripts with **Jenkins CI/CD pipelines** to manage rolling updates of network device configurations, improving deployment consistency across 50+ network nodes.
- Developed shell scripts for log analysis on **Linux** servers, identifying common configuration drift patterns and informing preventative measures.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
