PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **REST APIs** using **Java Spring Boot** for internal microservices, handling approximately 1,500 requests per minute during peak hours.
- Engineered **Python scripts** for automating data extraction and transformation tasks across disparate sources, reducing manual processing time by 40%.
- Implemented database schema changes and wrote complex **SQL queries** for data validation and reporting across **PostgreSQL** and **MySQL** databases.
- Contributed to building and scaling applications that utilize **environmental data** through a unified standardized interface, integrating with **AWS services**.
- Gained hands-on experience with **TypeScript** and **automated testing frameworks** to build reliable and maintainable code for commercial development projects.
- Applied **Agile and Scrum practices** to manage project timelines and contribute to sprint planning, ensuring timely delivery of features.
- Managed source control operations using **GitHub** and configured **Jenkins** pipelines for continuous integration and deployment of applications.

SKILLS

Languages – TypeScript, Java, Python, SQL, R.

Frameworks & Libraries – Spring Boot, Spring Cloud, Hibernate, JPA, scikit-learn, pandas, NumPy, Flask, FastAPI, React, Angular.

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch).

Databases – PostgreSQL, MySQL, Oracle.

Tools & Technologies – Docker, Kubernetes, Jenkins, GitHub, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, RStudio.

Methodologies – Agile, Scrum, CI/CD, REST API development, GraphQL, Automated Testing.

PROJECTS

Environmental Data Processing Pipeline

- Designed and implemented a **Python**-based data pipeline to ingest and process environmental sensor data from various sources, handling ~500 GB of raw data weekly.
- Developed a **FastAPI** service to expose processed environmental metrics via a **REST API**, enabling downstream consumption by analytical applications.
- Integrated the pipeline with **AWS S3** for data storage and utilized **Docker** for containerization, ensuring consistent deployment across development and staging environments.

API for Sustainability Analysis Tool

- Built a **TypeScript** backend service using **Node.js** to provide an interface for sustainability analysis, serving data to a front-end application.
- Implemented **automated testing** strategies, including unit and integration tests, achieving over 85% code coverage for critical API endpoints.
- Collaborated with UX designers and product managers to gather requirements and iterate on API design, ensuring alignment with user needs for the sustainability tool.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
