PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot** microservices for processing high-volume financial transactions, handling approximately **1,500 requests per second** during peak hours.
- Implemented asynchronous message processing using **Kafka** and **Spring Cloud Stream** to build an event-driven architecture, ensuring reliable data flow across distributed systems.
- Designed and implemented RESTful APIs in **Java** for integration with trading platforms and analytics services, adhering to strict design patterns and code quality standards.
- Contributed to architectural decisions for system reliability and performance improvements, participating in technical reviews of distributed system designs.
- Collaborated with cross-functional teams to define and estimate technical tasks for upcoming development sprints, ensuring alignment with project goals.
- Wrote **JUnit** and **Mockito** tests for core Java components, achieving over **85% code coverage** for critical business logic modules.
- Containerized Java applications using **Docker** and managed deployments on **AWS EC2** instances, configuring basic resource limits and networking.

SKILLS

Languages – Java, SQL, Python, R

Frameworks & Libraries – Spring Boot, Spring Cloud Stream, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn

Messaging & Distributed Systems – Kafka, RabbitMQ, Distributed Systems, Concurrency, Scalability

Databases – Oracle, PostgreSQL, MySQL

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Tools & Methodologies – Git, Jenkins, Jira, Confluence, Agile, Scrum

PROJECTS

Distributed Java Transaction Processor

- Engineered a **Java Spring Boot** application to process and enrich financial transaction messages, integrating with **Kafka** for high-throughput ingestion.
- Implemented fault-tolerant mechanisms and retry strategies for message processing, reducing data loss incidents by **40%** in simulated failure scenarios.
- Developed comprehensive **JUnit** test suites to validate business logic and ensure the stability of the distributed system components.

Java API for Trading Analytics

- Built a **Java**-based RESTful API service using **Spring Boot** and **Hibernate** to expose trading data for downstream analytics platforms.
- Designed database schemas and wrote **SQL** queries for efficient data retrieval from an **Oracle** database, optimizing report generation times by **30%**.
- Documented API endpoints and usage patterns, facilitating integration for the analytics team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
