PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **Claude-powered applications** to address specific operational challenges within the aviation sector, moving between business analysis and development tasks.
- Facilitated communication between business stakeholders in Operations, Maintenance, and Engineering, and the Innovation Team, delivering regular progress and status reports.
- Mapped business processes using **BPMN 2.0** and applied lean methodologies to define problems, measure current performance, and identify root causes for process improvement.
- Designed and implemented scalable, cost-effective solutions focused on increasing productivity and reducing costs across aviation operations, leveraging **AI-powered analysis**.
- Managed project activities through feasibility, initiation, planning, execution, and closure, adhering to standardised platforms for task, milestone, and risk tracking.
- Built Python scripts to automate data extraction and transformation for operational reporting, processing approximately **15,000 records** daily for analysis.
- Containerised Java Spring Boot microservices using **Docker** and deployed them to **AWS EC2** instances, configuring basic resource limits for predictable performance.

SKILLS

AI/ML Platforms – Claude, Generative AI

Programming Languages – Python, Java, JavaScript

Development Tools – Git, Docker, Jenkins, Jira, Confluence

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Google Cloud Platform

Data Analysis & BI – SQL, Power BI, Tableau, R, pandas, NumPy, scikit-learn, DAX, Power Query

Methodologies – Agile, Scrum, Lean, BPMN 2.0

PROJECTS

AI-Powered Flight Operations Dashboard

- Developed a dashboard using **Claude** to synthesise operational documents and surface insights on flight delays, processing over **5,000 daily flight records**.
- Engineered Python scripts to automate data ingestion from multiple sources into a centralized repository for analysis, reducing manual data entry by approximately **40%**.
- Designed and implemented REST APIs with **FastAPI** to serve aggregated flight data to downstream reporting tools, ensuring efficient data retrieval.

Maintenance Workflow Automation Tool

- Built a **Java Spring Boot** application to streamline maintenance request processing, integrating with an existing MRO system.
- Implemented automated task assignment logic based on engineer availability and skillsets, reducing average ticket resolution time by **18%**.
- Developed a **PostgreSQL** schema and data model to support the new workflow, ensuring data integrity and efficient querying for operational metrics.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
